EVERYDAY

GAME CHANGING

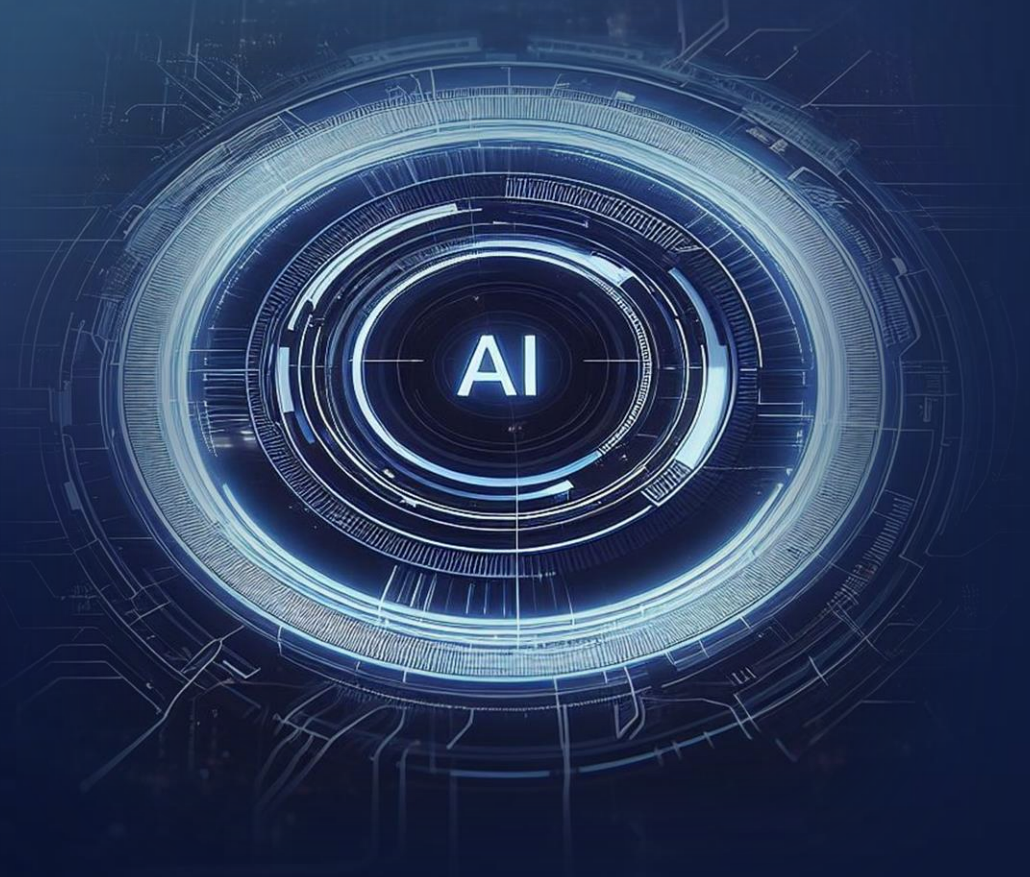

Source: Gartner

AI will reinvent **every** industry

PARTNER DAY
21.November 2023

Personal Healthcare	More effective patient treatment plans
	Accurate drug development and discovery
	Precise medical imaging and diagnoses
Safe Finance	Protect loan/credit privacy with sharable data
	Detect suspicious and fraudulent transactions
	Turn data trends into risk assessments
Sustainable Retail	Tailor inventory and pricing based on demand
	Authentic virtual try-ons and less returns
	Generative product design and style transfers
Efficient Manufacturing	Optimize inventory tracing in the supply chain
	Amplify humans with collaborative co-bots
	Navigate the inner complexity of machines

Getting AI Ready – Executives & Sales

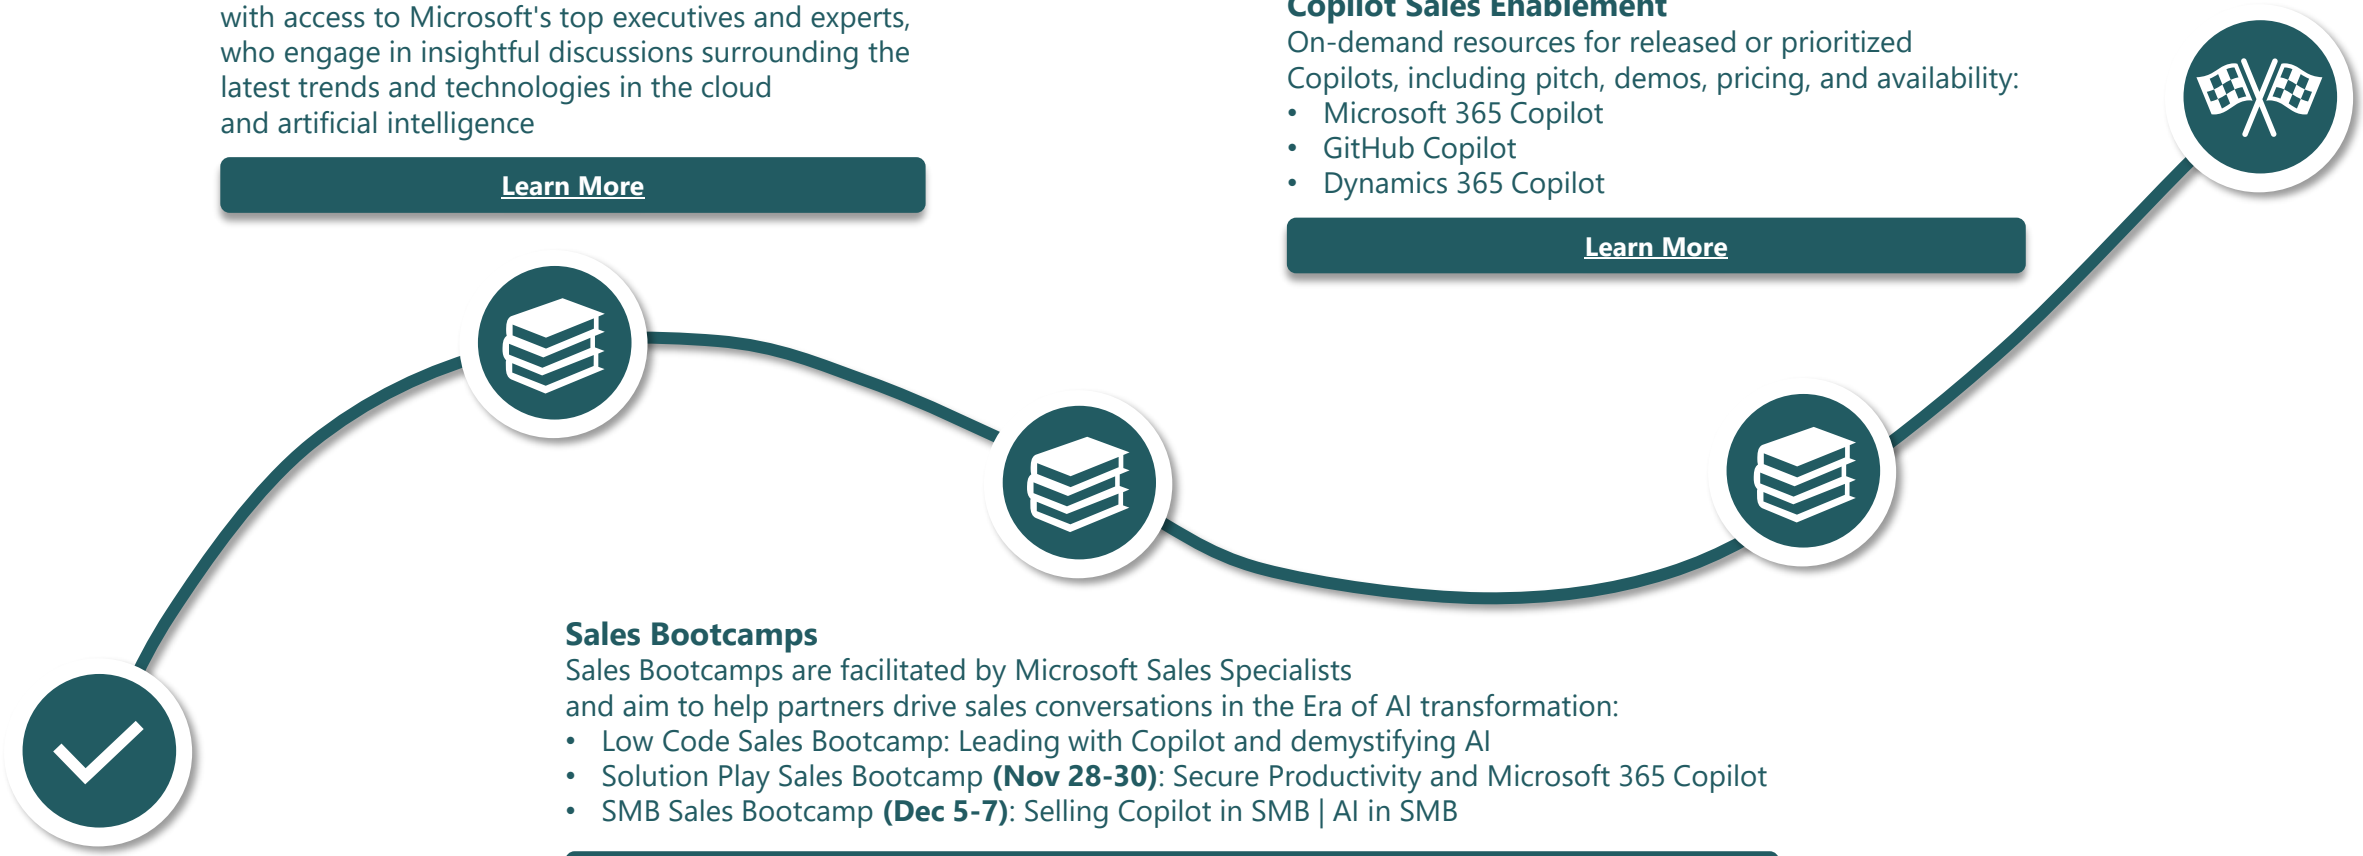

Executives Enablement Series
The Executive Enablement Series provides partners with access to Microsoft's top executives and experts, who engage in insightful discussions surrounding the latest trends and technologies in the cloud and artificial intelligence

Learn More

Copilot Sales Enablement
On-demand resources for released or prioritized Copilots, including pitch, demos, pricing, and availability:

- Microsoft 365 Copilot
- GitHub Copilot
- Dynamics 365 Copilot

Learn More

Sales Bootcamps
Sales Bootcamps are facilitated by Microsoft Sales Specialists and aim to help partners drive sales conversations in the Era of AI transformation:

- Low Code Sales Bootcamp: Leading with Copilot and demystifying AI
- Solution Play Sales Bootcamp **(Nov 28-30)**: Secure Productivity and Microsoft 365 Copilot
- SMB Sales Bootcamp **(Dec 5-7)**: Selling Copilot in SMB | AI in SMB

Learn More

Getting AI Ready – Technicians

Azure OpenAI Cloud Week (Jan 22-26)
Azure OpenAI Cloud Week helps accelerate a partner's path to AI capability:

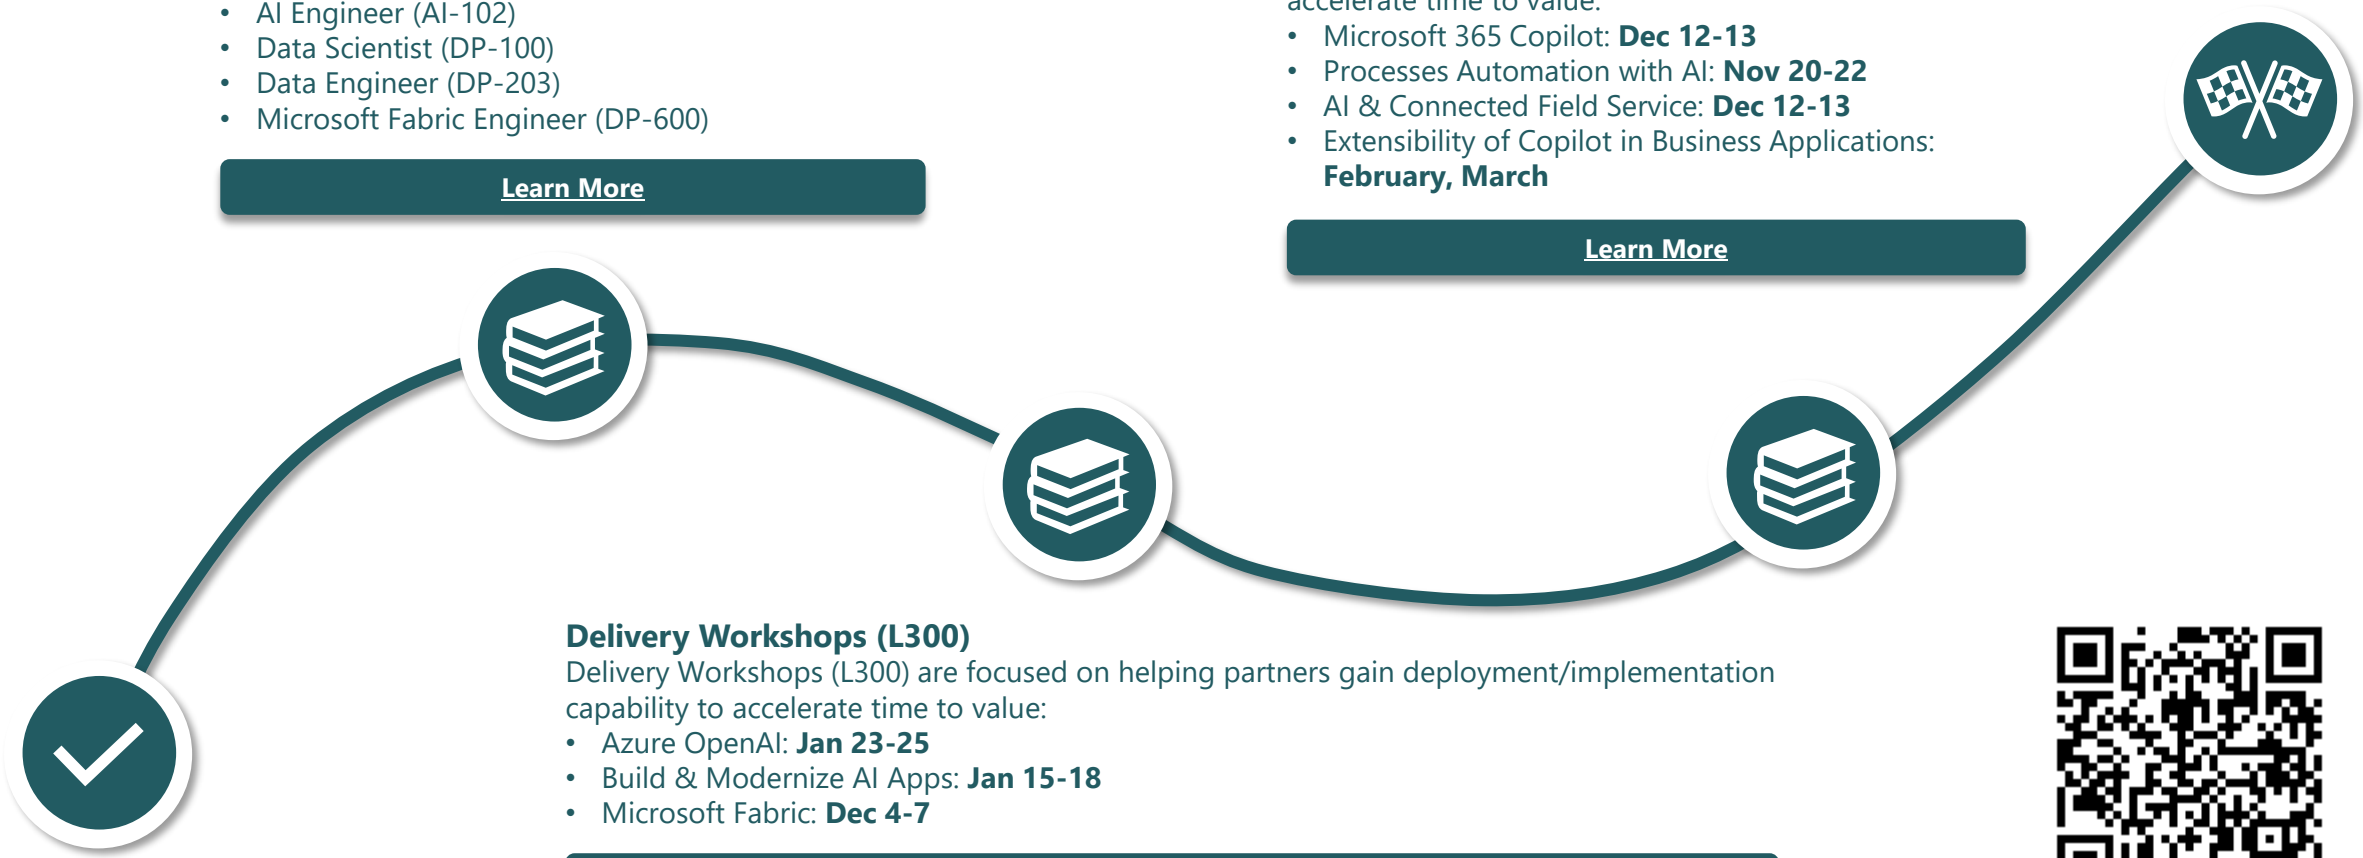

- AI Engineer (AI-102)
- Data Scientist (DP-100)
- Data Engineer (DP-203)
- Microsoft Fabric Engineer (DP-600)

Learn More

Copilot-Related Workshops (L300)
Copilot-Related Workshops are focused on helping partners gain deployment/implementation capability to accelerate time to value:

- Microsoft 365 Copilot: **Dec 12-13**
- Processes Automation with AI: **Nov 20-22**
- AI & Connected Field Service: **Dec 12-13**
- Extensibility of Copilot in Business Applications: **February, March**

Learn More

Delivery Workshops (L300)
Delivery Workshops (L300) are focused on helping partners gain deployment/implementation capability to accelerate time to value:

- Azure OpenAI: **Jan 23-25**
- Build & Modernize AI Apps: **Jan 15-18**
- Microsoft Fabric: **Dec 4-7**

Azure Regionsauswahl

- **Azure-Regionen:** Geografische Standorte, an welchen Azure-Dienste und Ressourcen bereitgestellt werden. Jede Region hat spezifische Merkmale wie Verfügbarkeitszonen, gepaarte Regionen, souveräne Regionen und alternative Regionen.
- **Faktoren für die Regionenauswahl:** Geschäftsanforderungen, Datenhaltung, Netzwerkperformance, Serviceverfügbarkeit, Kostenoptimierung und Resilienz.
- **Multi-Region-Lösungen:** Vorteile und Herausforderungen bei der Bereitstellung von Ressourcen über mehrere Regionen hinweg für verschiedene Szenarien wie Workload-Verteilung, Datensouveränität, K-Fall-Sicherheit und globales Networking.
- **Regionenverlagerung:** Guides und Tools zum Verschieben von Ressourcen von einer Region in eine andere, wie z.B. Datensynchronisation, Compliance-Anforderungen und Service-Abhängigkeiten.

Wählen Sie die passende Region

Servicekategorien für verschiedene Regionstypen

Regionale Azure Services sind in 3 Kategorien eingeteilt: **Foundational, Mainstream und Strategic.** Die generelle Strategie um Services in Regionen bereitzustellen ist primär getrieben vom Regionstyp, der Service Kategorie und Customer Demand.

Foundational

Verfügbar in allen "Recommended" und "Alternate" Regionen sobald die Region "Generally Available" ist.

Beispiele: CosmosDB, General Compute VMs, Load Balancer, Azure SQL, Blob, Datalake

Mainstream

Verfügbar in allen "Recommended" Regionen in den ersten Monaten nachdem die Region "Generally Available" ist. Demand-driven in "Alternate" Regionen.

Beispiele: App Service, Azure Kubernetes Service, Data Factory, Cognitive Search, API Management

Strategic (ehemals Specialized)

Zielgerichtete Service Offerings, oft mit Industry-Focus oder basierend auf spezieller Hardware. Demand-driven in allen Regionen.

Beispiele: GPU VMs, Azure Netapp Files, Azure Redhat Openshift, Azure VMware Solution

	Regionstyp					
	Non-regional	Foundational	Mainstream	Strategic	Availability Zones	Data residency
Recommended	**Y**	**Y**	**Y**	**Demand-driven**	**Y**	**Y**
Alternate	**Y**	**Y**	**Demand-driven**	**Demand-driven**	**N/A**	**Y**

Umsetzung der Applikationsanforderungen

- Einzelner Server = Single Point of Failure
- Mehrere Server in einem Rechenzentrum = Rack-Ausfall
- Mehrere Server in mehreren Rechenzentren in einer einzelnen Azure-Region = Rack-Ausfall + Ausfall des Rechenzentrums
- Mehrere Server in mehreren Rechenzentren, die über mehrere Regionen hinweg verteilt sind = Rack-Ausfall + Ausfall des Rechenzentrums + Ausfall der Azure-Region

Note: Datacenter = Availability Zone

Multi-Region Möglichkeiten in Azure

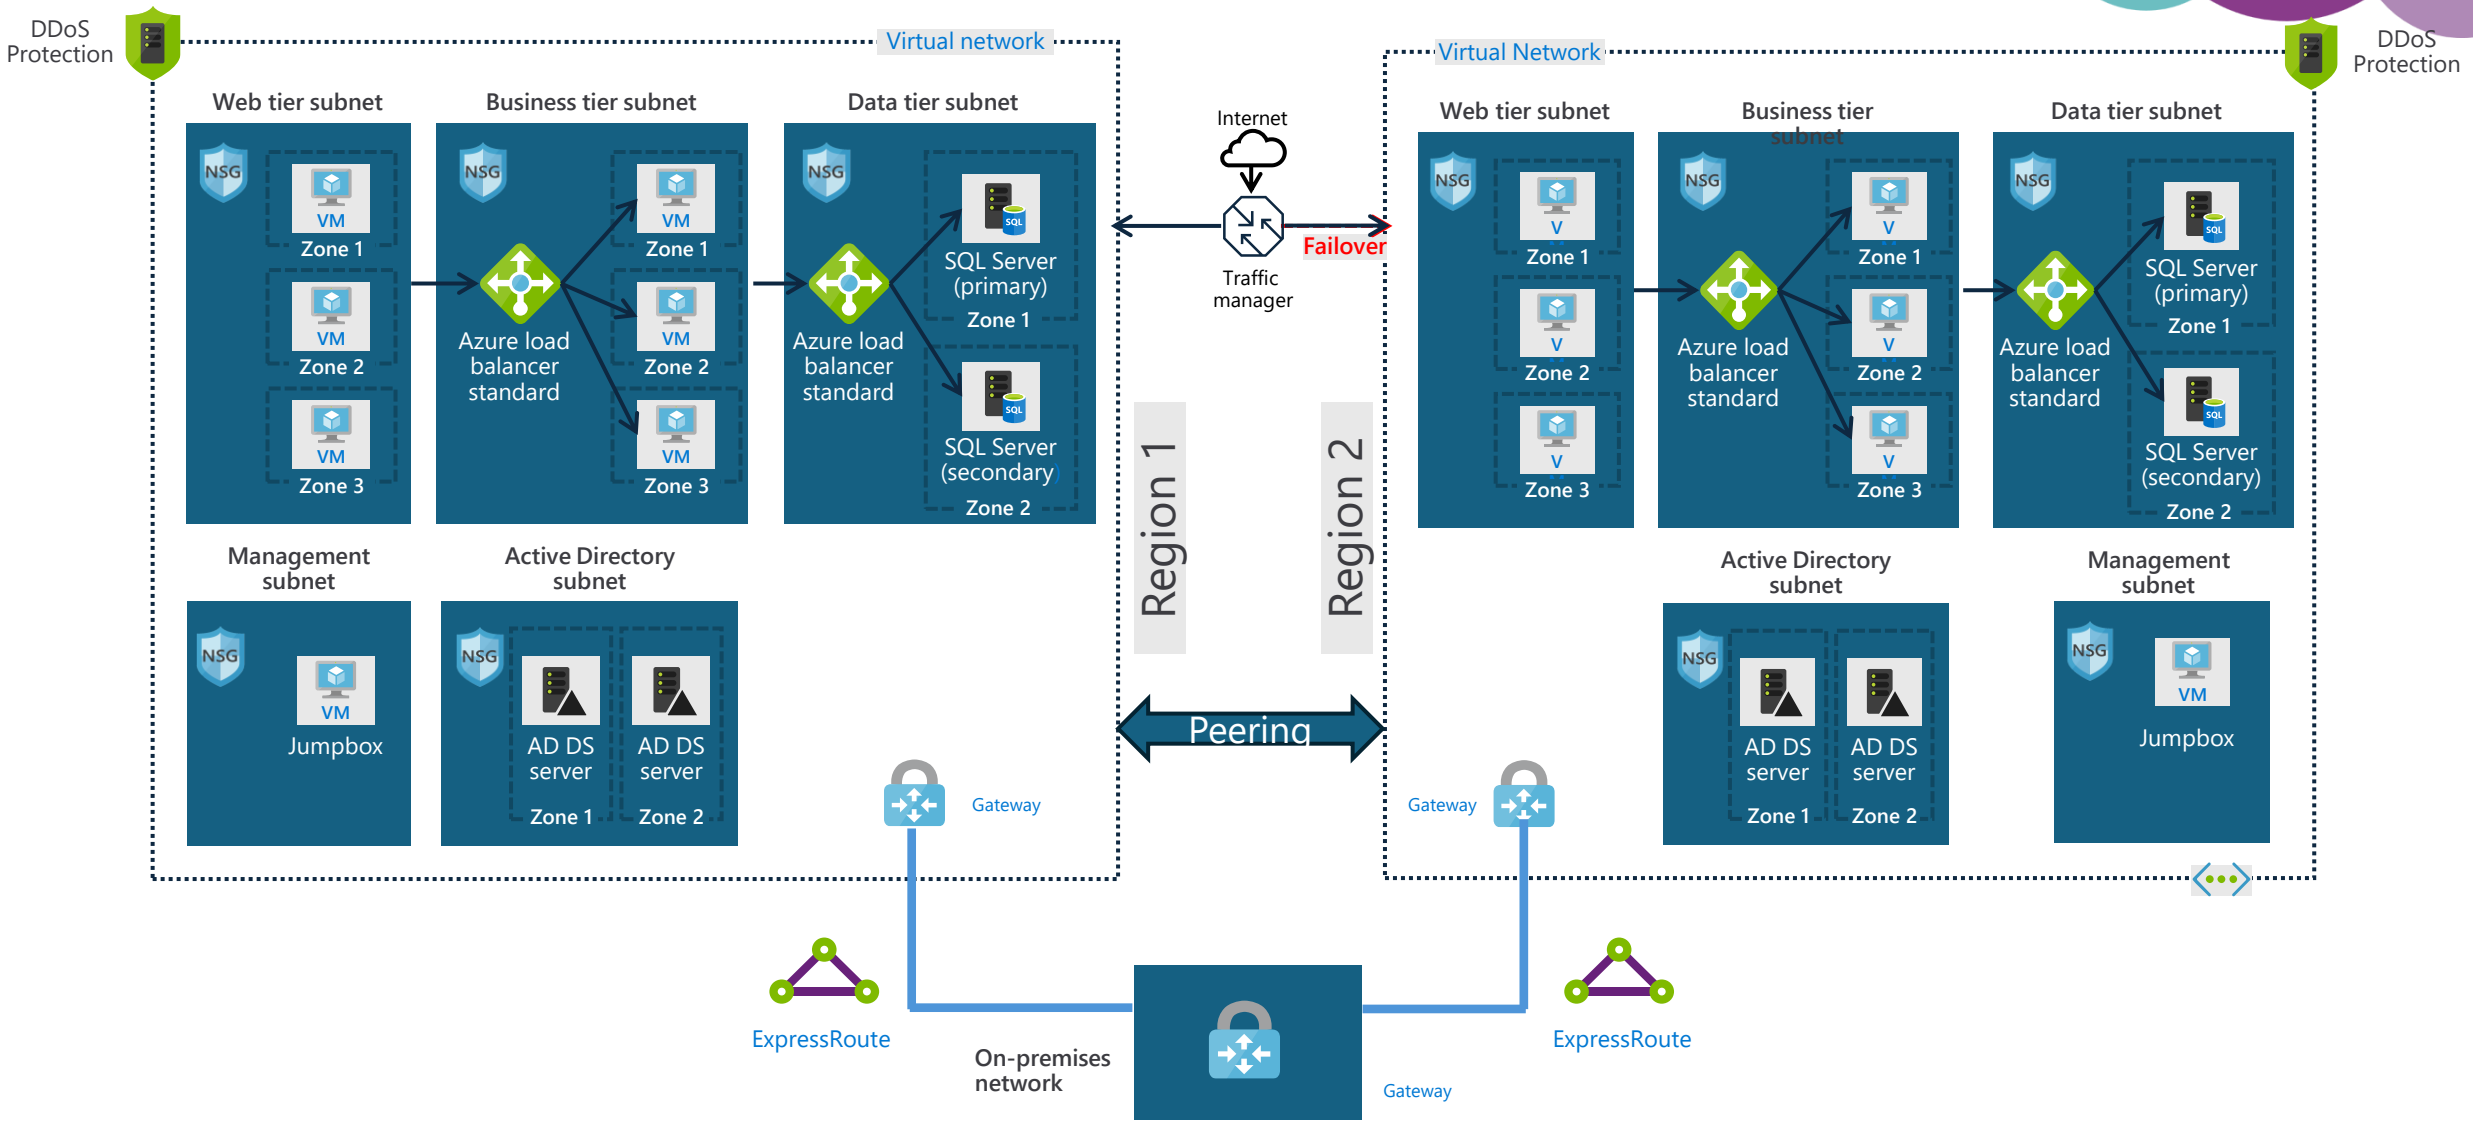

- Multi-Region deployments
- Azure Site Recovery – DR Planung und Wiederherstellung von IaaS Systemen (VM and SQL) über Regionen hinweg
- PaaS – Services haben eingebaute Möglichkeiten oder publizierte Anleitungen
  - Zum Beispiel: Azure SQL Database stellt 2 Typen von Wiederherstellung zur Verfügung: Geo-Restore und aktive Geo-Replikation.
  - Optionen sind abhängig von der gewählten SKU
- Data Loss/Corruption DR
  - Azure Backup – Backup und Restore IaaS VMs, Azure Files,…

DR Multi-Region Strategies

- **Neubereitstellung bei Desaster:** Bei diesem Ansatz wird die Anwendung im Katastrophenfall von Grund auf neu bereitgestellt. Dies ist für nicht kritische Anwendungen geeignet, die keine garantierte Wiederherstellungszeit erfordern.
- **Warm Spare (Aktiv/Passiv):** Es wird ein parallel gehosteter Dienst in einer weiteren Region erstellt und Rollen werden bereitgestellt, um eine minimale Kapazität zu garantieren. Die Rollen erhalten jedoch keine Produktiv-Workloads. Dieser Ansatz ist nützlich für Anwendungen, die nicht für die regionsübergreifende Verarbeitung von Daten konzipiert wurden.
- **Hot Spare (Aktiv/Aktiv):** Die Anwendung ist so konzipiert, dass sie in mehreren Regionen Produktiv-Workloads verarbeitet. Die Cloud-Dienste in jeder Region können für höhere Kapazitäten konfiguriert sein, als für die Zwecke der Katastrophenwiederherstellung erforderlich sind. Alternativ können die Cloud-Dienste bei Bedarf im Katastrophenfall entsprechend skaliert werden. Dieser Ansatz erfordert Investitionen in die Anwendungsentwicklung, bietet jedoch gravierende Vorteile. Dazu gehören eine niedrige und garantierte Wiederherstellungszeit, kontinuierliche Tests aller Komponenten und eine effiziente Nutzung der Kapazität.

Beispielarchitektur: Multi-Region Aktiv/Aktiv

GERMANY

PARTNER DAY
21.November 2023

Launched 2019

2020: Power Automate, Power Aps, Power BI

2021: 3 AZs

Germany West (Frankfurt) & North (alternate reg.)

“Recommended Region”

Globale und viele speziell in Deutschland relevante Zertifizierungen:
BSI-C5, FHIR, TISAX, IT Grundschutz…

SWITZERLAND

PARTNER DAY
21.November 2023

Launched 2019
(Azure, dann M365 mit ADR)

2020: D365 & Power Platform

3 AZs

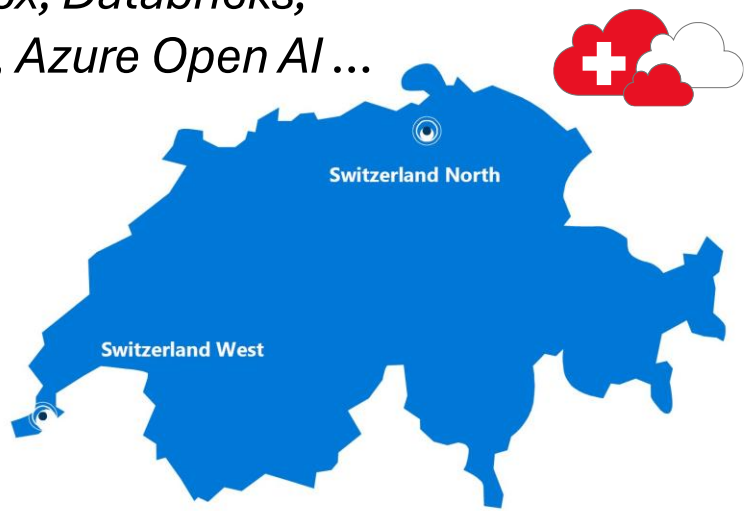

CH North & West (Alternate Reg.) paired

Große Bandbreite an Azure Services, z.B.

Mv2, ANF, AVS, DataBox, Databricks, Confidential Compute, Azure Open AI …

SAP RISE

FHIR, Swiss PS,
FSI Compliance

➔ Azure Products by Region

SWEDEN

Launched 2021
(from start Azure & M365)

3 AZs

Sweden Central & South (alternate reg.)

“Circular Datacenter”
12.000 Servers for reuse/month

“Zero Waste” Zertifizierung ab 2025

24/7 “hourly matching”
erneuerbare Energie mit Vattenfall

Preem Evolution Bio Diesel

Education

Support

Azure Virtual Desktop

Modernisierung - einfache Migration virtueller Desktops und Apps nach Azure

PARTNER DAY
21.November 2023

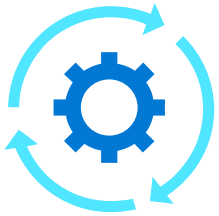

Bereitstellung von Windows 10/11 auf jedem Gerät, überall

“Built-in” intelligente Sicherheit

Bereitstellung und Skalierung in wenigen Minuten

Kostenreduzierung durch Nutzung vorhandener Lizenzen und nutzungsbasierte Abrechnung

Starkes Partnernetzwerk, das Sie bei der Migration und Modernisierung unterstützt

Azure SQL – die beste Wahl für SQL Server Workloads

Modernisierung – Azure SQL Services

PARTNER DAY
21.November 2023

Vollständig verwaltet und immer auf dem neuesten Stand

Seien Sie produktiver mit **KI-gestützten Funktionen**, die Aufgaben automatisieren und die **Leistung für Sie optimieren**.

Nutzen Sie Ihre vorhandene SQL-Erfahrung in der Cloud

Bauen Sie auf dem, **was Sie kennen**, mit einer konsistenten Codebasis auf und stellen Sie es überall über die Edge to Cloud bereit.

Sparen Sie mit den niedrigsten Gesamtbetriebskosten

Holen Sie sich mehr Cloud für weniger Geld mit einem führenden Preis-Leistungs-Verhältnis und **Einsparungen von bis zu 85 %** gegenüber den Pay-as-you-go-Tarifen mit Azure Hybrid Benefit.

Schützen Sie Ihre Daten mit integrierter, intelligenter Echtzeit-Sicherheit

Sichern Sie Ihre Daten mit mehreren Schutzschichten, integrierten Kontrollen, **intelligenter Erkennung von Bedrohungen** und einem umfassenden Angebot an Compliance-Lösungen.

Die einzige Cloud mit immergrünem SQL

Azure kennt SQL Server am besten

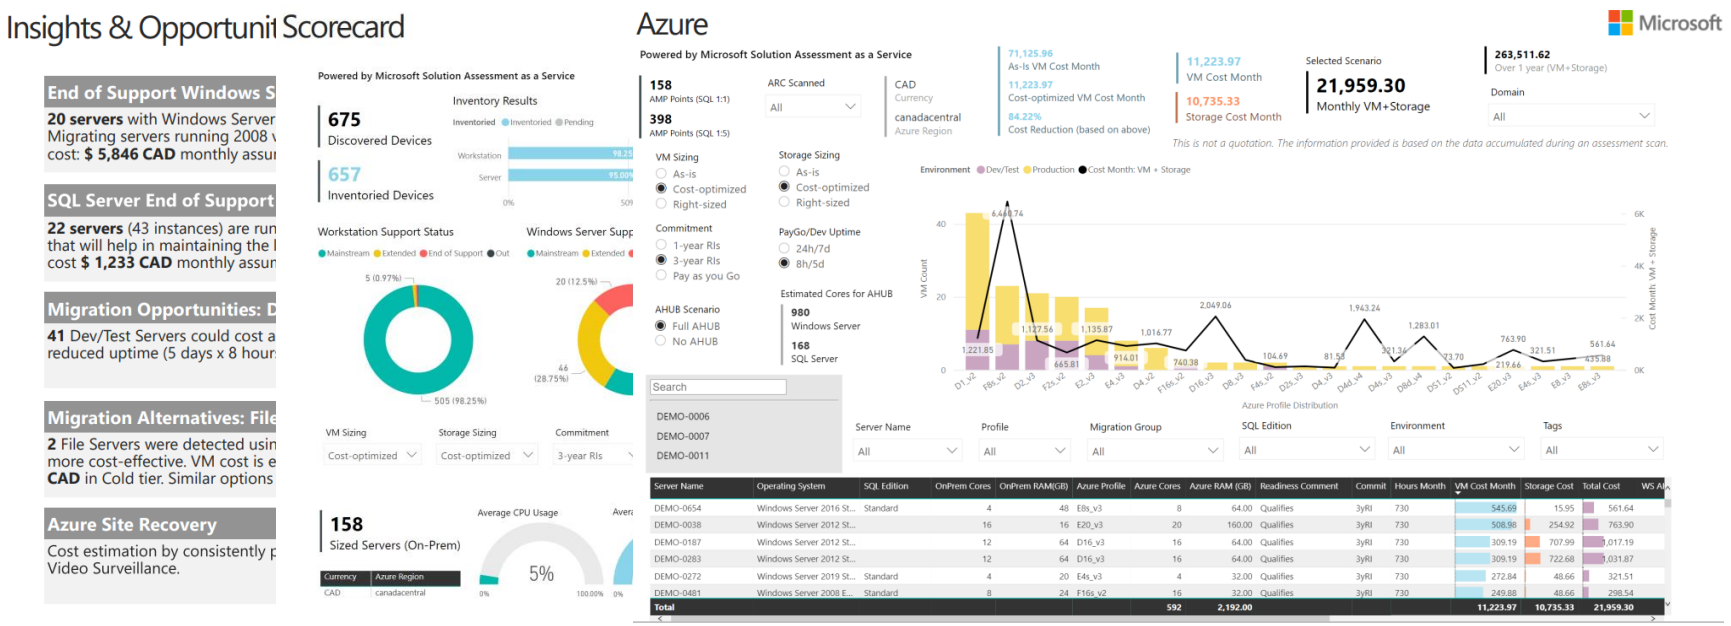

Microsoft Solution Assessment

Analyse und Planung

PARTNER DAY
21.November 2023

Möchten Sie eine Cloud-Migration planen. Solution Assessments nutzen modernste Tools, um Ihre aktuelle Unternehmenslandschaft zu überprüfen, Ihren Datenbestand zu analysieren und umsetzbare, datengestützte Empfehlungen zu geben.

Assessment

- Status aktuelle Auslastung
- Check der Abhängigkeiten
- OS & SQL Version Support

Daten & Analyse

- Power-BI Dashboard
- Assessment Präsentation

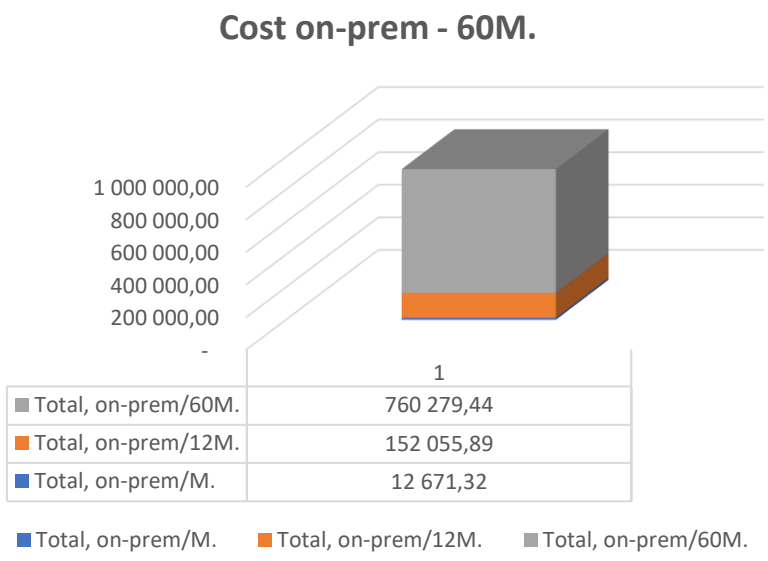

Kostenplanung

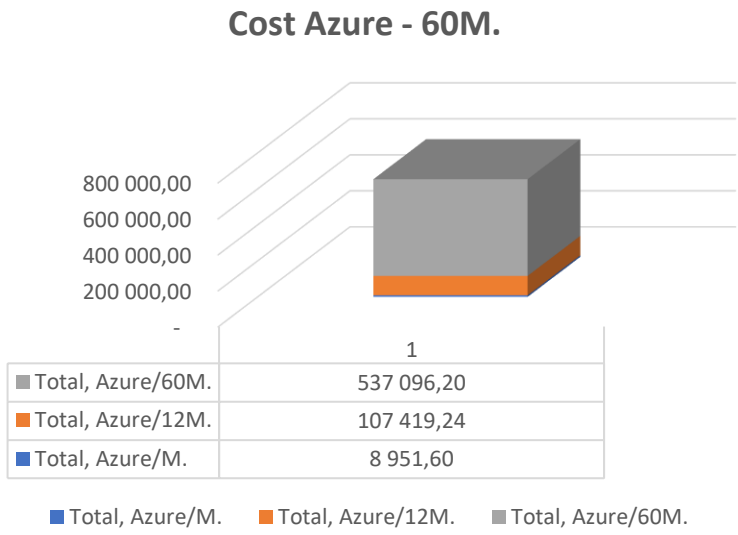

- Zu erwartende Azure Kosten
- Flexible Optionen
- Saving Plans

Microsoft Azure – “The Use-Case”

Arrow Referenzkundenprojekt Hoster-Migration

PARTNER DAY
21.November 2023

Kosten optimieren

- Assessment Daten richtig interpretieren
- Services optimieren und konsolidieren
- Services modernisieren
- Lizenzierung optimieren

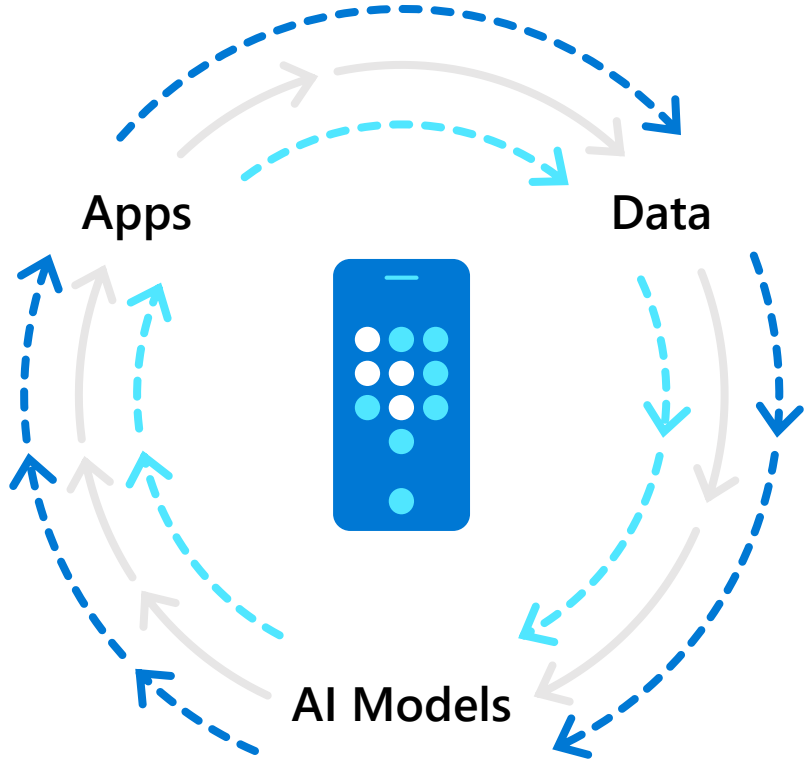

Kosten in Azure

- 29%

Beschleunigen Sie Cloud-native App-Innovationen in den Bereichen Datenverarbeitung, Daten und KI

PARTNER DAY
21.November 2023

Die Anforderungen der Kunden ändern sich schnell. Nutzen Sie das Potential in der Cloud!

Azure Kubernetes Service

Azure Functions

Azure Cosmos DB

Azure SQL

Microsoft Fabric

Cognitive Services

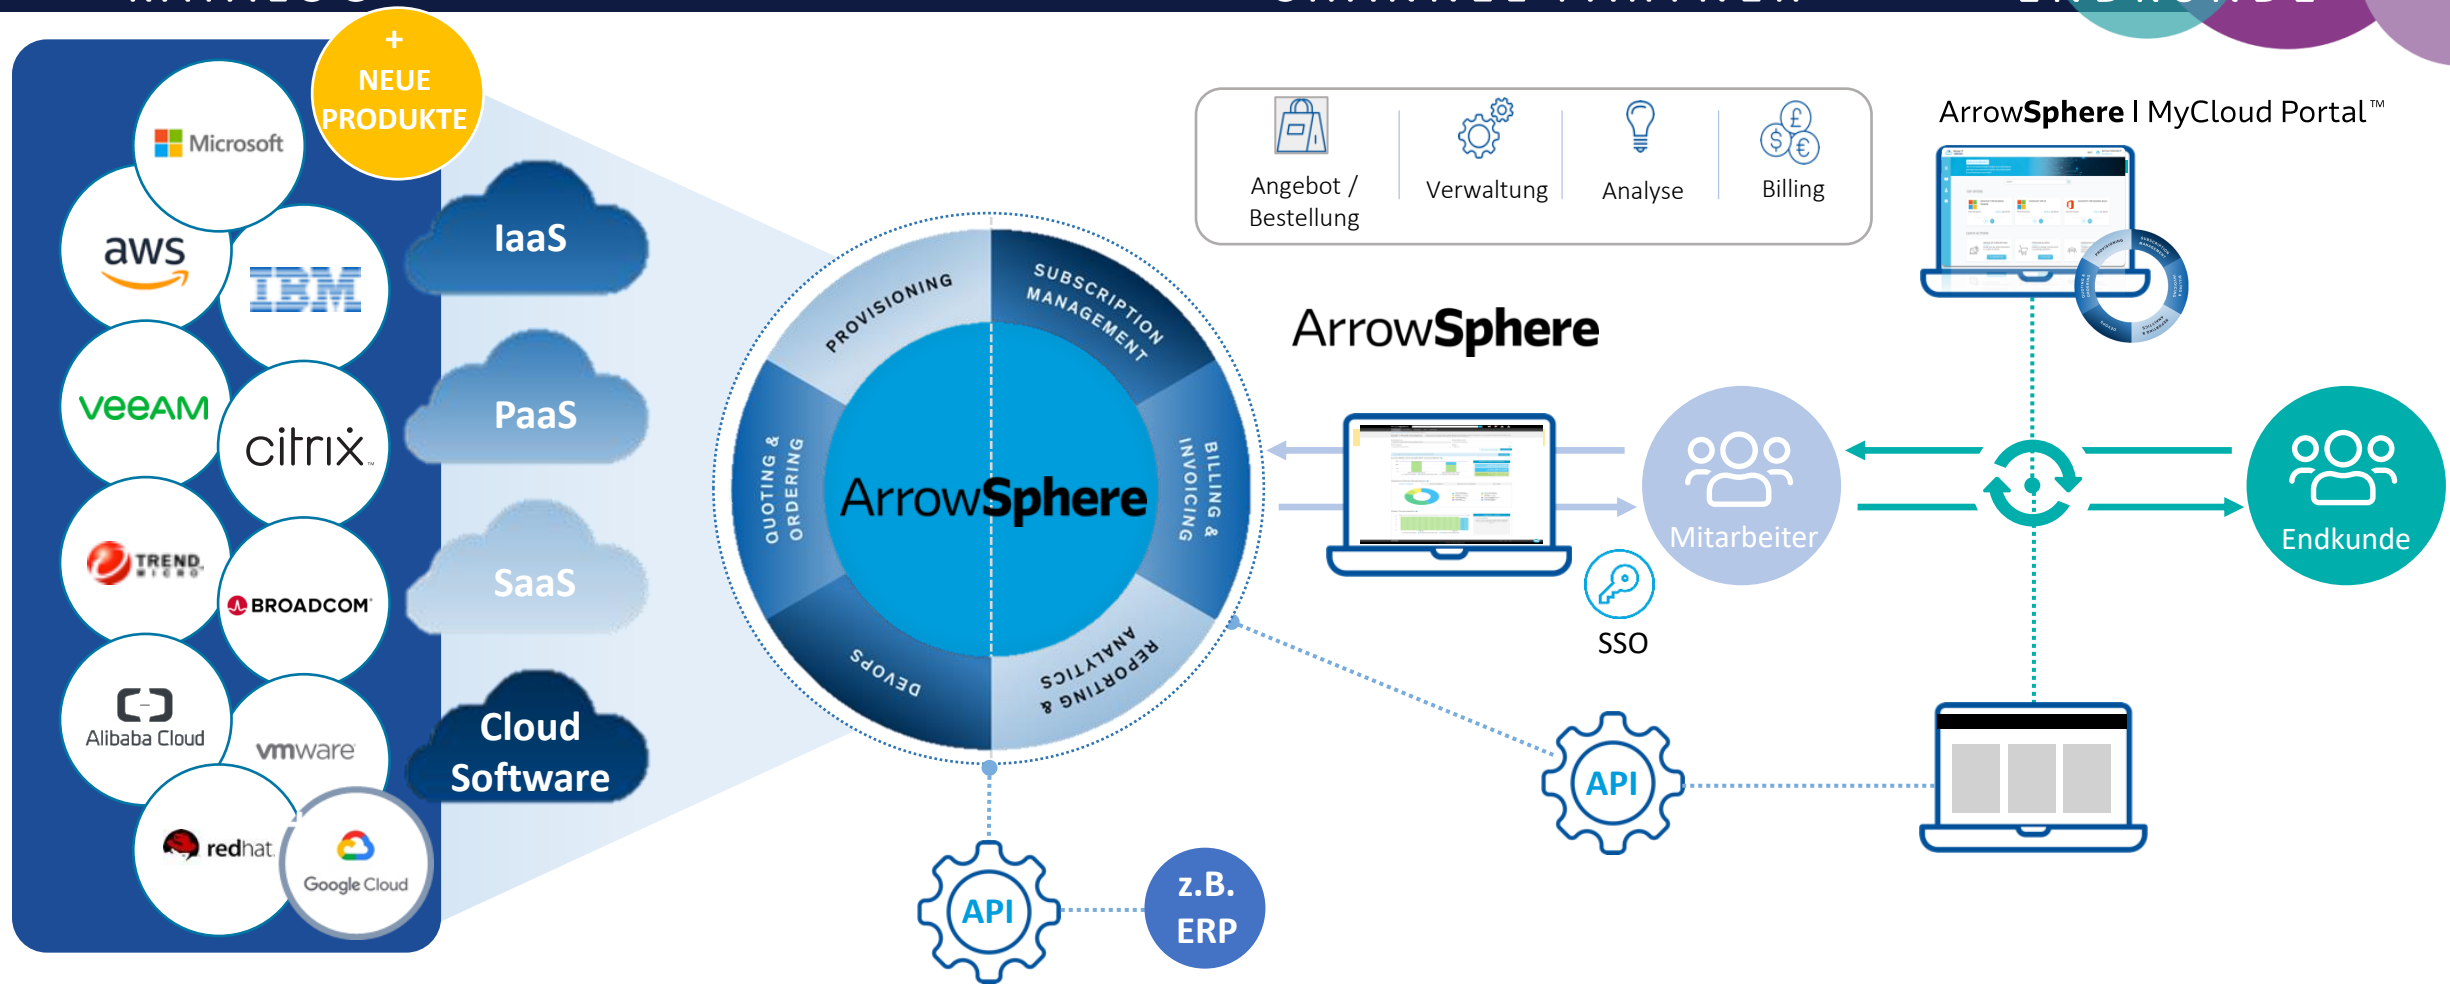

Applied AI

Machine Learning

ArrowSphere Modern Cloud Management Platform

KATALOG | CHANNEL PARTNER | ENDKUNDE

Alles aus einer Hand → Einfache Workflows → Wachstum → Integration

Microsoft Azure – Möglichkeiten

Worüber sollten wir sprechen?

- Azure ist zu teuer
- Mir fehlen Know-How und Ressourcen
- Da verdiene ich weniger
  - **Business Modell?**
- Chancen und neues kompetitives Umfeld für Hoster/Service-Provider zugleich
  - Hoster vergleichen sich oft nur mit anderen Hostern
    - Services, Pricing, etc.
- Wie und wo kann ich starten?

PARTNER DAY

What's "Attack / Cyber Kill Chain"?

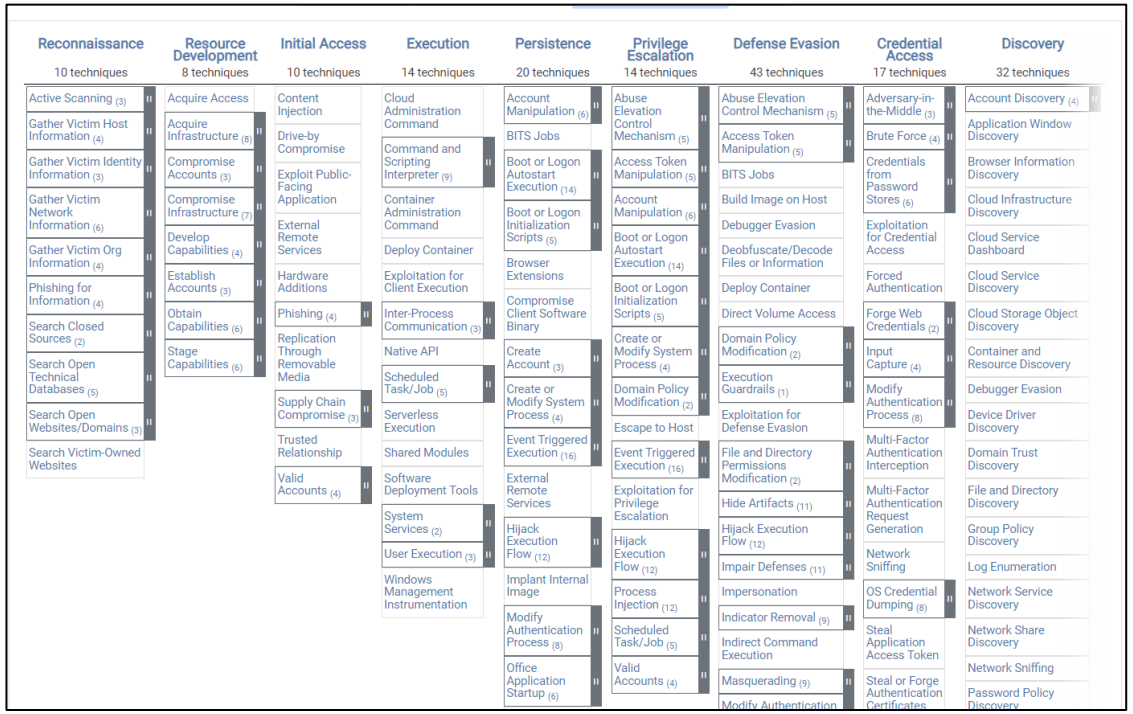

PARTNER DAY
21.November 2023

- MITRE ATT&CK Framework
  - Modell zur Ablaufbeschreibung eines "Cyberangriffes"

„Cyber Kill Chain" by Martin Lockheed

- "Cyber Kill Chain"
  - Framework zur Beschreibung eines „Cyberangriffes" aus Angreifer- und Verteidigungssicht
  - 100% Coverage Nicht-Ziel - aber Orientierungshilfe!

„ATT&CK Matrix" aus MITRE ATT&CK®

base it

ATT&CK Tactics seen in the wild…

Reconnaissance Tactics

Active Scanning

Credential Access Tactics

Phishing / AitM (“Adivsory in the middle”)

Exfiltration Tactics

Exfiltration over Web Service

Customer Story #1 – Active Scanning

Customer Story #1 – Active Scanning

- Veröffentlichung einer CVE durch Cisco Talos
  - betroffen: Router, Switches, WLAN Controller,…

Source: Multiple Vulnerabilities in Cisco IOS XE Software Web UI Feature

Customer Szenario

Verwendung vieler öffentlich erreichbarer, vulnerabler Routermodelle
(Sicherheitslücke war via TCP/443 – oft für SSL VPN verwendet – ausnutzbar)

Customer Story #1 – Active Scanning

- CMDB / Asset Management → Evaluierung betroffener Systeme
  - manuell gepflegt – up-2-date?
  - welche Software Releases im Einsatz / anfällig für CVE?
  - öffentlich erreichbar oder nur intern?

- Detection & Mitigation

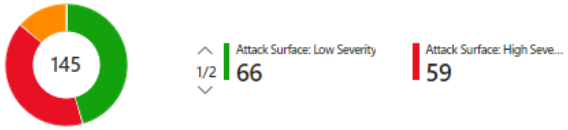

Customer Story #1 – Active Scanning

- Showcase - Inventory

Microsoft 365 Security and Governance Workshop

Beschreibung

Im ersten Teil des Workshops werden mit den Sicherheits- und Datenschutzverantwortlichen des Unternehmens die wichtigsten Sicherheits- und Governance-Einstellungen im Microsoft 365-Tenant durchgearbeitet. Basierend auf Erfahrungen aus vielen erfolgreichen nationalen und internationalen Kundenprojekten wird anhand der ACP Best Practices eine Konfiguration erarbeitet, welche die optimale Balance zwischen Nutzen für die User:innen und Sicherheit sowie Datenschutz zum Ziel hat und sich gleichzeitig an den Anforderungen des Unternehmens ausrichtet. Dies stellt die Basis für weitere Schritte im Microsoft 365 Security-Umfeld dar.

Im zweiten Teil erfolgt die technische Implementierung der verabschiedeten Konzepte gemeinsam mit der IT-Abteilung des Unternehmens.

Ziele/Nicht-Ziele

Organisatorische Definition der Security- und Governance-Einstellungen mit allen zuständigen Personen und die technische Umsetzung der getroffenen Entscheidungen. Im Zuge des Workshops werden ausschließlich Sicherheits- und Governance-Themen besprochen, die unter dem Punkt „Umfang" angeführt sind.

Risken

Einige Themenbereiche bzw. Entscheidungen können u.a. den Einsatz von zusätzlichen Services nach sich ziehen. Das wirkt sich auf den angebotenen Aufwand sowie auf die Projektdurchlaufzeit aus. Beispielhaft sei hier die Notwendigkeit einer 3rd Party-Governance-Lösung für das Gastmanagement bzw. die Teamverwaltung oder für eine Backup-Lösung angeführt.

Voraussetzung

Vor der Umsetzung der getroffenen Entscheidungen muss die technische Vorbereitung abgeschlossen und zumindest eine Entra ID Premium Plan 1-Lizenz im Tenant verfügbar sein.

Umfang

Vor dem Workshop wird das im Workshop besprochene Slidedeck mit alle unten beschriebenen Themen zur Verfügung gestellt, damit die Teilnehmer:Innen sich inhaltlich auf den Workshop vorbereiten können.

Nach einem Überblick über die Microsoft 365-Architektur werden alle Security- und Governance-relevanten Einstellungen im Microsoft 365-Tenant besprochen. Folgende Themen sind Teil des Workshops:

- Überblick Microsoft 365-Architektur
- Authentifizierungsoptionen
- Microsoft 365-Gruppen
- Gastmanagement
- Datei- und Ordner-Sharing
- Chat über Organisationsgrenzen
- Applikationsfreigaben
- Teams-Konfiguration
- Data Governance
- Audit-Logs und Reports

Durchlaufzeit

Wir rechnen mit einer Durchlaufzeit von 3 Wochen

Übermittelte Dokumente

Das im Workshop verwendete Slidedeck wird zur Verfügung gestellt. Die getroffenen Entscheidungen werden im Slidedeck festgehalten – ist eine Dokumentation der Entscheidungsfindung bzw. Begründung der Entscheidungen notwendig bzw. ist eine Protokollierung notwendig, muss diese Dokumentation / Protokollierung kundenseitig erfolgen bzw getrennt angeboten/beauftragt werden.

Abhängigkeiten

Conditional Access Workshop als Folgeworkshop.

Abnahmekriterien

Alle Entscheidungen im Slidedeck sind getroffen und umgesetzt – ausgenommen die Punkte, bei denen im Meeting vereinbart wurde, dass (noch) keine Entscheidung getroffen werden kann.

Teilnehmer:innen Kunde

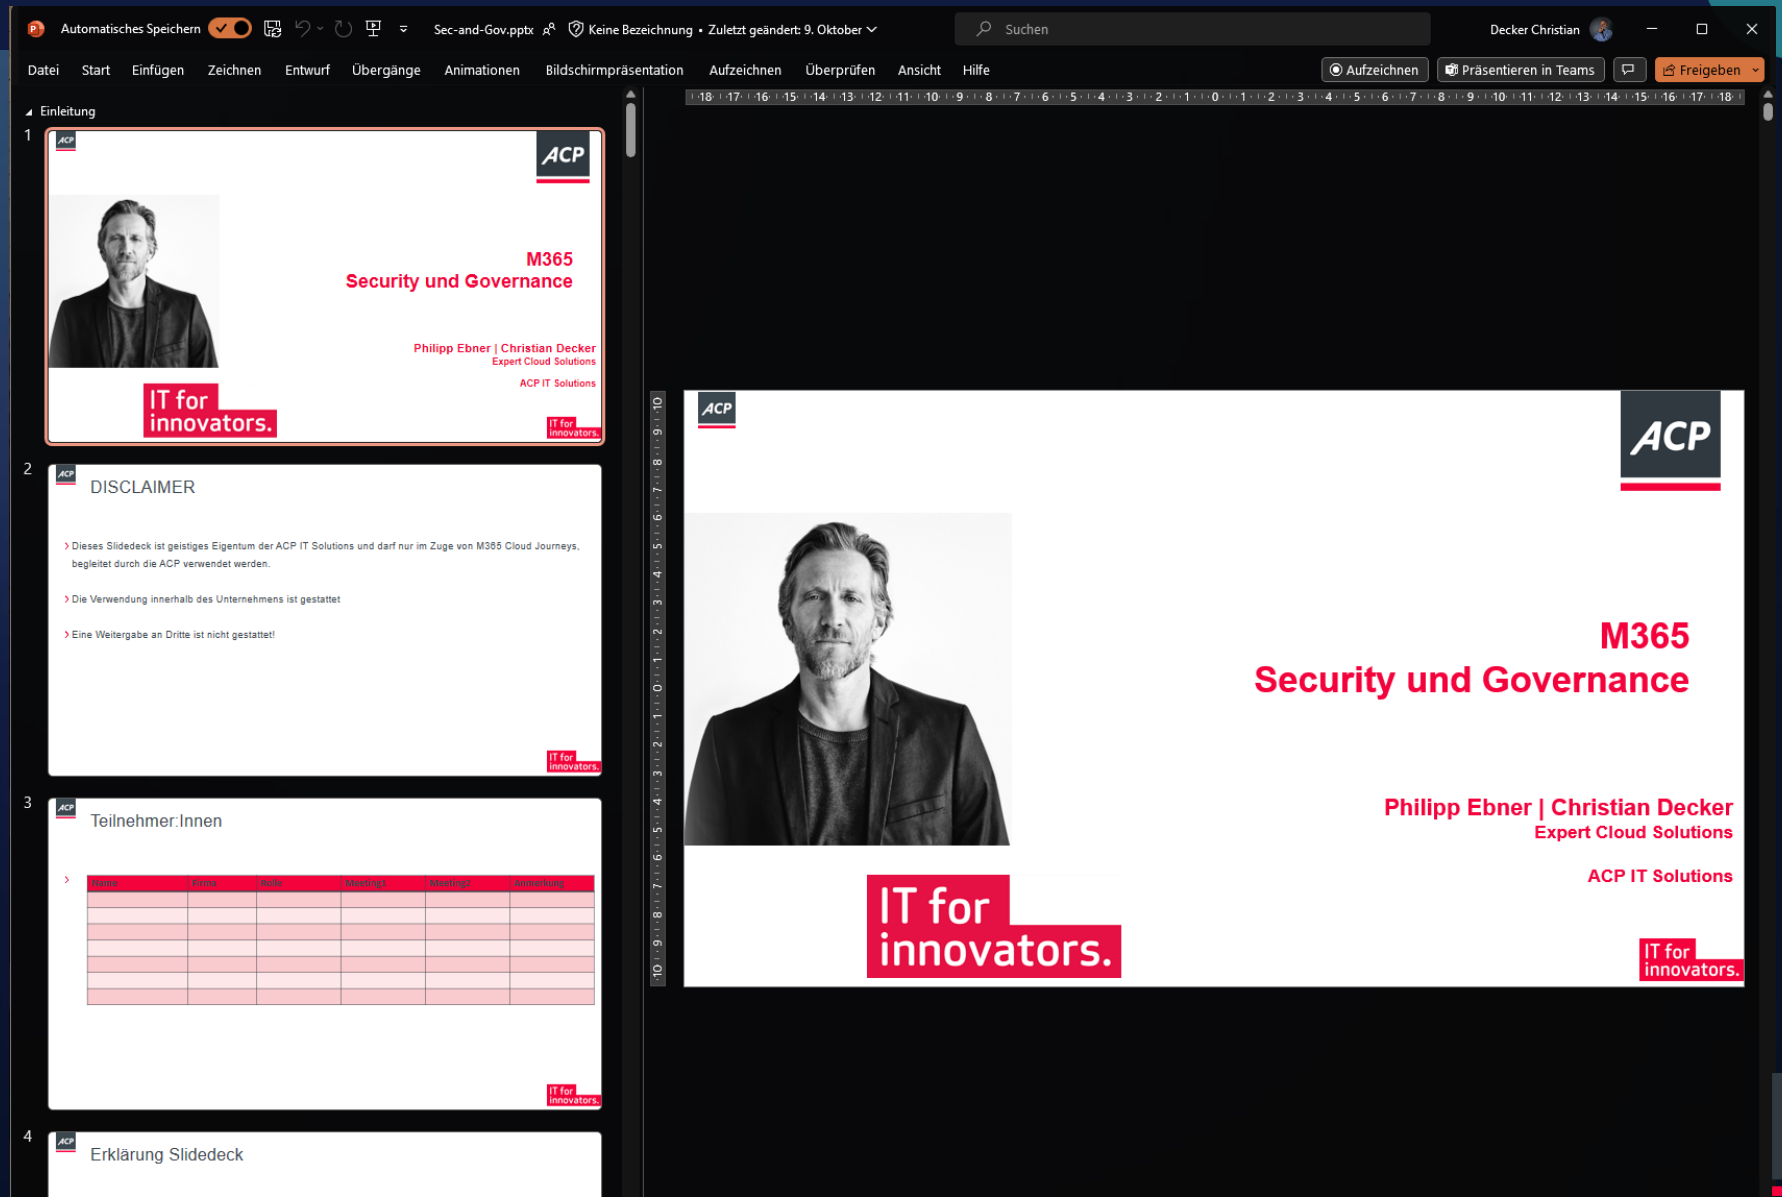

- CISO, Datenschutzbeauftragte:r, M365-Projektleitung, M365-Administrator, IT-Leitung
- Optional: Betriebsrat, AD-Administrator, Endpoint-Administrator

ACP M365 Standards

- Sehr viele Admin-Center (>15) mit sehr vielen Einstellungen (geschätzt > 3.000)
- Einige Default-Einstellungen nicht optimal bzw tlw. sogar Sicherheitsrisiko

- Viele Neuerungen und Änderungen

- Schwierig bis unmöglich, hier aktuell zu bleiben

Name	Description
Azure ATP	Identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.
Compliance	Use the Microsoft Purview compliance portal to meet your compliance and privacy goals. You'll find integrated solutions that help protect sensitive info, manage data lifecycles, reduce insider risks, safeguard personal data, and more.
Dynamics 365 Apps	Use the Dynamics 365 admin center to manage your environment, manage capacity, monitor usage and perform other admin operations.
Endpoint Manager	A single management experience for the End User Computing team in IT to ensure employees' Microsoft 365 devices and apps are secured, managed, and current.
Exchange	Manage advanced email settings, such as quarantine, encryption, and mail flow rules.
Microsoft Entra	Use the Microsoft Entra admin center to manage identities, permissions, and network access. Microsoft Entra ID is the new name for Azure Active Directory.
Office configuration	Manage, configure, and monitor deployment of Microsoft 365 Apps for your organization.
Power Apps	Use the Power Platform admin center to manage activity, licenses, and policies for user-generated Power Apps, which can connect to your data and work across web and mobile.
Power Automate	Manage the automation of repetitive and time-consuming tasks in the Power Platform admin center, where you can set up connections to web services, files, or cloud-based data and put them to work.
Power BI	This admin center enables Power BI service admins to manage a Power BI tenant for your organization. The portal includes items such as usage metrics and settings.
Search & intelligence	Manage Microsoft Search settings including services and content that are available for people in your organization. Make finding internal tools, documents, and people just as easy as searching the web in Bing.
Security	Use Microsoft 365 Defender for unmatched visibility into threats to your network and your security posture. Respond to incidents, proactively hunt for threats, track your assets, and deploy policies to secure your identities, devices, Office 365 workspaces, apps, and more.
SharePoint	Manage sites, sharing, storage, and more for SharePoint and OneDrive. Migrate files and sites to Microsoft 365.
Stream	Choose how Microsoft Stream works for your organization.
Teams	Configure messaging, conferencing, and external communication options for your users.
Universal Print	Universal Print is a serverless print management solution built with Zero Trust security in mind. Employees can print driverless from Windows 10/11, or Microsoft 365 for the web on mobile devices.
Viva Engage	Manage your Yammer network, set a usage policy, control external network settings, and enable features like translation.

Wie lange dauert die fahrt auf die nordkette in innsbruck und was kostet sie

- Suchen nach: **Fahrtzeit zur Nordkette in Innsbruck**
- Suchen nach: **Kosten für die Fahrt zur Nordkette in Innsbruck**
- Antworten für Sie werden generiert...

Ihre persönlichen und Unternehmensdaten sind in diesem Chat geschützt.

Die Fahrt von der Stadt Innsbruck bis zum Gipfel der Nordkette dauert insgesamt etwa eine halbe Stunde [1]. Die Kosten für die Fahrt variieren je nachdem, welche Stationen Sie besuchen möchten. Hier sind einige Preisinformationen:

- Fahrt zur Hungerburg: Einzelfahrt kostet 6,9 € und Hin- und Rückfahrt kostet 11,4 € [2].
- Fahrt zur Seegrube (inklusive Nutzung der Hungerburgbahn): Einzelfahrt kostet 23,8 € und Hin- und Rückfahrt kostet 39,6 € [2].
- Fahrt zum Hafelekar (inklusive Nutzung der Hungerburgbahn und Seegrubenbahn): Einzelfahrt kostet 26,4 € und Hin- und Rückfahrt kostet 44,0 € [2].

Bitte beachten Sie, dass diese Preise sich ändern können und es ist immer eine gute Idee, die aktuellen Preise auf der offiziellen Website zu überprüfen. Ich hoffe, das hilft! 😊

Power App mit Copilot und Copilot Studio

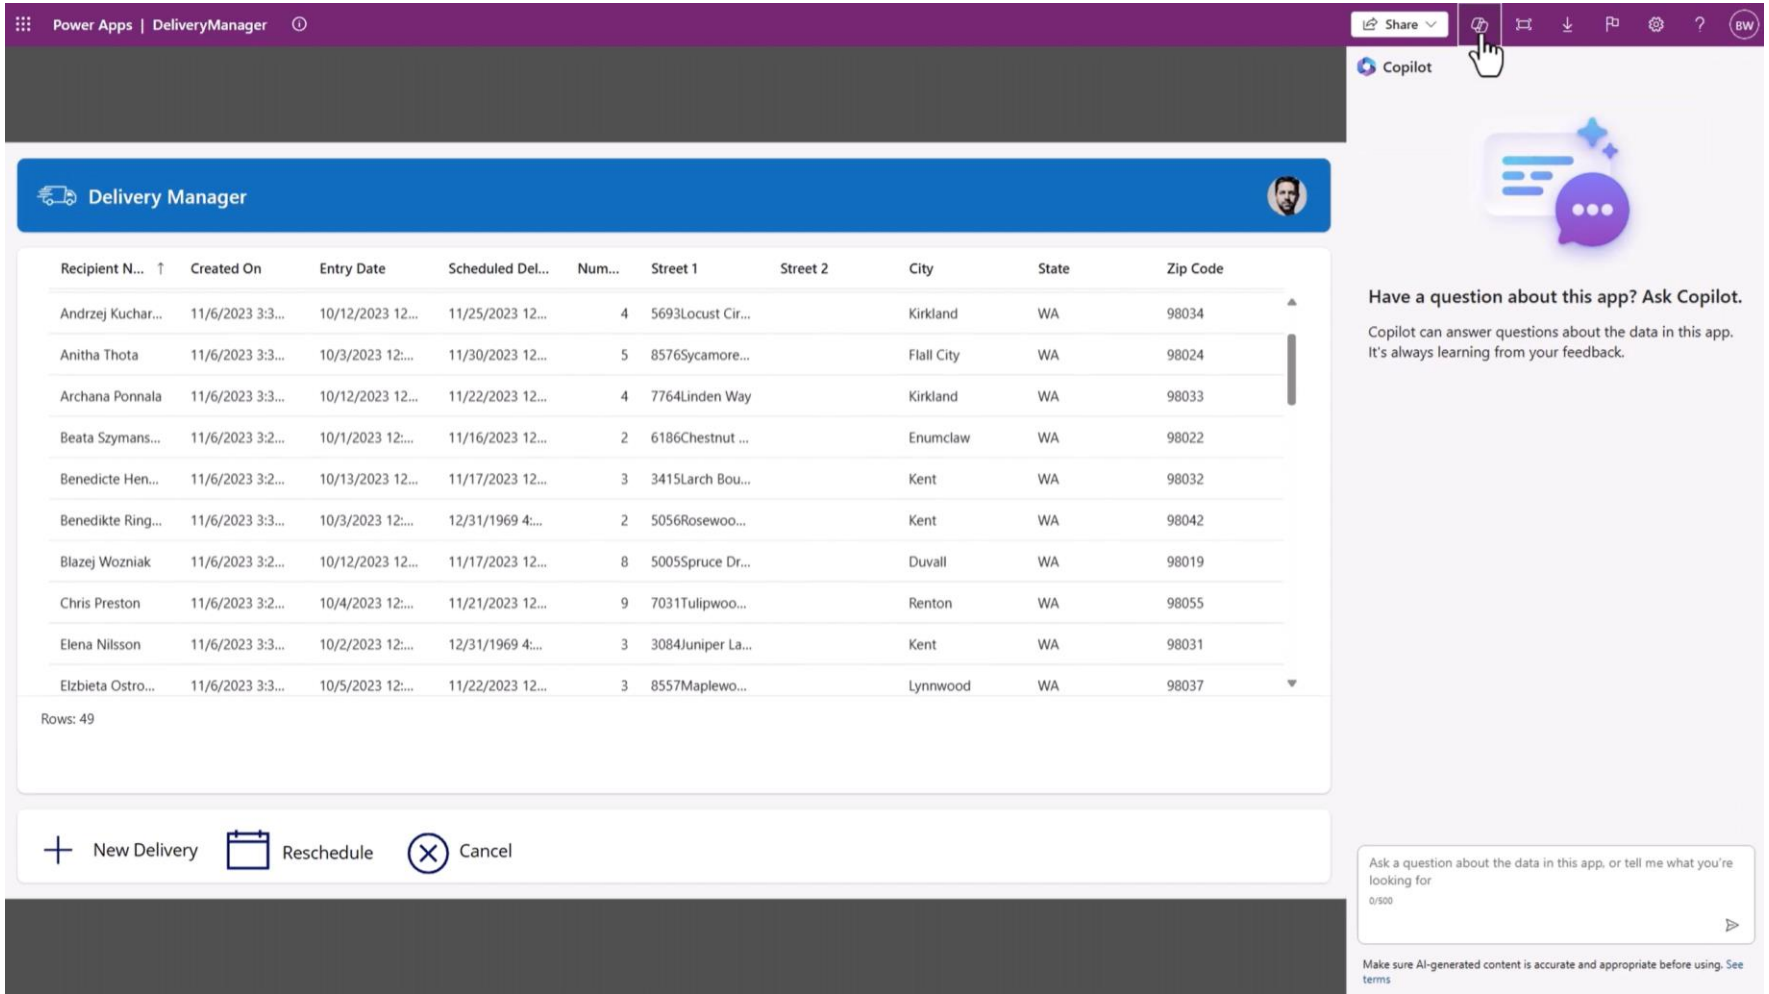

This feature will be in preview in the first half of 2024.

Jeder Power App ihren Copiloten

Every user of Microsoft Dataverse-backed canvas apps can **access Copilot and ask questions about their data** with a single click, without any action needed from makers.

This Copilot feature is entering a limited preview in December 2023 and will be in preview for all by the end of March 2024. It'll be available by default to all Dataverse-backed canvas apps, but makers stay in full control—they can disable this experience for their apps at any time.

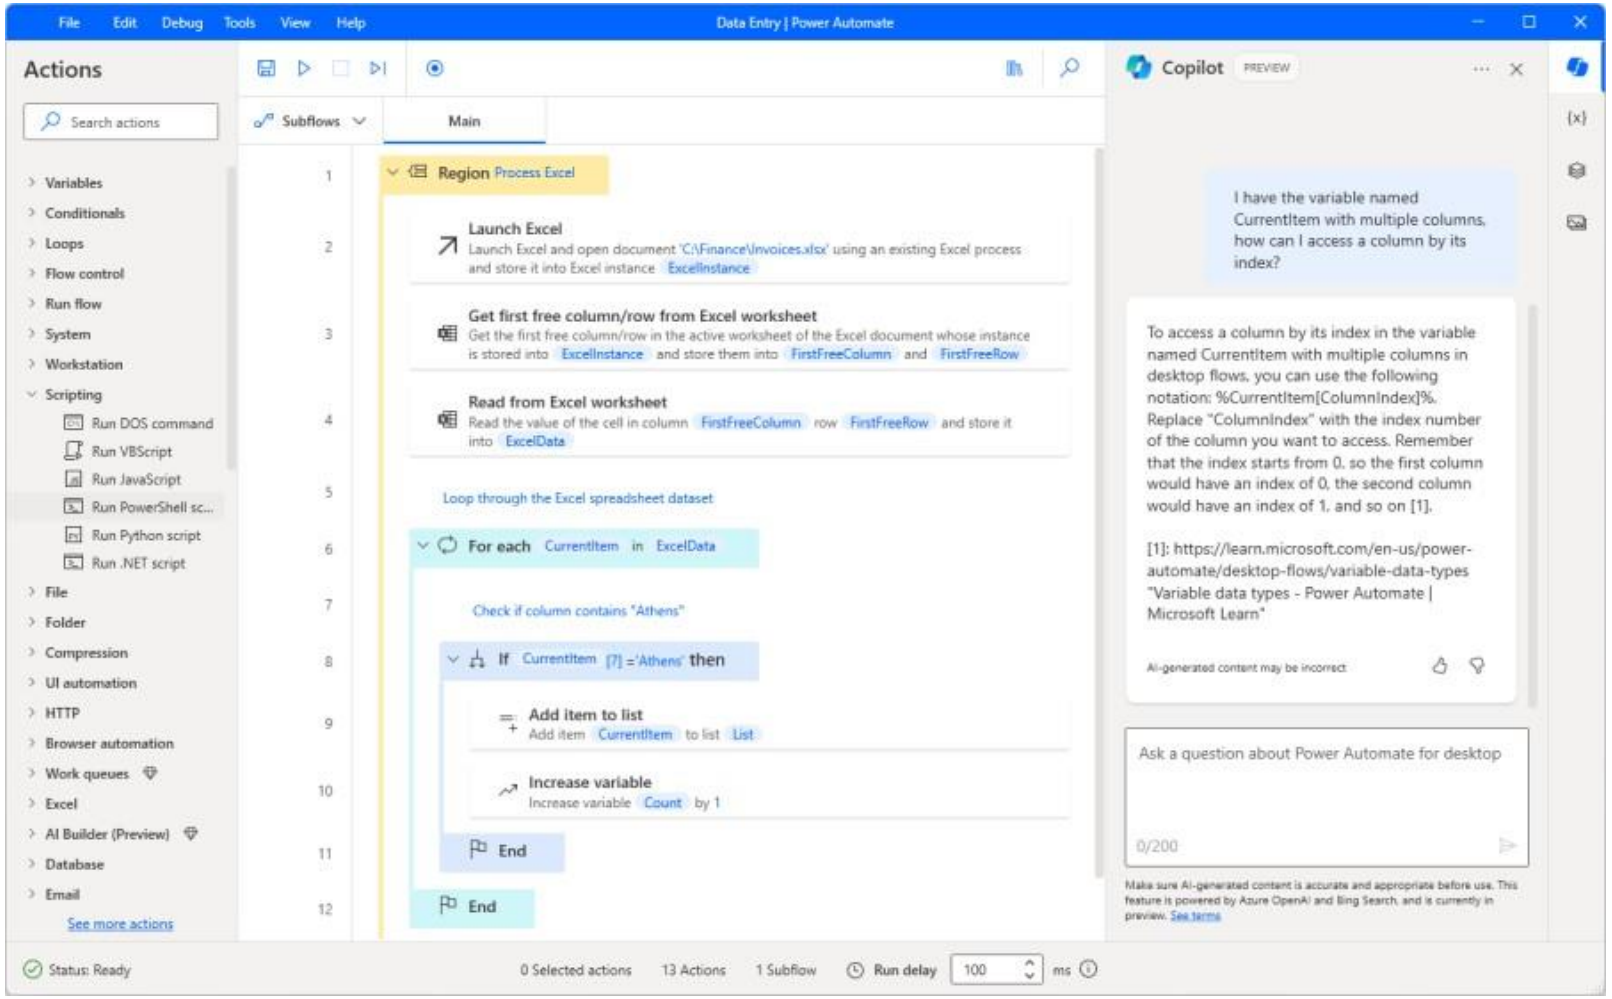

Power Automate Desktop bekommt einen Copilot

“How does the ‘get first free’ row and column in an Excel file action work?”

“How can I extract images from a PDF file?”

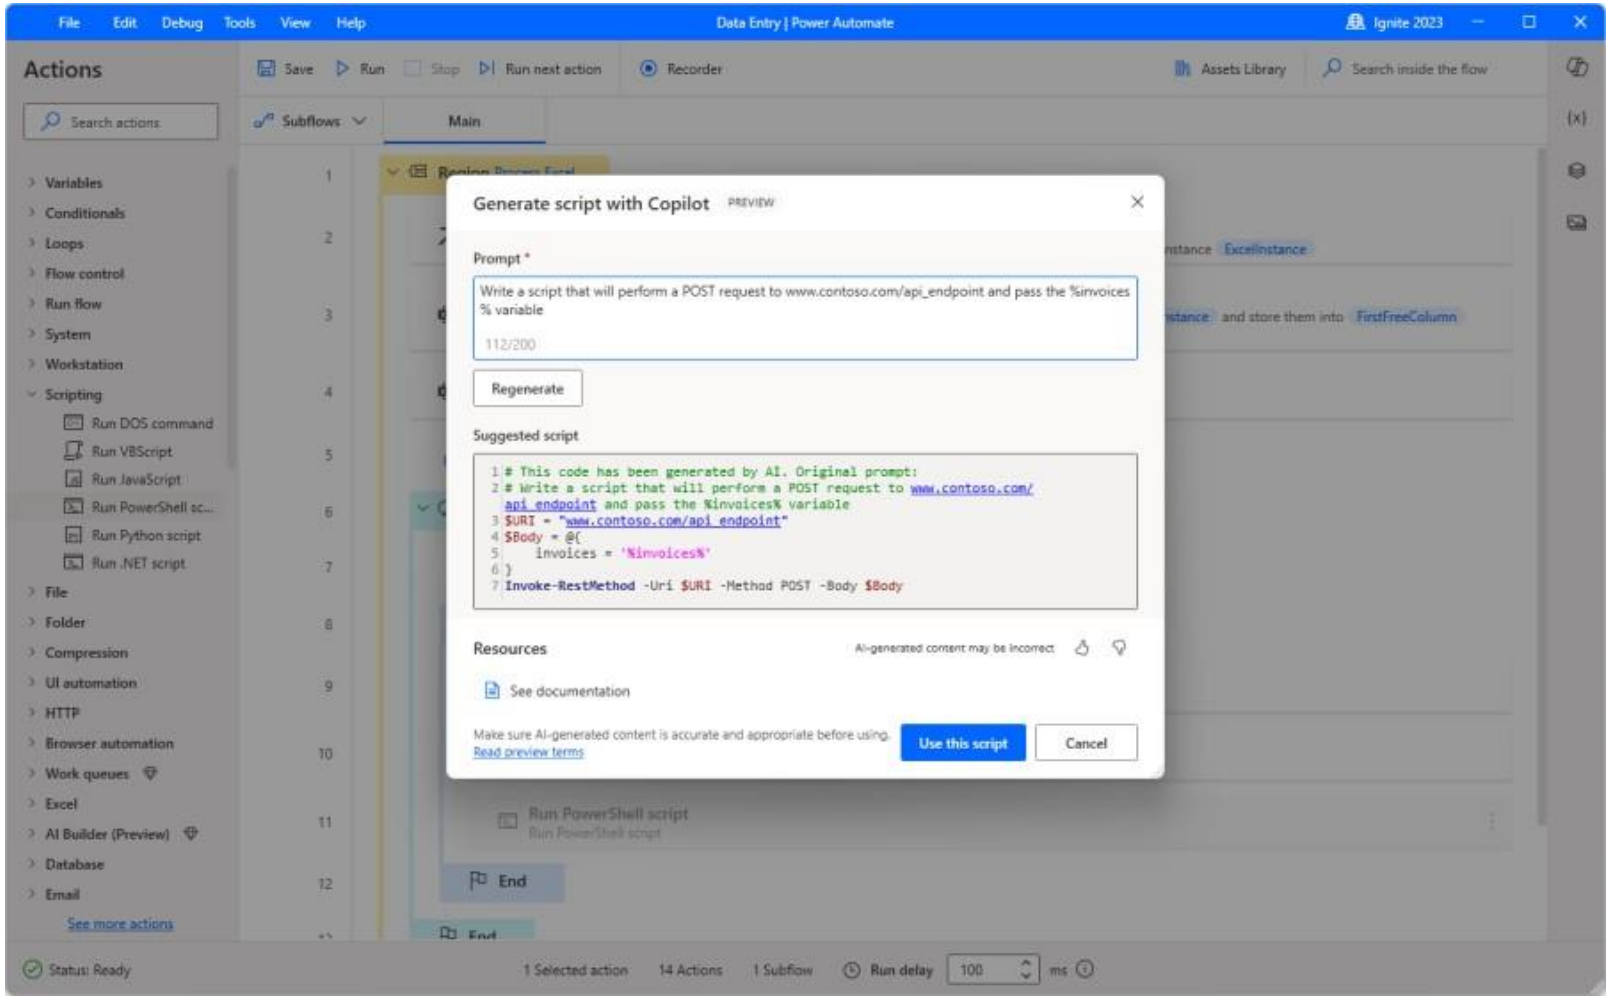

“How can I edit a web selector or create my own?”

“How can I run a PowerShell script?”

Ich spreche ca. 4 Sprachen, die sind nicht dabei

- **PowerShell**: “Write a script that will perform a POST request to www.contoso.com/api_endpoint and pass the %invoices% variable.”
- **VBScript**: “Write a script that will list the name of the local computer.”
- **Run DOS command**: “Write a command that will list all the folders in C drive.”
- **Run Python command**: “Write a script that will join two strings: String A = Foo and String B = Bar.”
- **Run JavaScript**: **“**Write a script that will return the product of number A number B.”

Microsoft Copilot for Sales

Introducing

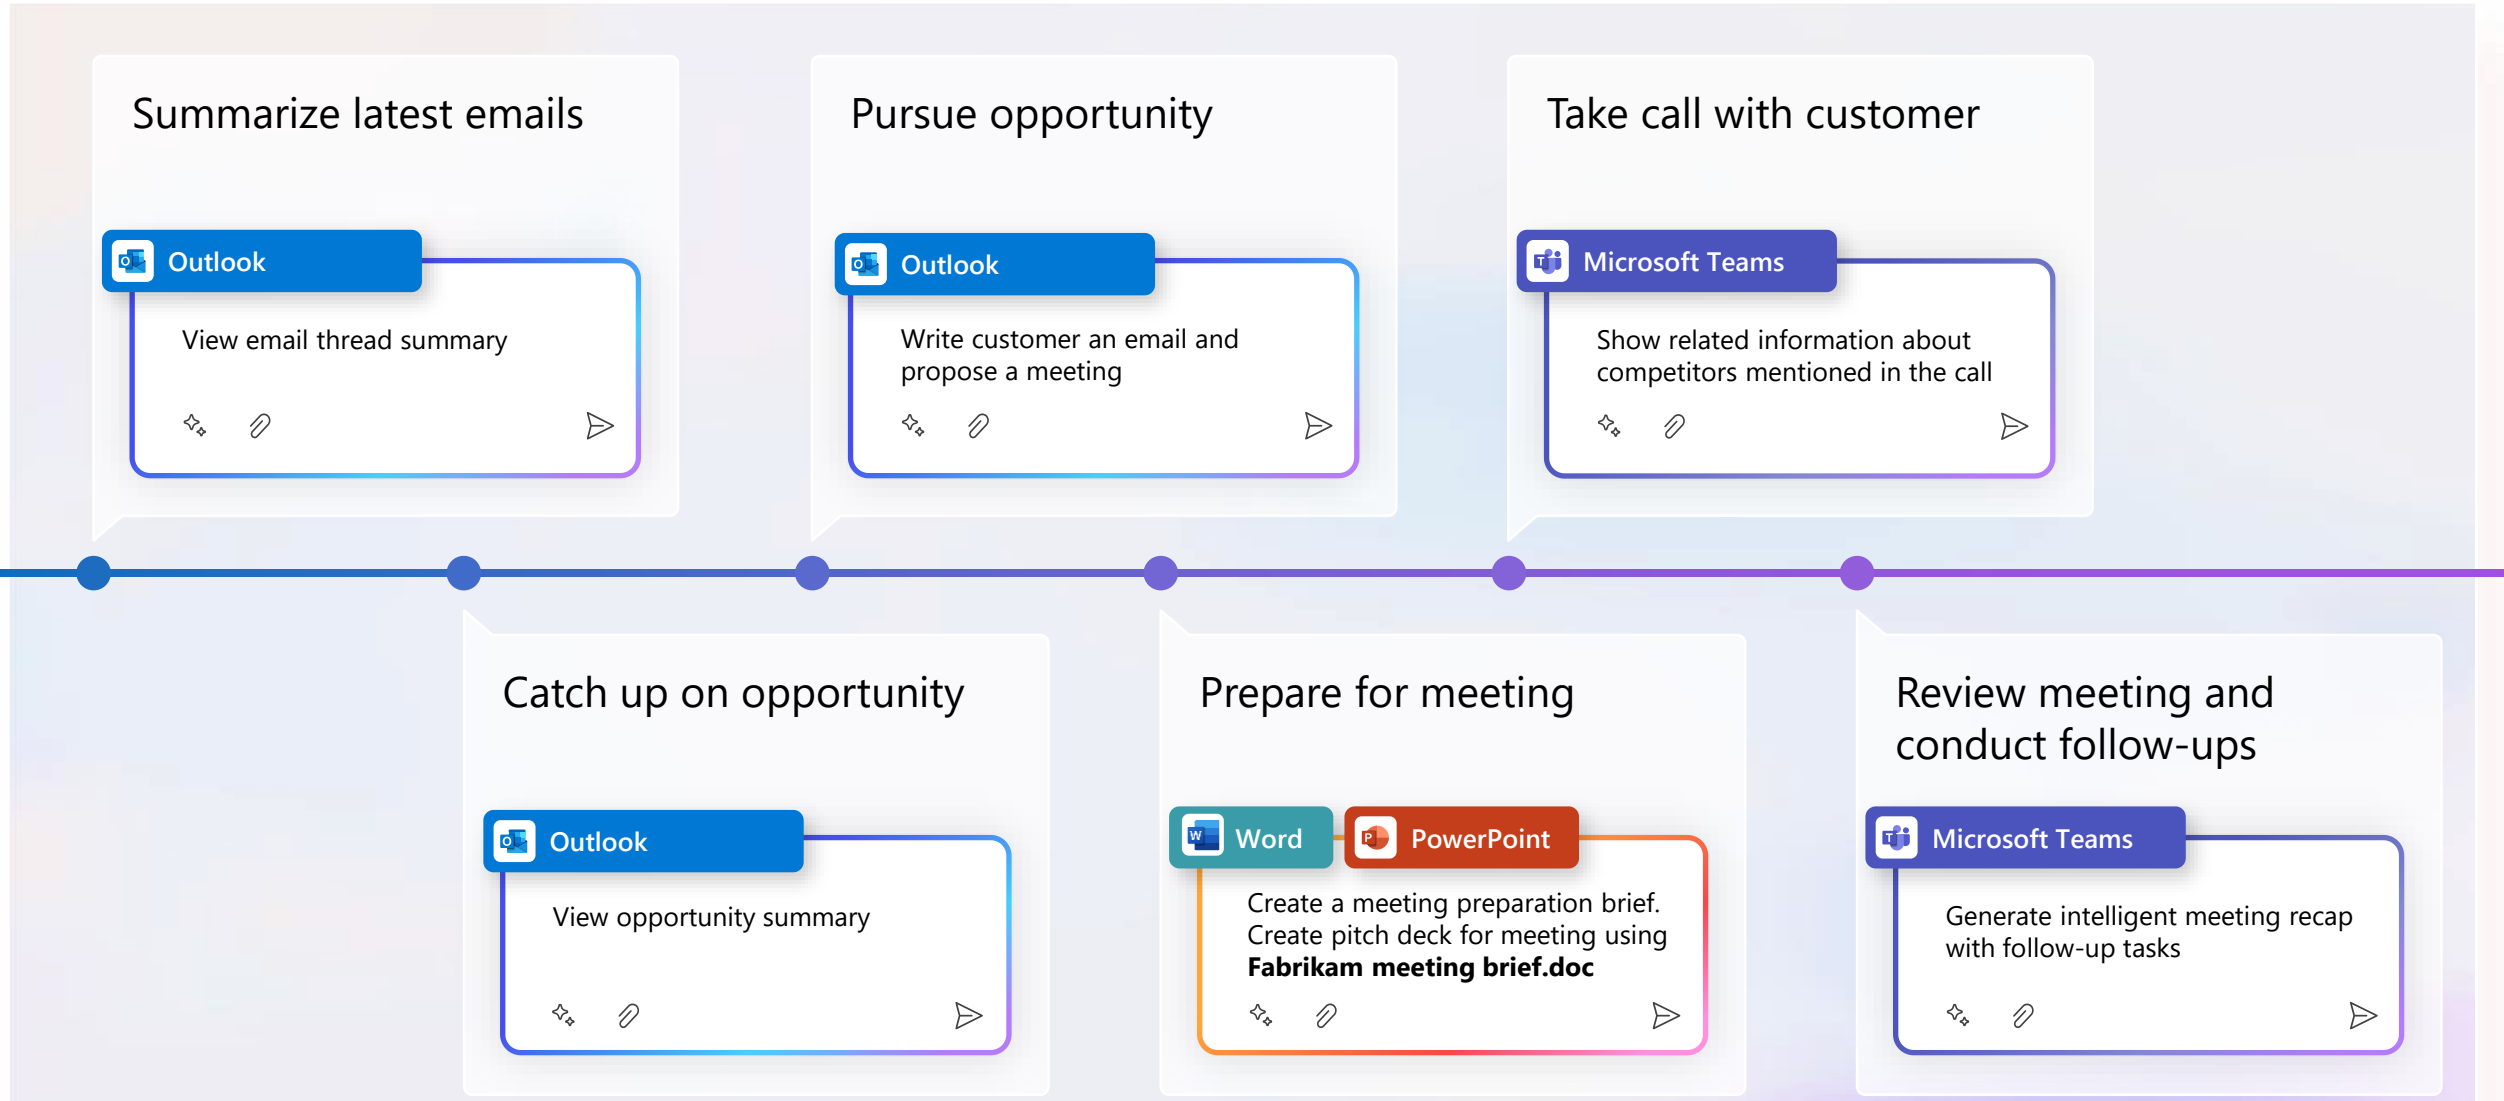

Microsoft Copilot for Sales

Your AI assistant for sellers

Copilot for Sales will be available in the first quarter of 2024 for USD50 per user per month.

A day in the life of a seller using Copilot for Sales

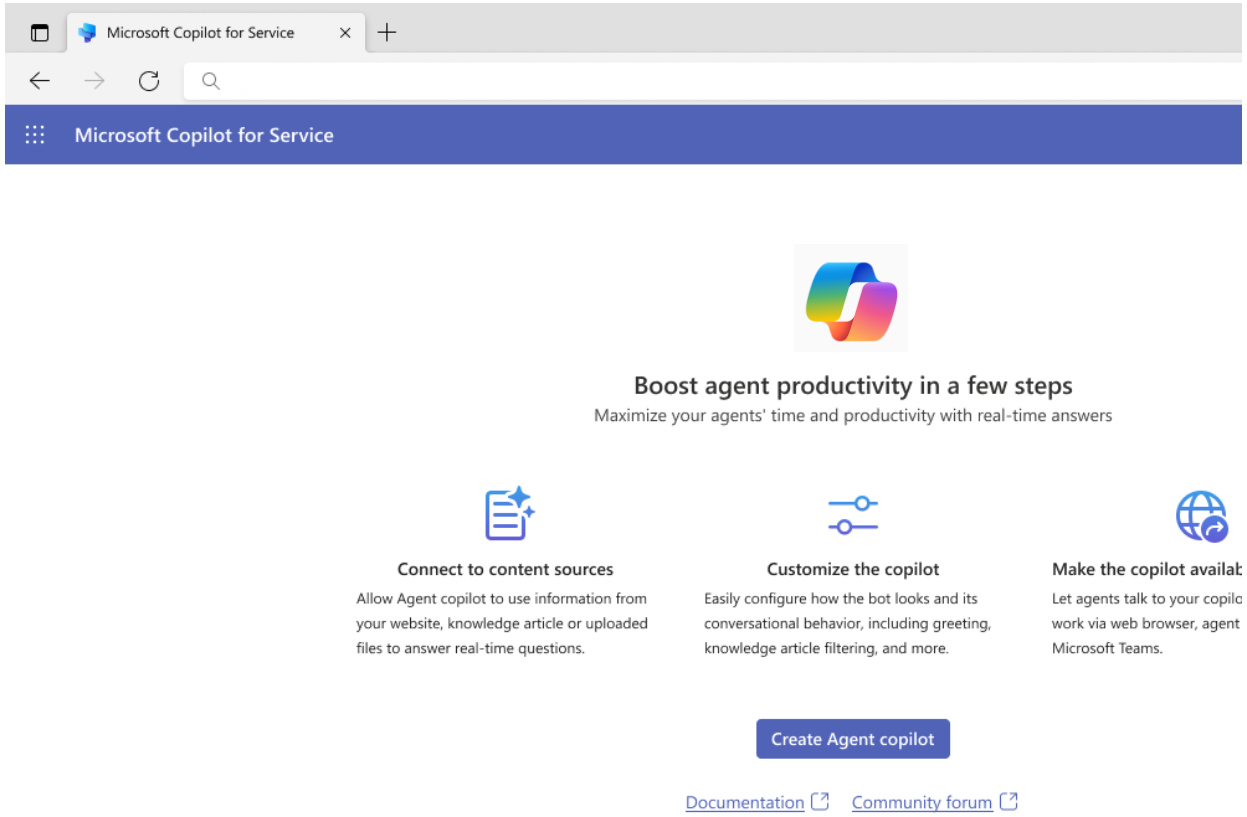

Microsoft Copilot for Service

Copilot for Service

Copilot for Service **modernizes existing service solutions** with generative AI to enhance customer experiences and boost agent productivity.

Copilot for Service integrates into existing contact center and CRM solutions without costly rip and replace efforts

Digital, meet Innovation

The DevEx difference.

Faster Time to Revenue

Grow revenue by improving DevEx.

- Shorter time to market
- Increased profitability

Source: Forrester, 2023

Improved Operational Efficiency

Drive business performance through increased:

- Productivity
- Efficiency
- Product quality

Source: Microsoft Research, DX, University of Victoria, 2023

Higher Talent Retention

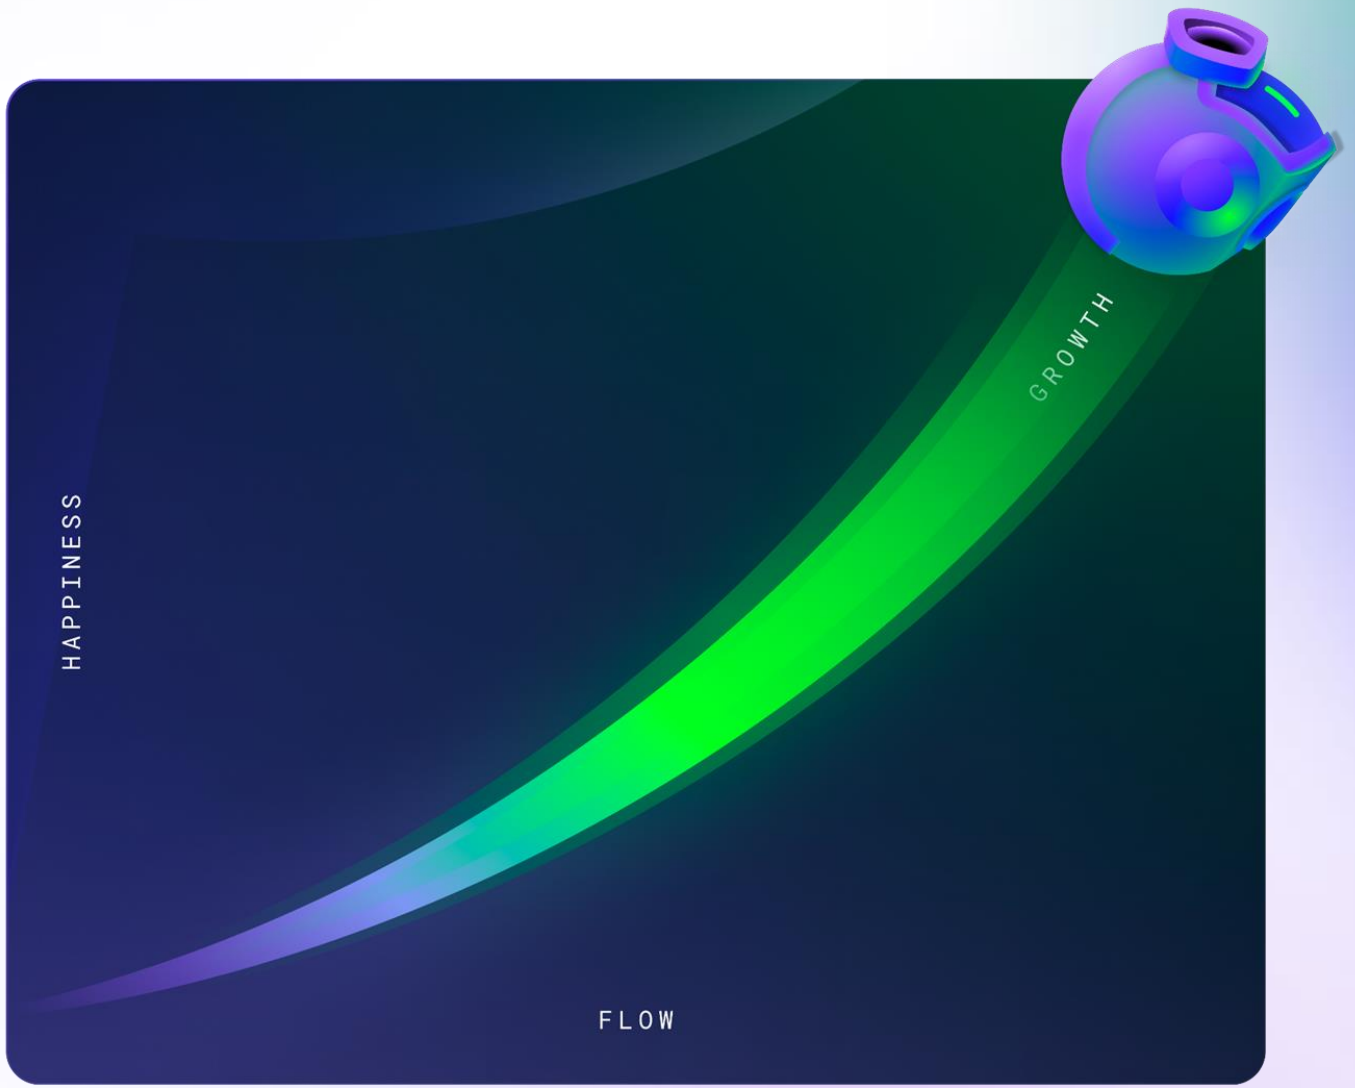

Attract and retain top engineering talent.

- High team morale
- Motivating and rewarding work

Source: Gartner, 2023

AI is the next frontier in DevEx.

A McKinsey study found that equipping developers to be their most productive also significantly improves the developer experience, and developers using generative AI–based tools were more than twice as likely to report overall happiness, fulfillment, and a state of flow.

Copilot Roadmap

Ubiquitous

Personalized

Conversational

Trusted

GitHub Copilot

Pillars for the vision

Ubiquitous across every tool developers use and integrated into every task that developers perform. Offering suggestions wherever you write and providing insights wherever you read. All with a radically-usable experience.

Conversational by default, so natural language can be used to achieve anything. Offering an informal and iterative interface that empowers developers to create more fluidly by thinking out loud and then reacting to emergent insights.

Personalized to the context and knowledge of the individual, project, team, organization, and community. Offering a "second brain" to developers, which understands your intent, history, and helps translate information into meaning (code, docs, etc.)

Safe, Trustworthy, and Reliable so our customers can take a bet not only on the technology and product but on GitHub as a partner and a contributor to responsible AI practices and goals.

GitHub Copilot / **Chat** PUBLIC BETA IDE

Improve code quality with contextual conversations.

- Context specific coding support
- Explains concepts and specific code blocks
- Debugging and vulnerability remediation assistance

GitHub Copilot Chat

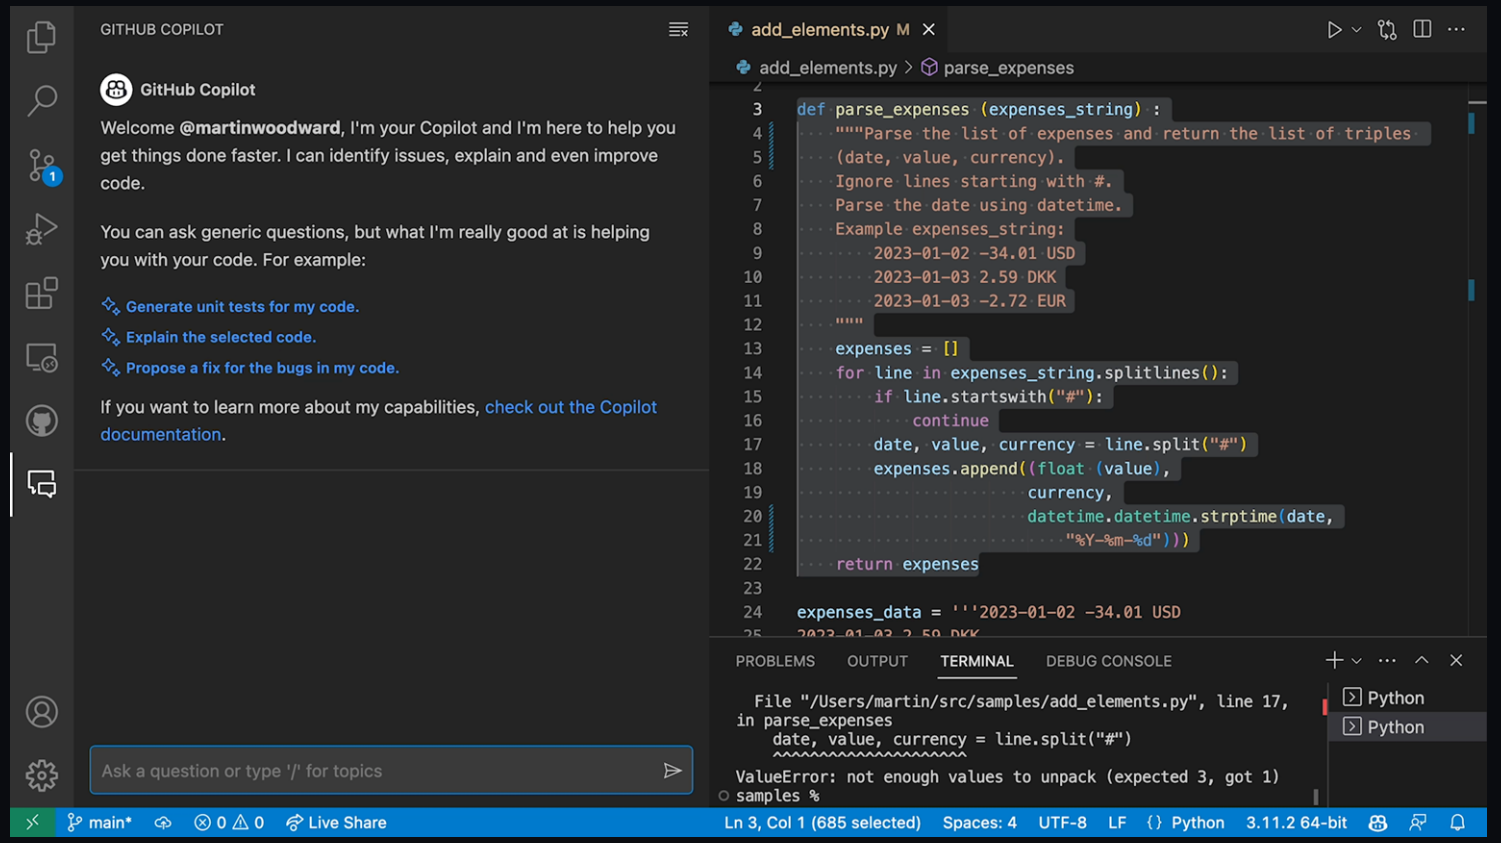

Chat experience in the IDE

ChatGPT-like experience in editor

- Generic questions
- Generate unit tests
- Explain the code
- Propose a fix for bug
- Make code robust / secure

Support VS Code and Visual Studio

Voice-to-code with GitHub Copilot Voice

GitHub Copilot / **CLI** PRIVATE BETA CLI

Enable developers to take command of the CLI.

- Git command assistance in the terminal
- Command and script explanations

GitHub Copilot for the CLI

the power of Copilot in the terminal

Suggest CLI commands in the terminal window

Three shell commands:

- ?? – General CLI
- git? – git specific CLI
- gh? – GitHub specific CLI

Revise & Execute

GitHub Copilot / **Pull Requests** PRIVATE BETA PLATFORM

Simplify collaboration by adding clarity to pull requests.

- Pull request summaries
- Automated code reviews
- Explanations on changes and comments

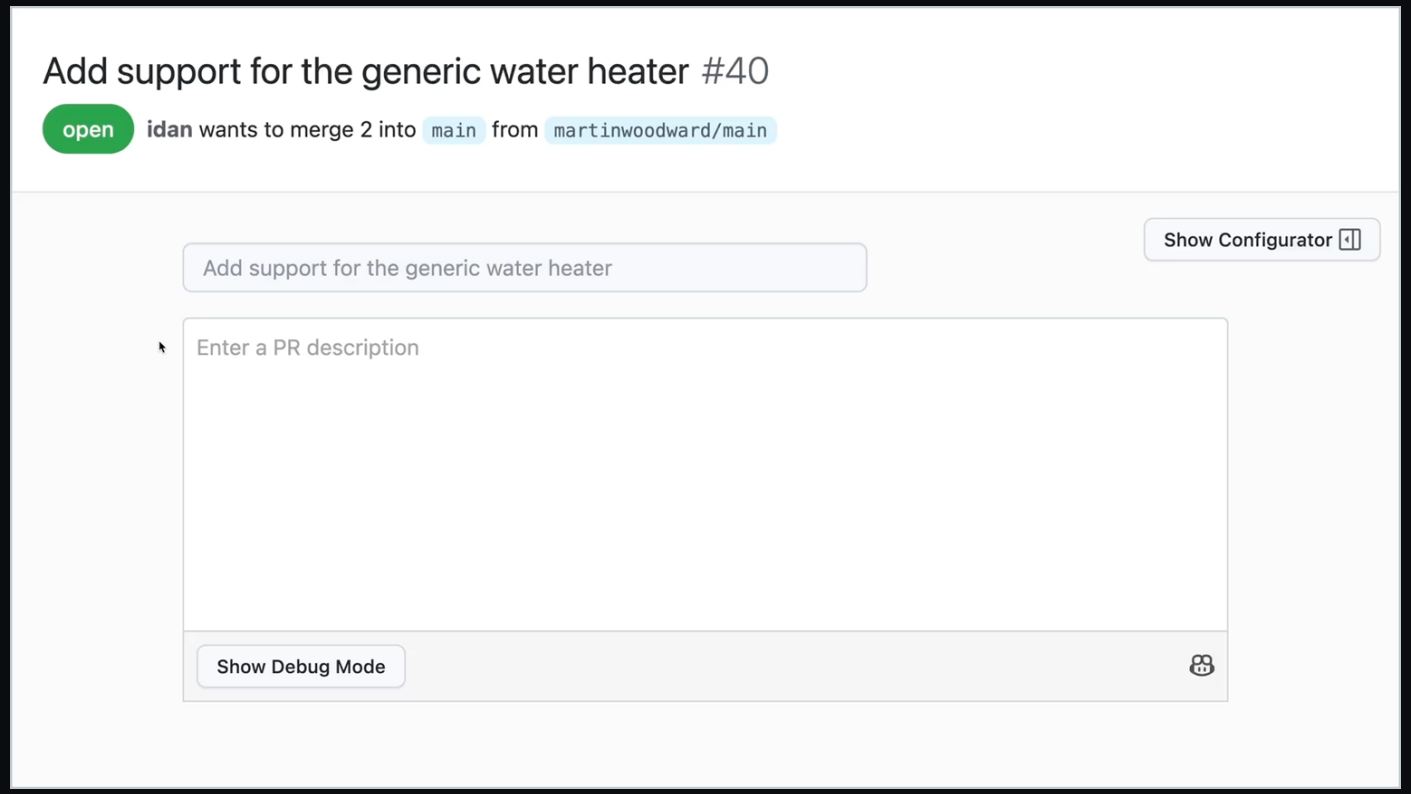

GitHub Copilot for Pull Requests

the future of AI-powered software development

AI powered tags in Pull Requests

Automatically suggest sentences and paragraphs as developers type based on PR code changes

Automatically warn and suggest tests where needed

GitHub Copilot / **Documentation** PRIVATE BETA PLATFORM

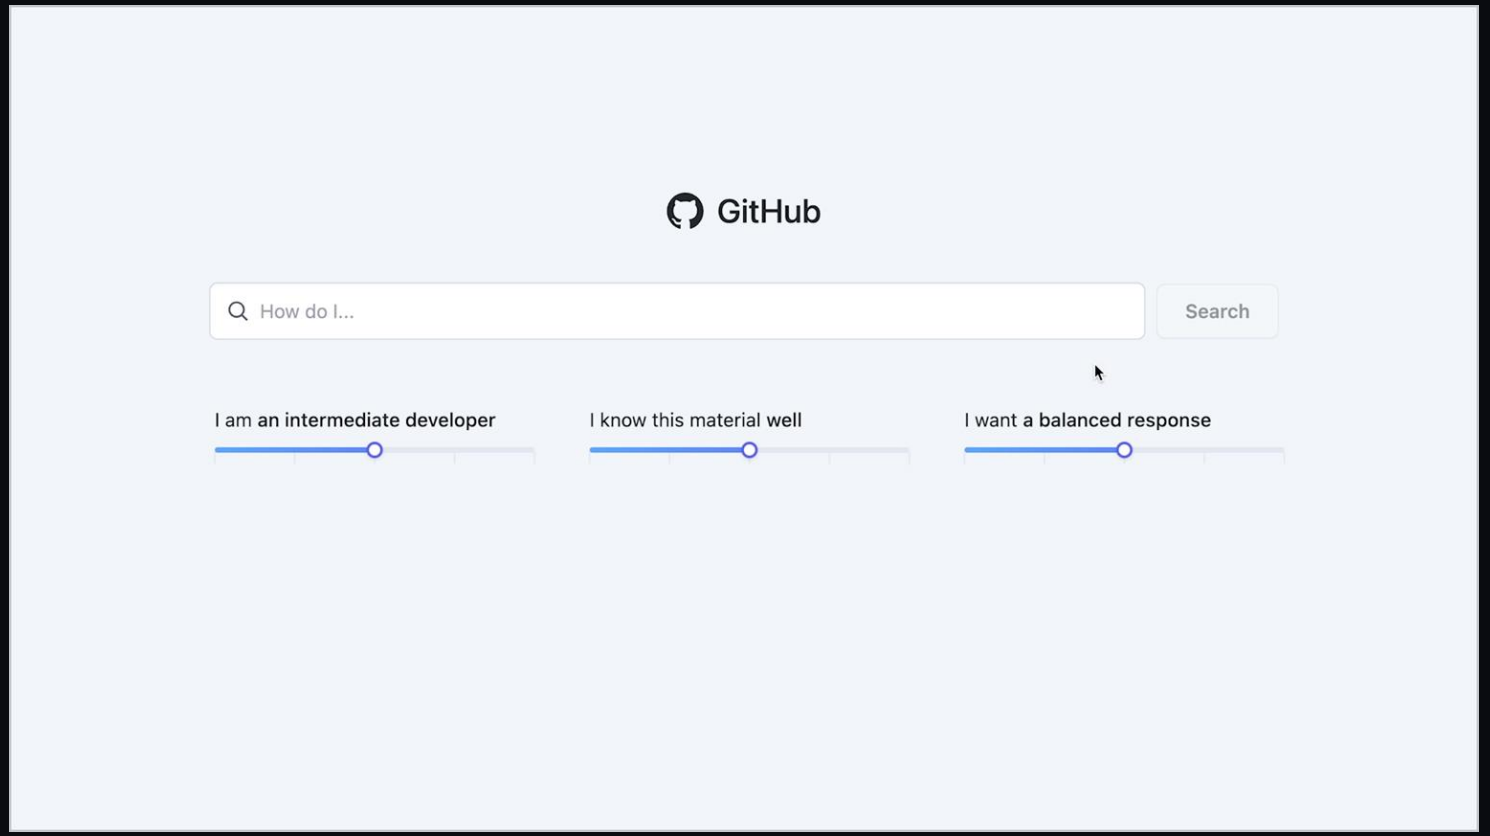

Search through documentation effortlessly.

- Conversational documentation search
- Customized to your documentation
- Summaries and references to sources

GitHub Copilot for Docs

the future of AI-powered software development

AI-generated responses to questions based on documentation

Starting with docs for:

- GitHub
- React
- Azure
- MDN
- In future, your in-house docs and codebases

GitHub Copilot / **Custom Private Models** ALPHA PLATFORM IDE

Fine tune responses with custom models.

- Draws context from your code and knowledge
- Fine tuning and custom private models

Safe, Trustworthy, and Reliable

Committed to creating responsible AI by design so you can trust in not only the technology and product but also GitHub as a partner.

- Privacy: Handling your data responsibly
- Security: Azure infrastructure and encryption
- Copyright: Respecting intellectual property rights

“

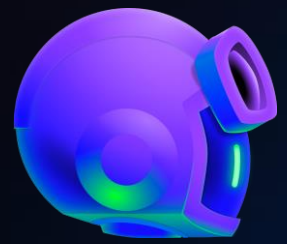

With GitHub Copilot, I think the possibilities for unlocking innovation are dramatic.

Microsoft

Changes to the Azure reservation exchange policy

Microsoft is ending exchanges for regions and instance series for Azure compute reservations.

Cost saving options for different compute usage

	 **Azure savings plan for compute** Most flexible savings for dynamic workloads while accommodating for planned or unplanned changes	 **Reserved Instances** Greatest cost savings for stable, predictable workloads with no planned changes
Savings compared to pay-as-you-go	Save up to 65%	Save up to 72%*
Commitment type	Spend a fixed hourly dollar amount on compute services collectively (e.g. Spend $5/hour on compute services for 1 year)	Usage of a specific virtual machine type in a particular Azure region (e.g. D2v4 virtual machine in Japan East for 1 year)
Savings apply	Across select services globally, up to the hourly commitment	Directly to the identified compute service in a particular region
Term	1 or 3 year	1 or 3 year
Payment options	Upfront or monthly	Upfront or monthly
Cancellation	No cancellations	Up to $50,000 USD
Savings Calculation	Based on pay-as-you-go price	Fixed price at the time of purchase

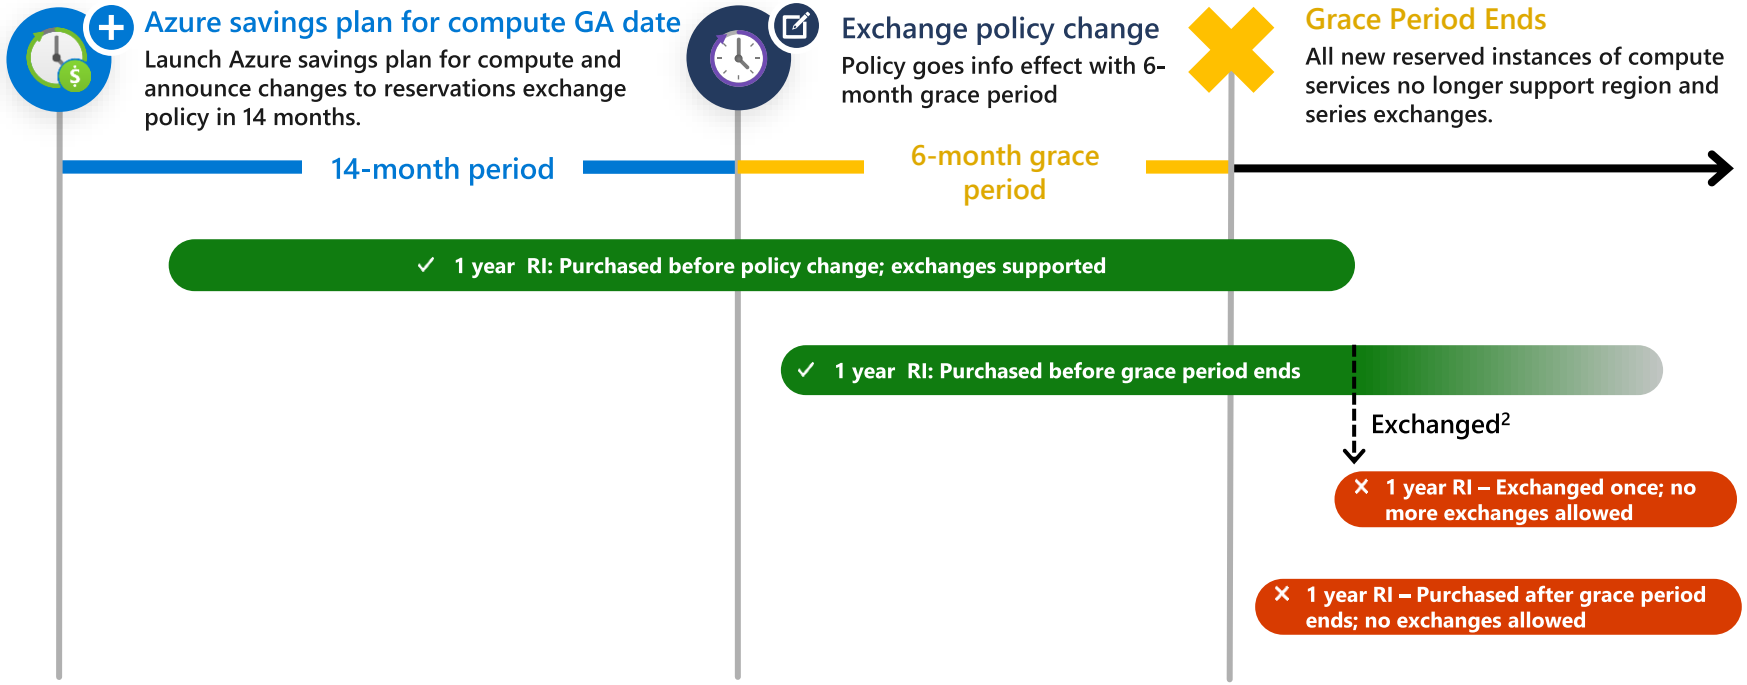

*The 72 percent saving is based on one M32ts Azure VM for SUSE Linux Enterprise + 24x7 Support OS in the West US 2 region running for 36 months at a pay-as-you-go rate of ~$1,976.11/month; reduced rate for a 3-year reserved instance of ~$552.85/month. Azure pricing as of February 22, 2022. Prices subject to change. Actual savings may vary based on location, instance type, or usage.

Changes to Reserved Instances of compute services policy

Reserved Instances of compute services[1] purchased on or after January 1, 2024, will no longer be eligible for exchanges for instance series or regions.

Update: Policy's start date remains January 1, 2024 but customers have a grace period that allows Azure compute reservation exchanges until at least July 1, 2024.

Compute reservations purchased prior to the end of the grace period will reserve the right to exchange one more time after the grace period ends.

Customer may trade in eligible[3] reserved instances for an **Azure savings plan for compute**.

[1]VM, Dedicated Host, and App Service reserved instances.

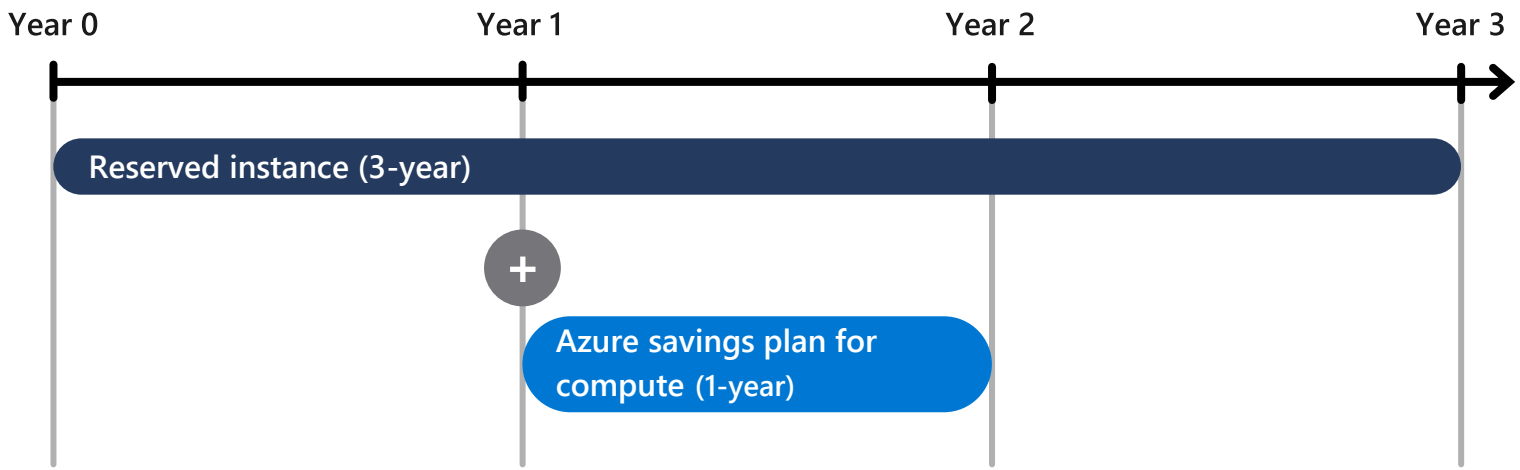

[2]Exchanges are systematically processed as a cancel and repurchase. Therefore, all exchanges after the policy effective date are treated as new purchases and will no longer support exchanges.

[3]VM, Dedicated Host, and App Service reserved instances.

Customers may have both Azure savings plan for compute and Reserved Instances

We automatically maximize customer benefit and savings across eligible usage each hour

- When usage can be covered by either Reserved Instances or Azure savings plans for compute, reserved instances are used first, as they provide greater savings and have a more targeted scope
- Azure savings plan for compute will apply to the remaining eligible usage until the commitment is fully consumed
- Once a Reserved Instance or Azure saving plan for compute is fully consumed or expired, you will then be billed on a pay-as-you-go basis

Each term is unique and based on date of purchase

New Options for Extended Security Updates

Best AI option per scenario

	ChatGPT	Bing Chat	Bing Chat Enterprise	Microsoft 365 Copilot	Azure OpenAI
	Consumer	Consumer	Work	Work, SaaS	Work, PaaS
My employees should be able to use a chatbot to copy corp information into a chat session to enrich the content with GPT service and be GDPR conform			✓		
Integration into flow of work improving general productivity (Meeting summaries, E-Mail drafting, Improving Word document, Excel data analytics, PowerPoint creation)				✓	
Searching/Exploring enterprise knowledge with respecting permissions				✓	
Extend organization data/knowledge base with external data sources (graph connectors)				✓	
Custom scenario/use case with specific data source for specific group of users. Example: Solution for an agent connected to a specific knowledge base (tickets, tech. documentation, ...) to find the best answer.					✓
Transfer unstructured data into structured schema (questionnaires, comments in social networks, free text in invoices)					✓
Integration into custom apps. Example: Retail Loyalty app allows user to create a recipe from my shopping list					✓
Master-data quality improvement Example: Cleaning up redundant address fields, phone numbers ...					✓

Microsoft Viva: the employee experience platform

Standard Viva Capabilities in M365

Viva Connections | Viva Engage | Viva Learning | Viva Insights

Base Functionality

Create a front door for the organisation through Microsoft Teams

Create and connect communities and storylines

Provide colleagues with access to learning materials that you curate in SharePoint

Personal Analytics

Premium Viva Capabilities in Viva Suite

Viva Learning* | Viva Insights* | Viva Topics | Viva Goals

Extra Modules and Enhanced Functionality

Connect with third party learning system

Enhanced Personal Analytics
Enhanced Manager and Organisation Insights

Intelligent Knowledge Management and Information Surfacing services

Objectives and Key Results Technology

Viva Amplify | Viva Pulse | Viva Engage*

+ Answers in Viva + People in Viva

Upcoming Modules and Enhanced Functionality

Communications management hub for publishing and tracking communications

Provide teams with ability to survey wellbeing, project success, business change and more.

Develop leadership connection, create engaging campaigns and utilise organisation knowledge

Viva Add On

GLINT

Glint

Employee Voice

Organisation wide surveys

Integration into Viva Insights and in the future broader Viva Suite

** Enhanced Functionality*

Microsoft Viva

Viva Pulse

Introducing Viva Pulse

In Microsoft Viva

Microsoft Viva

Get confidential feedback on your team's and colleagues' experiences

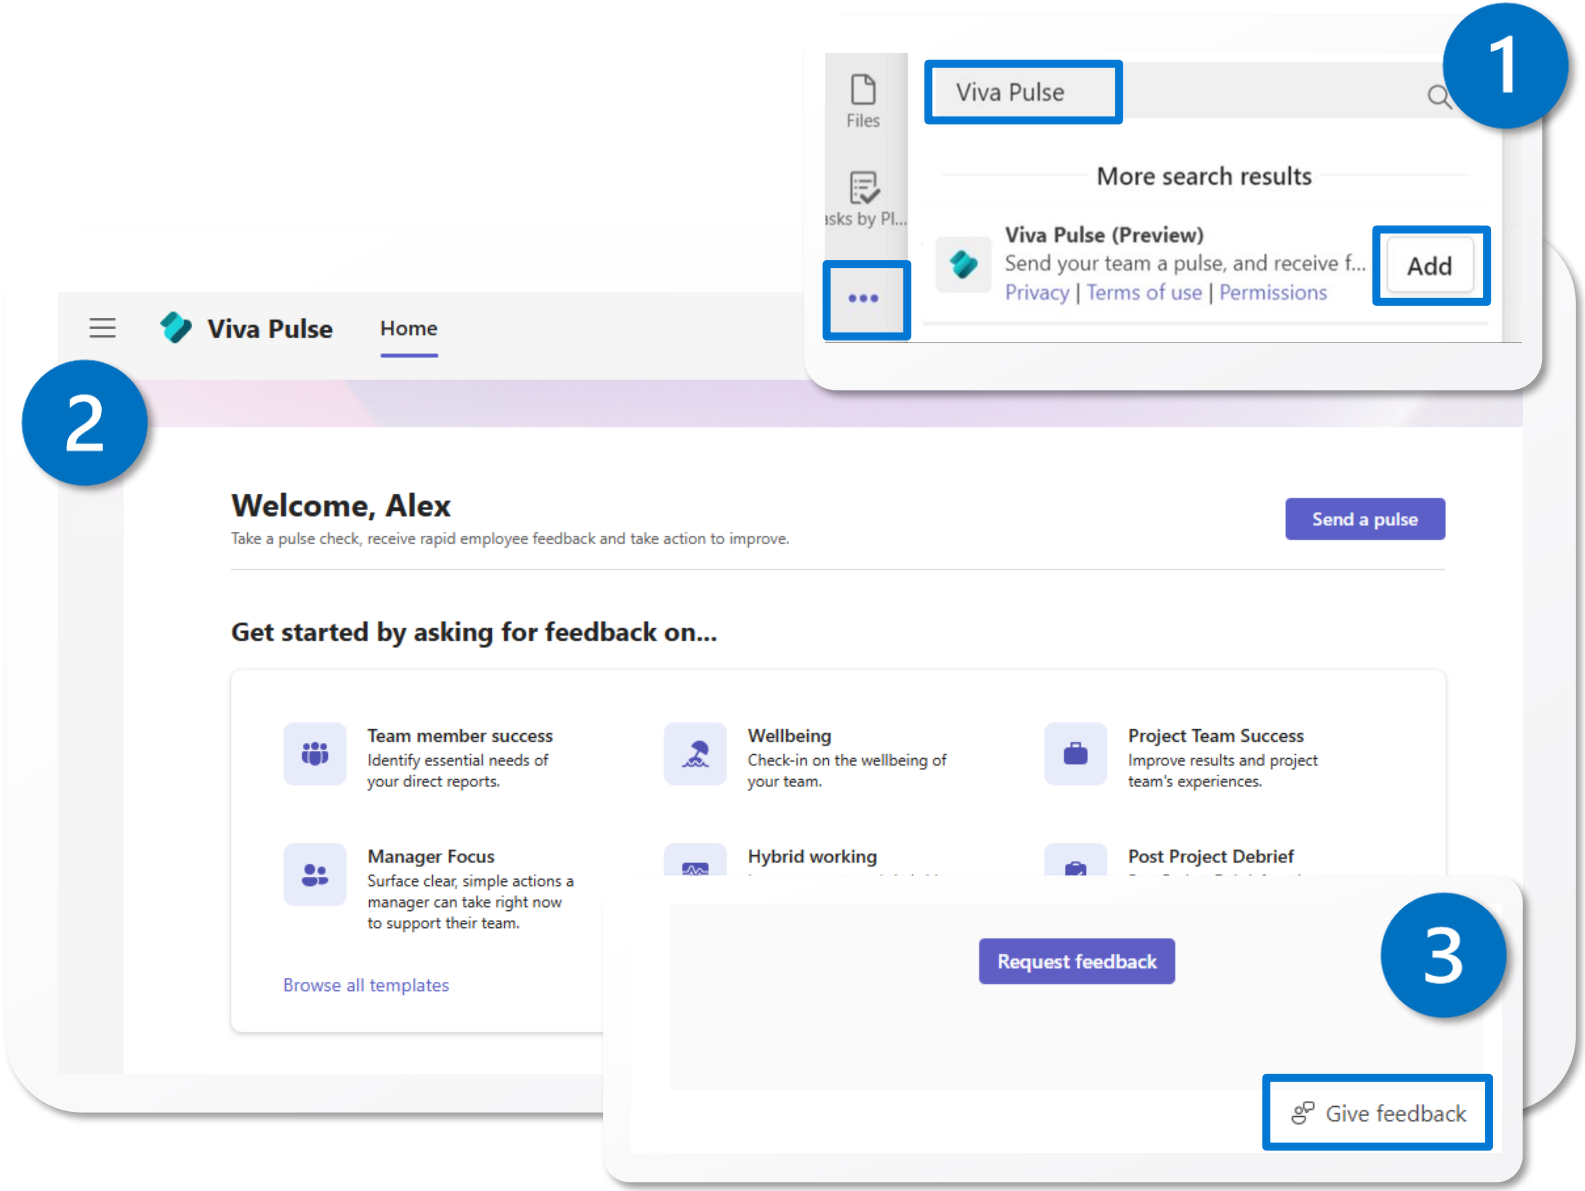

With Microsoft Viva Pulse managers and project leads can quickly and regularly get a pulse on their team's and colleagues' experiences through predefined survey templates and analytics.

Open Viva Pulse and explore

1. In Microsoft Teams, select the **More** icon to find and install the **Viva Pulse** app. Or go to: https://aka.ms/GetVivaPulseApp
2. Open **Viva Pulse (Preview)** and explore!
3. **Give feedback**. We value your perspective. To give feedback, scroll to the bottom, then select **Give feedback**.

Learn more

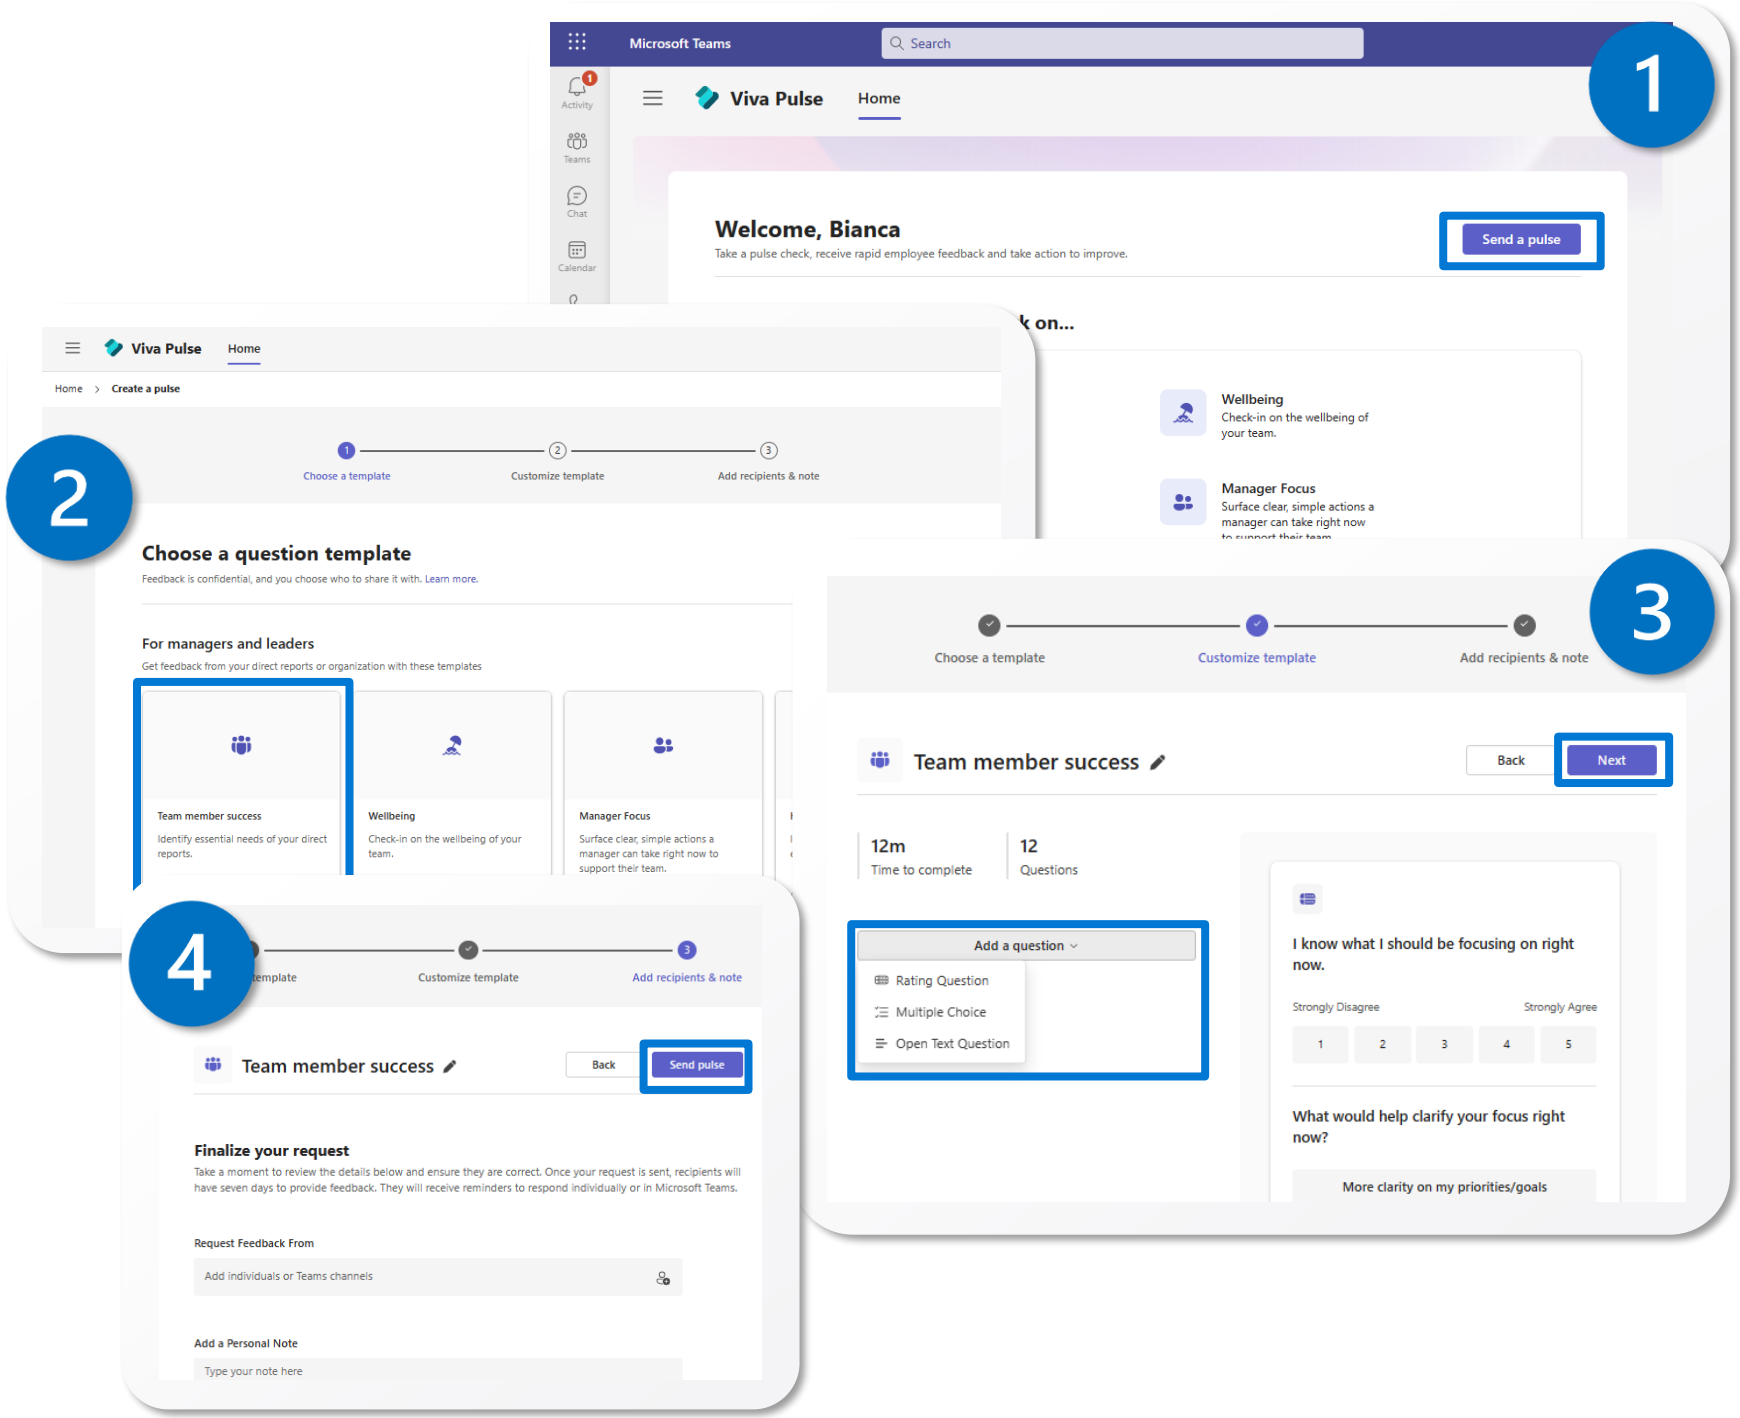

Viva Pulse overview:
https://aka.ms/VivaPulseVideoOverview

Send a Pulse

Get a pulse on your team or project team members experiences.

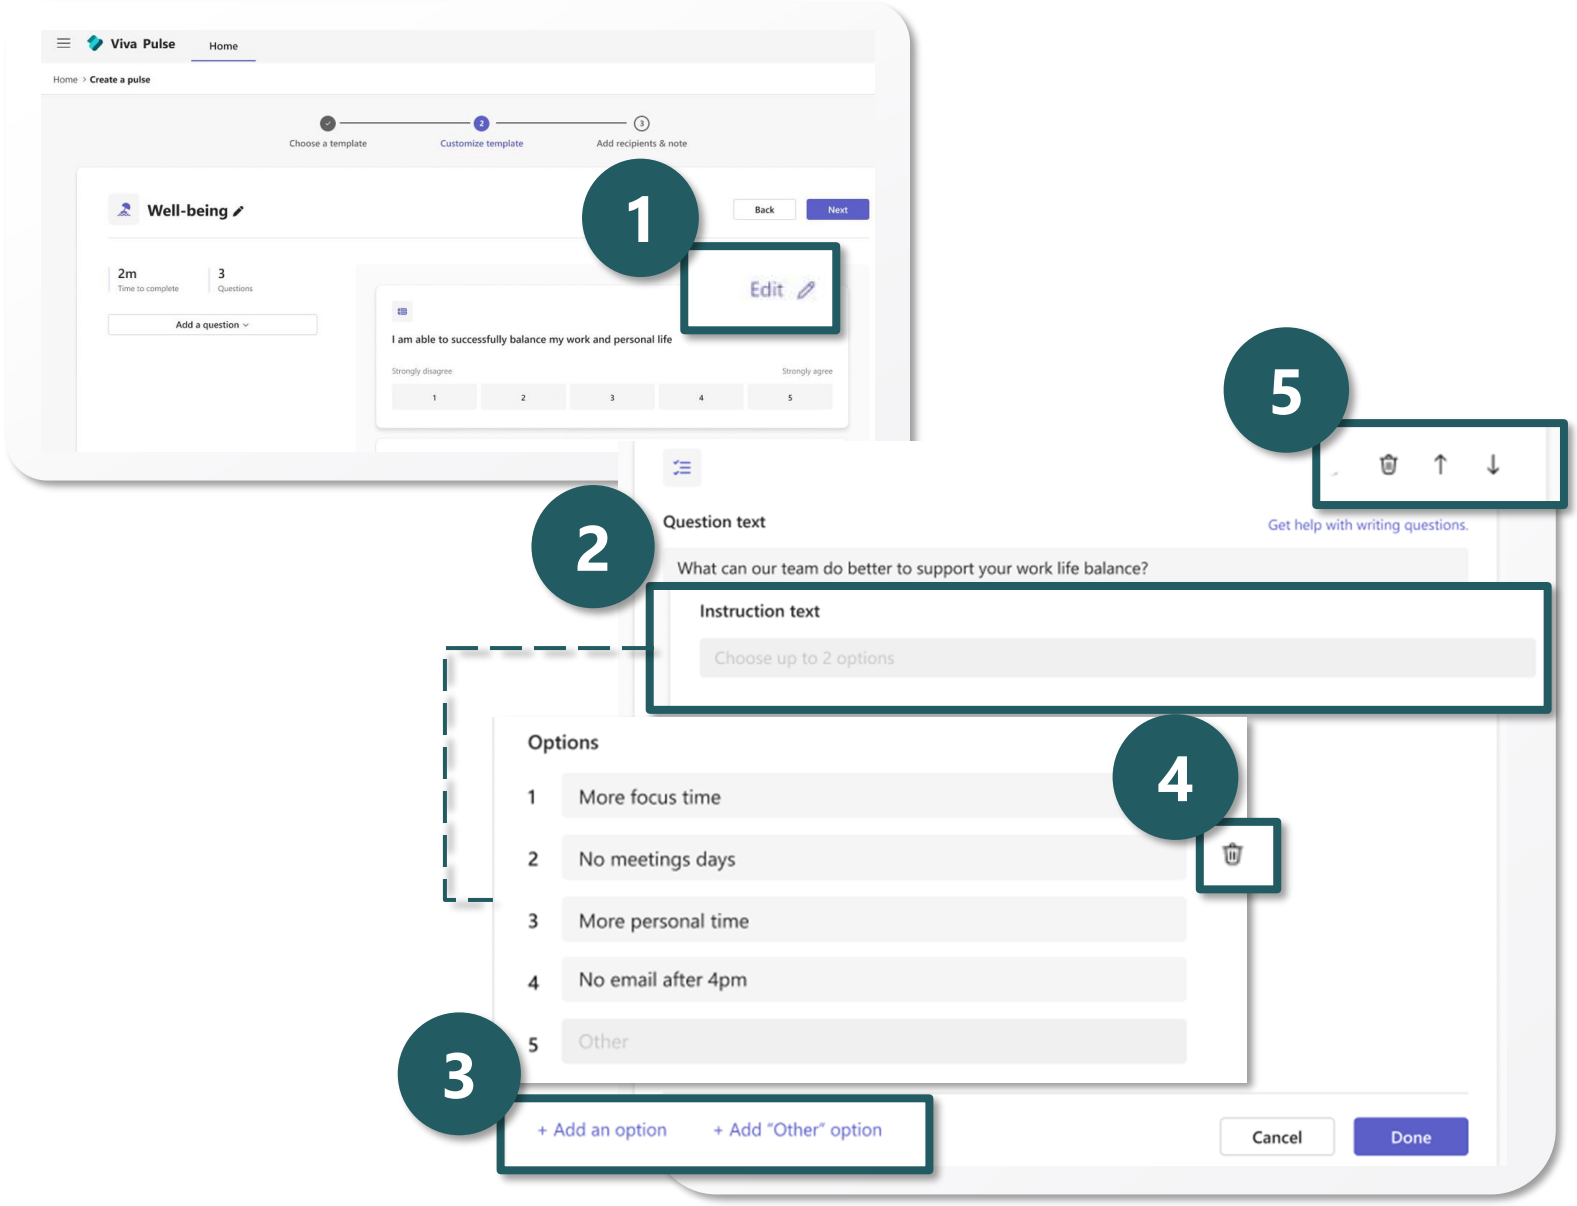

1. Open Viva Pulse in Teams. At the right, select **Send a Pulse**. Then select **Get started**.
2. Select a survey template from a list of either manager or project lead templates.
3. In the Customize template screen, you can add your custom questions to the survey. Then select **Next**.
4. Choose who to send the survey to, add an introduction note, and select **Send pulse**.

Edit template questions

Quickly customize powerful research-backed surveys

1. Open any Viva Pulse template, locate the question you'd like to customize and select the **Edit link**. In Edit mode, discover the ability to add and edit follow-up questions using the same principles.
2. Tap into the text boxes to **modify prefilled text**.
3. Select **+ Add an option** to enter additional option(s).
4. Use the **trashcan or arrow icons** to delete or rearrange the options.
5. Delete an entire question by selecting the **trashcan icon**. Rearrange the order of questions by selecting the **arrow icons**.

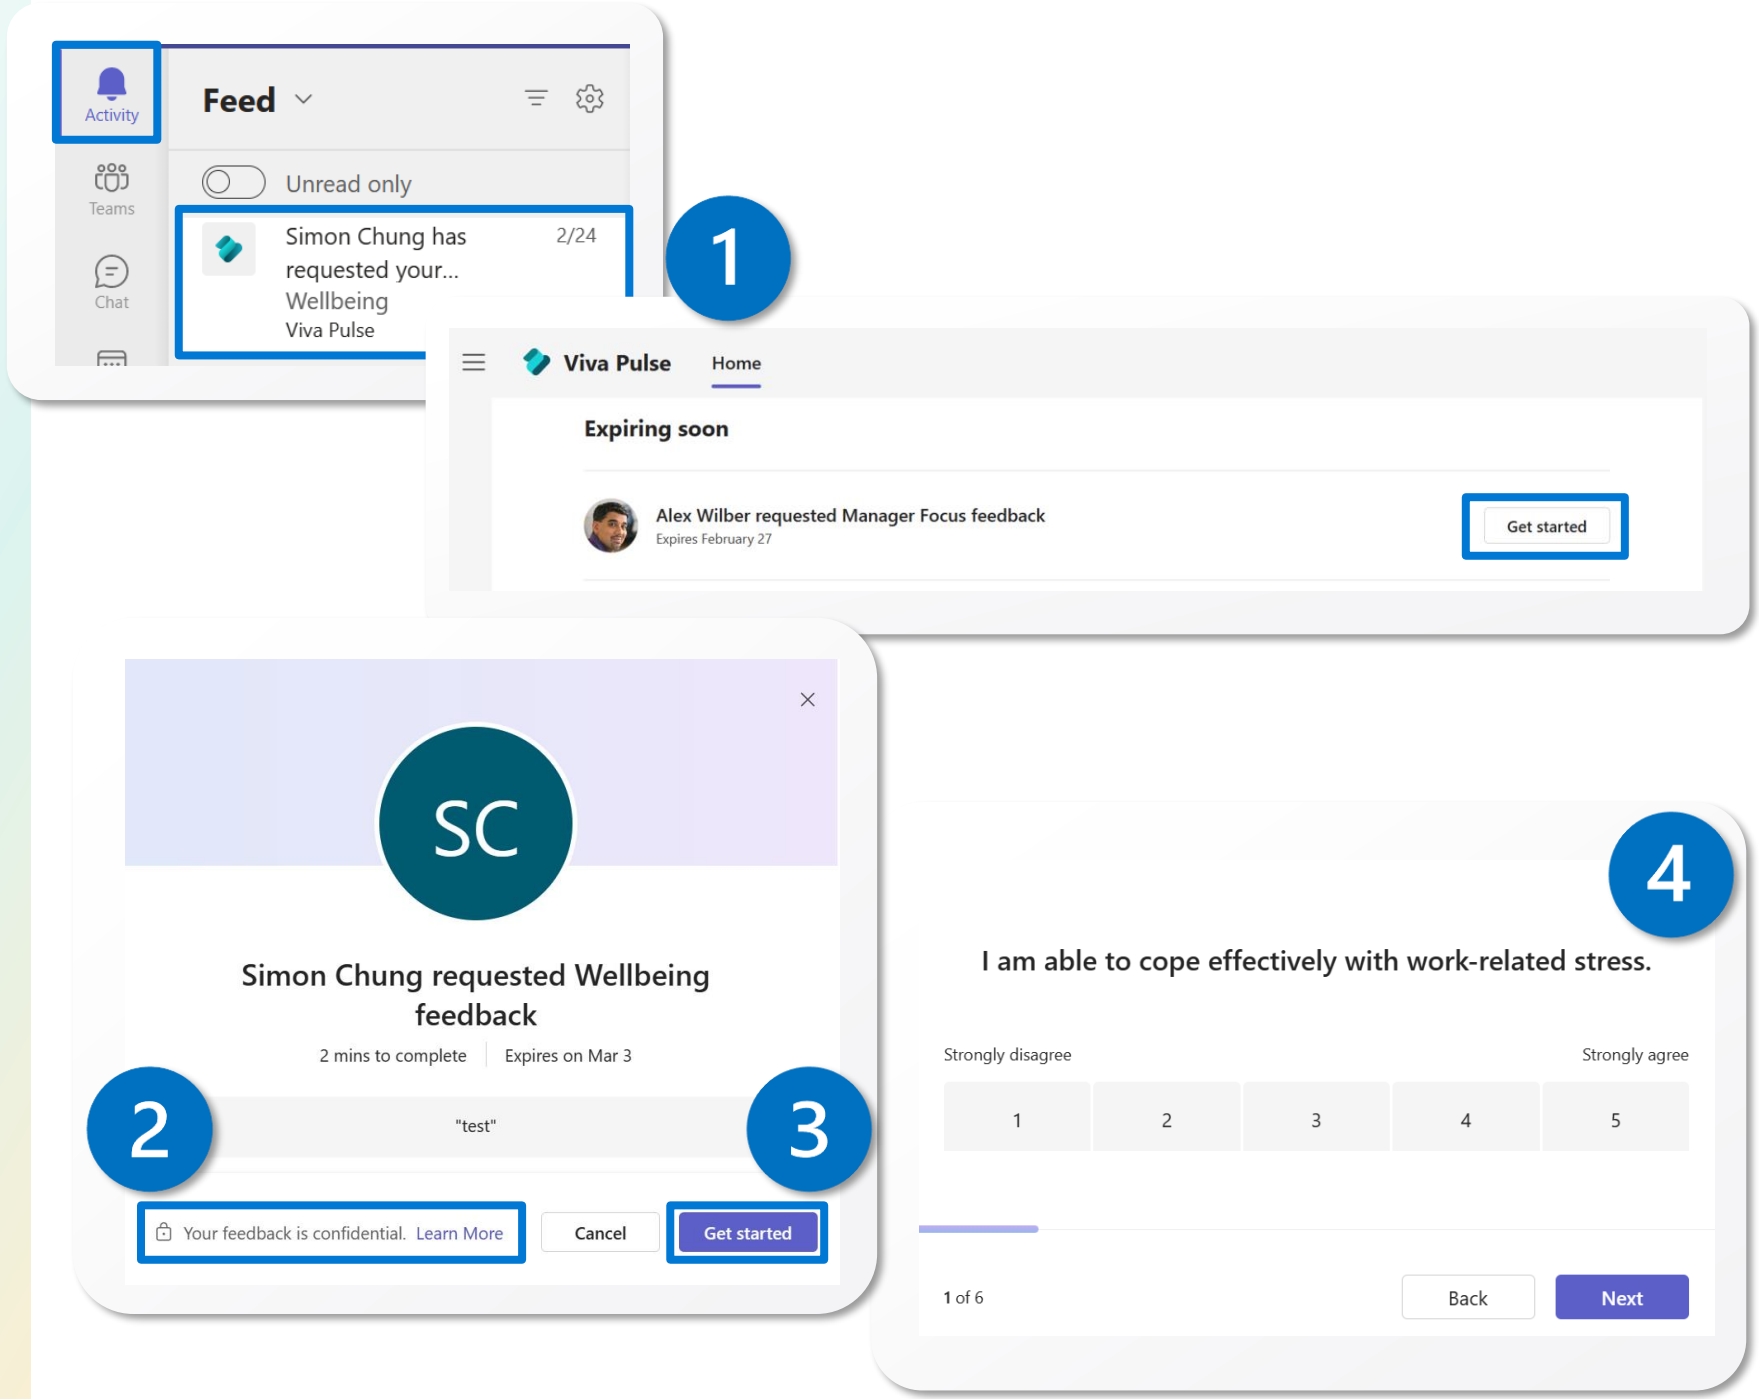

Respond to a Pulse

Get notified and respond confidentially to Pulse surveys in Teams.

When you're invited to respond to a Viva Pulse survey:

1. You receive notification in your **Teams Activity** feed. You can also find survey requests in the Pulse app. Select the notification.
2. In the feedback request window, select **Learn more** to learn how your feedback is kept confidential.
3. Select **Get started**.
4. In the popup survey, respond to the questions. Your responses are confidential.

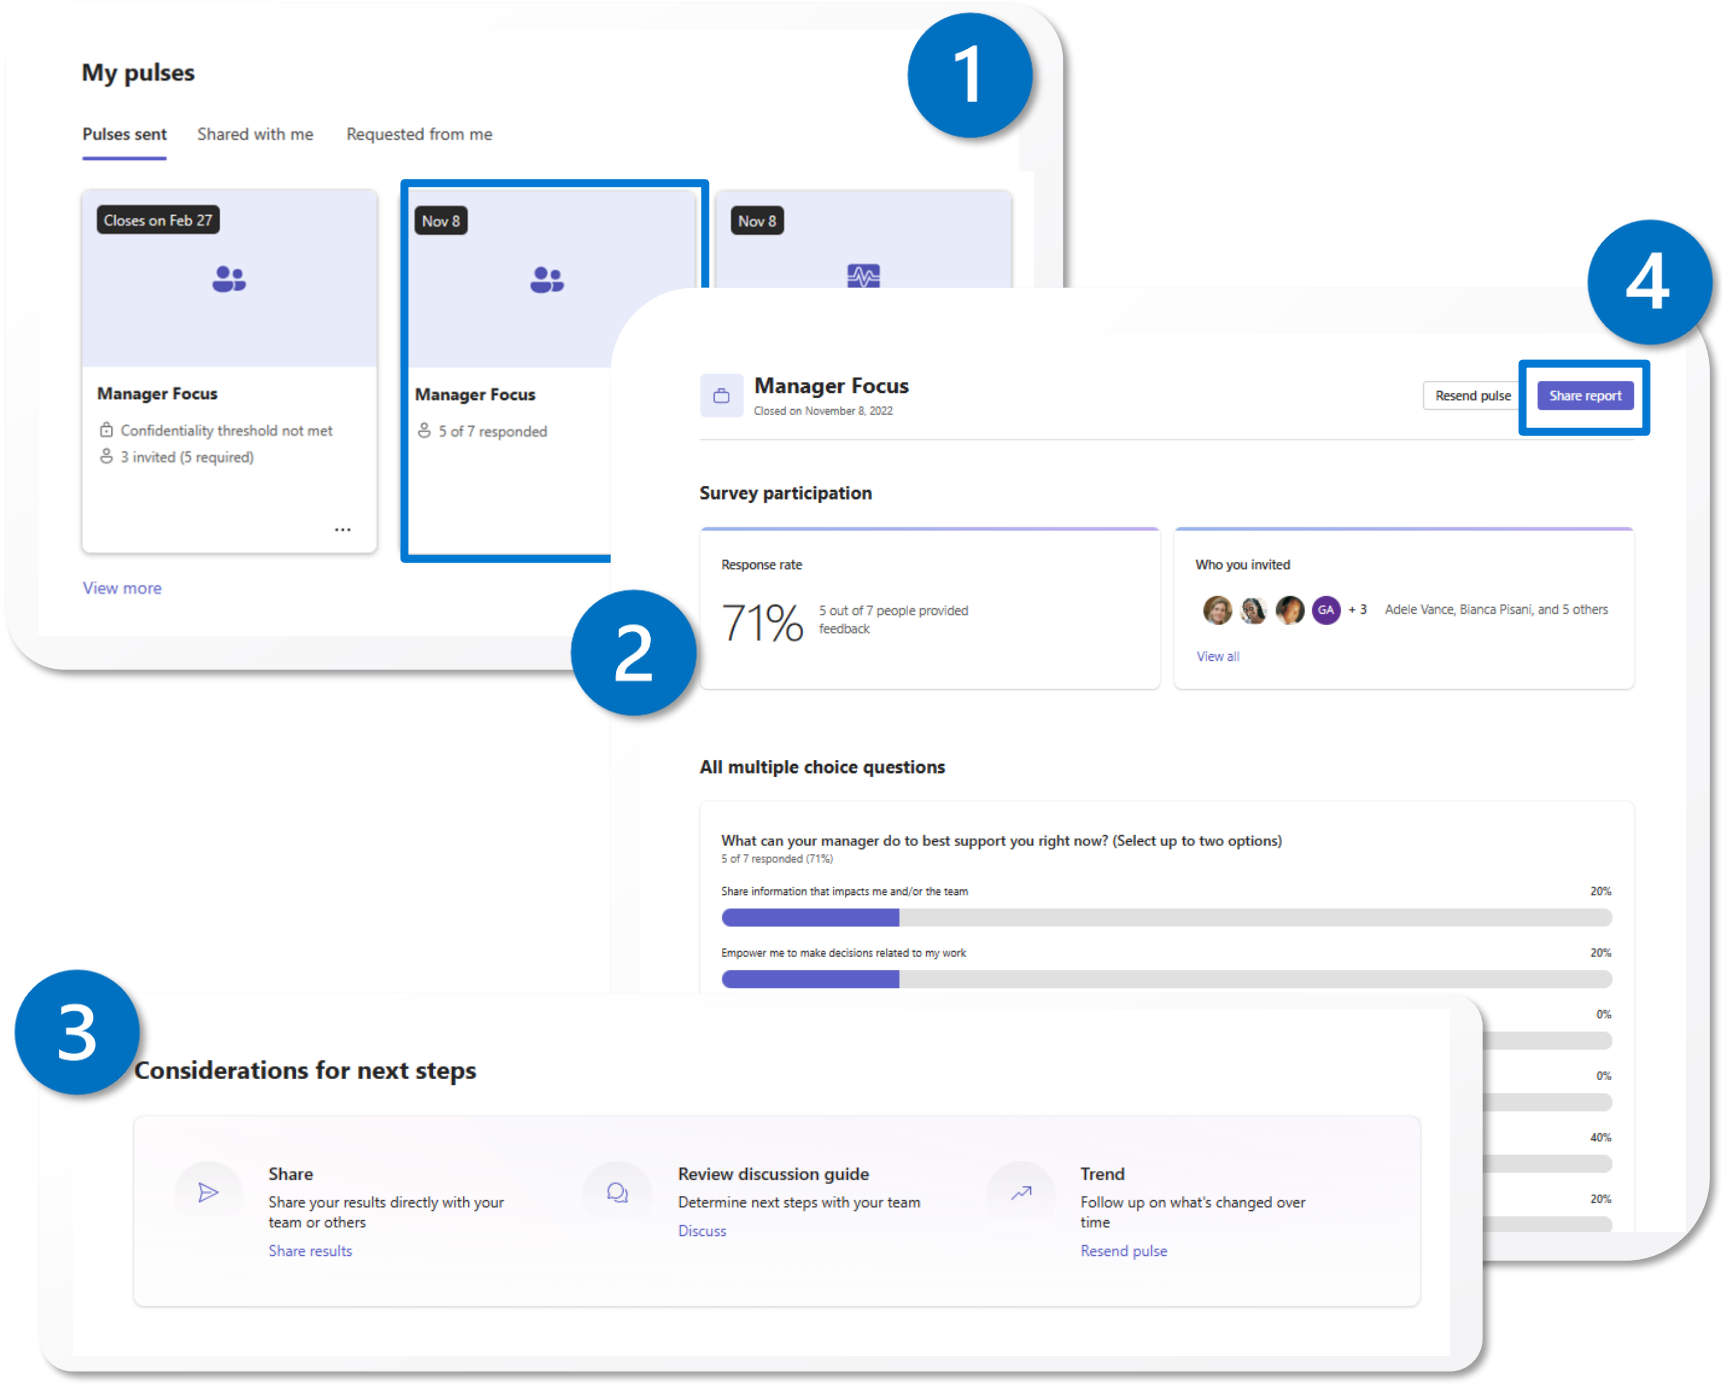

Viva Pulse analytics

Read the analytics gathered from your Pulse surveys

Once your Pulse has received enough responses to maintain confidentiality, you can view your survey analytics.

1. In Viva Pulse, in **My Pulses**, in the **Pulses sent** tab, select your survey.
2. Explore the analytics such as:
   - The survey response rate
   - Analytics per question
   - List of open-ended responses
3. Scroll to the bottom of the report for **Considerations for next steps**.
4. Select **share report** to share the results with colleagues.

Microsoft 365 Backup

Microsoft 365 Backup delivers state of the art backup and restore for Microsoft 365 data, eliminating the extra costs of additional backup infrastructure and overhead for scaling and managing storage, providing unparalleled protection, performance, and resiliency of your enterprise data and applications at scale.

How Microsoft 365 Backup helps

Microsoft can help by reducing the challenges of cost and complexity, while helping add coverage and compliance

Quickly backup and data for when it's needed

Backup your entire tenant in hours to gain operational peace of mind.

Achieve restore scale and speed with simplicity

Achieve business continuity with ultra-fast and at-scale point in time restore.

Reduce security and compliance management overhead

Keeping your data within the M365 security boundary makes it easier for you to manage your compliance domain and maintain your data residency require ments automatically.

Fast SLA backed backup and restore

Benefits

Reduce recovery times with fast restore at scale

Meet unique RTO and RPO requirements

Granular recovery of individual items or bulk recovery of multiple users and content at once

Fast, SLA backed backup and restore

Reduce up front costs

Increase compliance

Reduce up front costs

Benefits

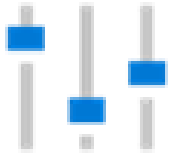

Modernize existing backup and recovery strategy without additional infrastructure and get fast data recovery with Microsoft 365 Backup

Reduce IT spend on secondary datacenters

Get started right away through faster onboarding with cloud services

Fast, SLA backed backup and restore

Reduce up front costs

Increased compliance

Increased compliance

Benefits

Implement isolated and immutable backups of primary data for easy restore

Reduce the number of compliance domains you need to manage

Get "single pane of glass" configuration, monitoring, audit and insights for all your applications and data

Fast, SLA backed backup and restore

Reduce up front costs

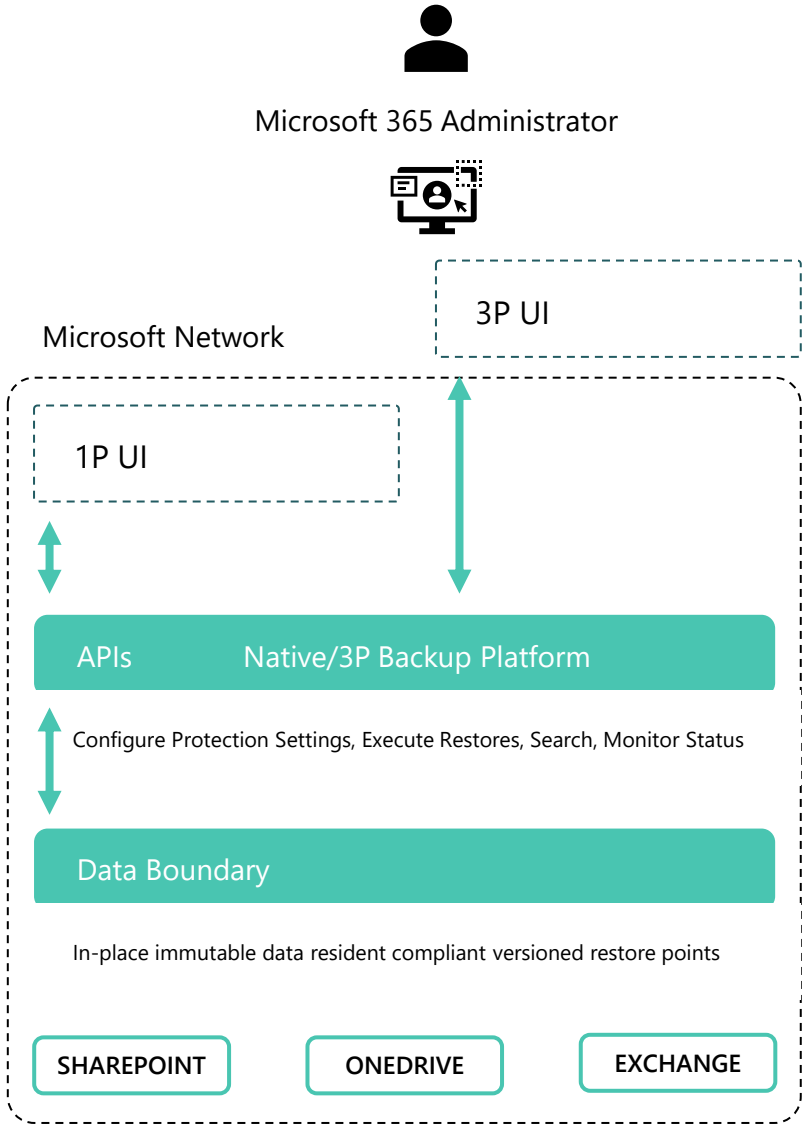

Increased compliance

Microsoft 365 Backup in review

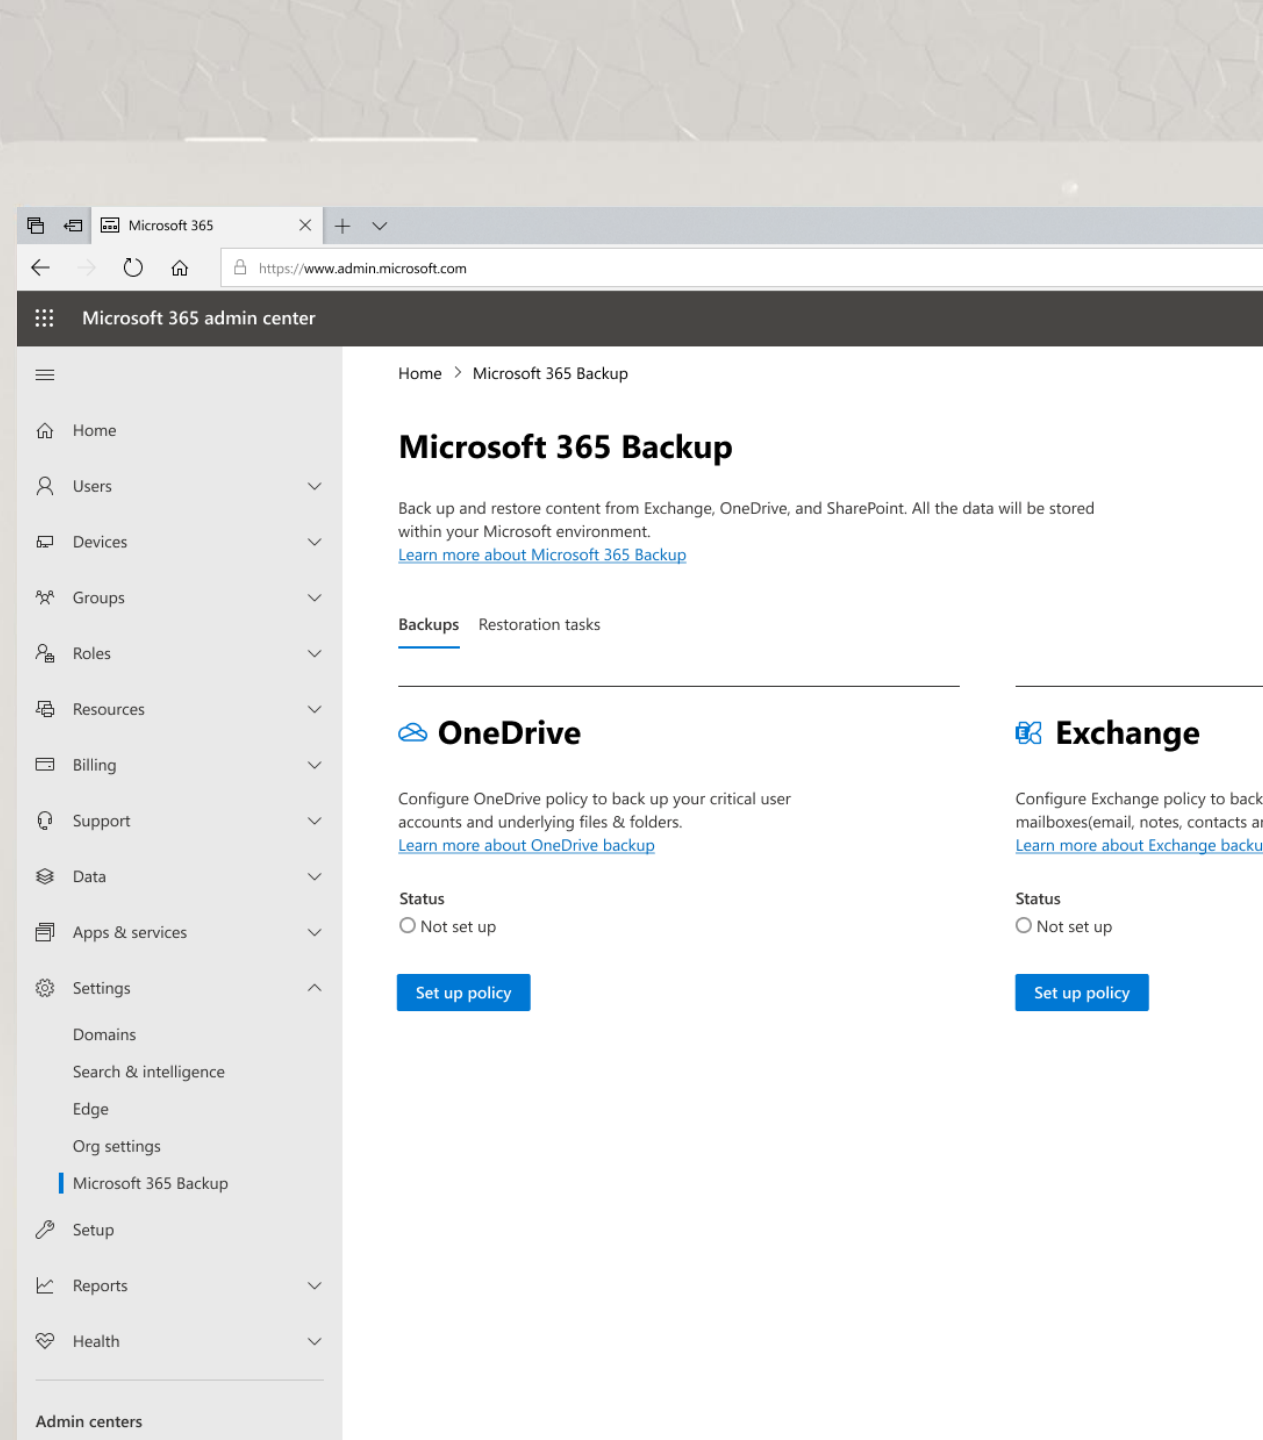

Microsoft 365 Backup is available as both from Microsoft and partners, built on top of the same platform.

- ✓ Quickly backup and data for when it's needed
- ✓ Achieve restore scale and speed with simplicity
- ✓ **Reduce security and compliance management overhead**

Microsoft 365 Archive

Microsoft 365 Archive is a new long-term tiered storage solution that enables you to cost-effectively keep your data within the Microsoft trust boundary. Purview features work with archived data seamlessly, just as they do with active site data.

Microsoft 365 Archive

Retain Microsoft 365 security, compliance, search, and rich metadata

eDiscovery

Retention and DLP policies

Sensitivity labels

Search indexes

Rich metadata

Retain Microsoft 365 security, compliance, search, and rich metadata

Microsoft 365 trust and compliance principles maintained with archived data sets

Fast archive

Archive data sets remain available to search

Seamless UI based management

Security and redundancy retained with archive data sets

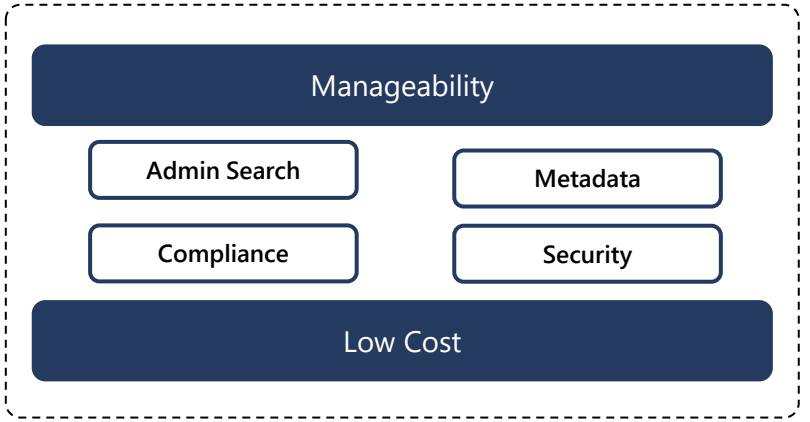

Compatible with multi-geo environments

	HOT STORAGE	ARCHIVE
Read	X	
Search	X	
eDiscovery	X	X
Retention Policies	X	X
Redundancy	X	X
Microsoft 365 trust & compliance	X	X
Cost	$$$	$

Microsoft 365 Archive in review

Better storage price to feature trade-off for inactive content (lower GB/month cost while archived)

- ✓ Easily restore content back to identical state including maintaining permissions on sites
- ✓ Same data durability and security as active sites
- ✓ Compliance workflows still functional on archived sites/files

Azure AD is becoming Microsoft Entra ID.

New name.

Same capabilities.

Same licensing.

No customer action is needed.

Azure AD is becoming Microsoft Entra ID.

from...	to...
Azure AD Free	Microsoft Entra ID Free
Azure AD Premium P1 Also included in Microsoft 365 E3	Microsoft Entra ID P1 Also included in Microsoft 365 E3
Azure AD Premium P2 Also included in Microsoft 365 E5	Microsoft Entra ID P2 Also included in Microsoft 365 E5
Azure AD External Identities	Microsoft Entra External ID

Automatic Conditional Access policies in Microsoft Entra streamline identity protection

Microsoft managed conditional access policies

Customer can modify and disable the policies

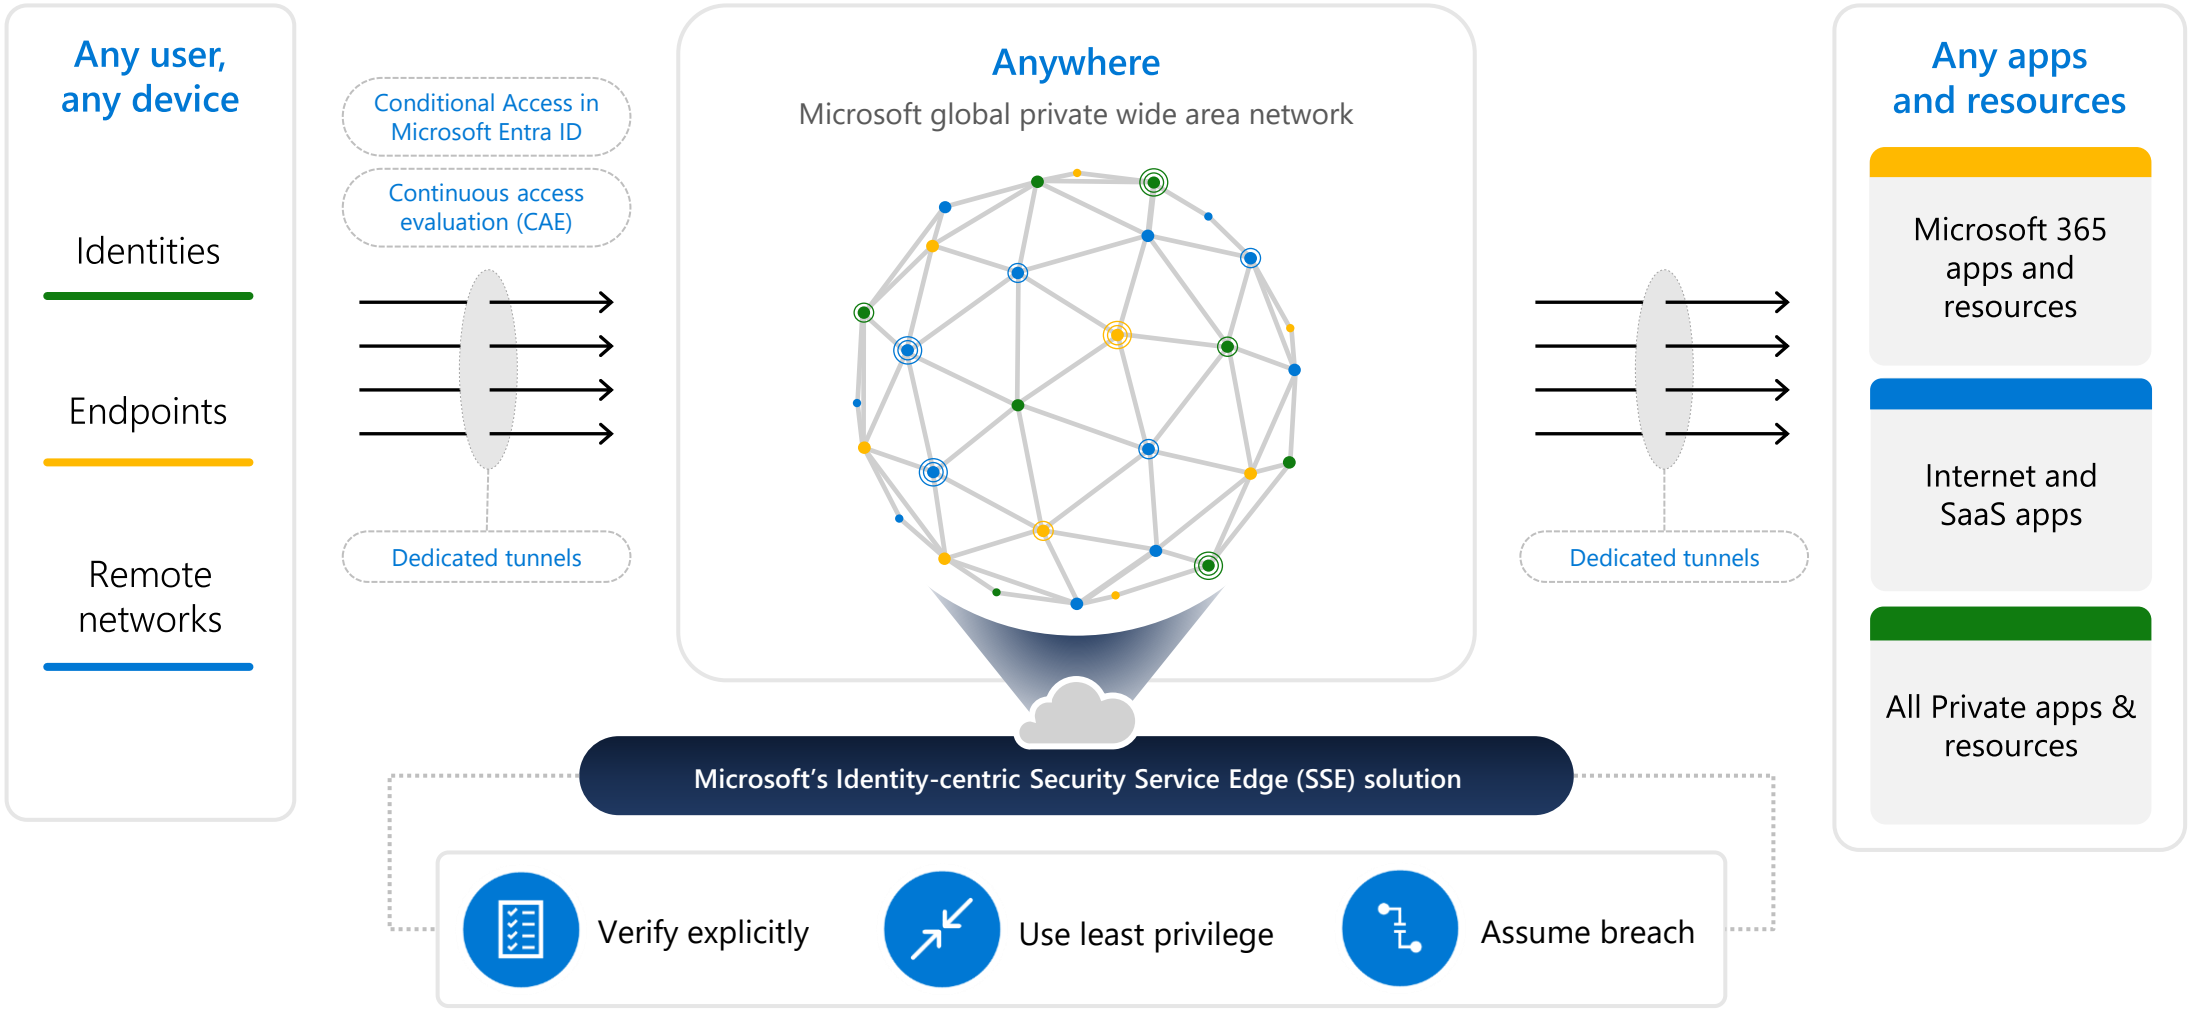

90 days report-only until Febuary 2024

Policies:

1. Require MFA for admin portals
2. Require MFA for per-user MFA users
3. Require MFA for high-risk sign-ins

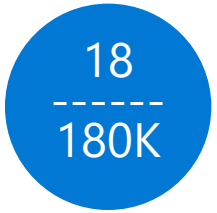

Microsoft's Identity-centric SSE solution

Overview of NIS2

NIS2 is the new European cybersecurity directive that will replace the existing NIS Directive as from **October 2024.**

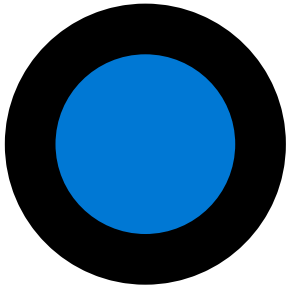

It is the most comprehensive EU cybersecurity legislation to date, covering 18 sectors and over 180K+ companies.

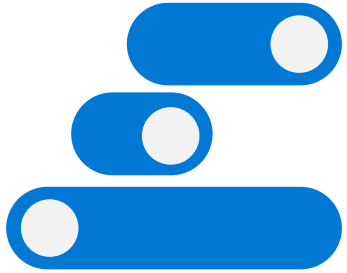

Its purpose is to establish a baseline of security measures for digital service providers and operators of essential services, to mitigate the risk of cyber attacks and to improve the overall level of cybersecurity in the EU.

Member States have until October 17, 2024 to transpose the Directive into national law. This means that each organization encompassed by the Directive will be legally obligated to live up to its requirements by Q4 2024.

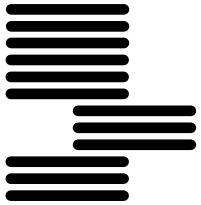

The Network Information Security Directive NIS2 vs. NIS1

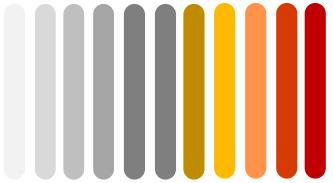

Stronger requirements and more affected sectors

Focus on securing and business continuity. This includes supply chain security.

Improving & streamlining the report obligations.

Worse Repercussions. Next to fines, NIS2 can lead to legal ramifications for management.

Enforcement localized in all European member states

NIS affects various sectors, including...

On September 14, the European Commission published new guidelines explaining which sectors will be considered critical and what they should report to national authorities in the EU under the NIS2 directive.

Highly Critical Sectors

- Energy
- Transport
- Banking
- Space
- Financial Market Infrastructure
- Health Sector
- Drinking Water
- Public Admin.
- Wastewater
- Digital Infrastructure
- IT Service Management

Critical Sectors

- Food
- Waste Management
- Chemicals
- Postal And Courier Services
- Manufacturing Of Medical Devices
- Digital Providers
- Research Organizations

NIS Objectives & Principles vs Microsoft Technology

NIS Principles	Microsoft Solution	Comments
Governance	Defender CSPM, Entra	
Risk Management	Defender XDR and Purview Compl. Mgr. & Insider Risk	
Asset Management	Defender CSPM, Defender for Endpoint	
Supply Chain	Defender XDR, Entra and DevOps	
Service Protection	Defender for API	In Preview
Identity & Access	Entra	
Data Security	Purview	
System Security	Defender for Endpoint, Defender for IoT and Intune	
Resilient Networks	Azure Network Security	3rd party integration with the major NDR vendors
Staff Awareness	O365 Phishing Simulation and Learning Paths	
Security Monitoring	Microsoft Sentinel	
Proactive Security	Defender XDR	
Response and Recovery	Defender XDR, Azure Backup and Recovery	3rd party integration with major DR vendors
Lessons Learned	N/A	

https://www.itgovernance.co.uk/nis-regulations-cyber-assessment-framework

A unified security operations platform

Microsoft Sentinel and Defender XDR together

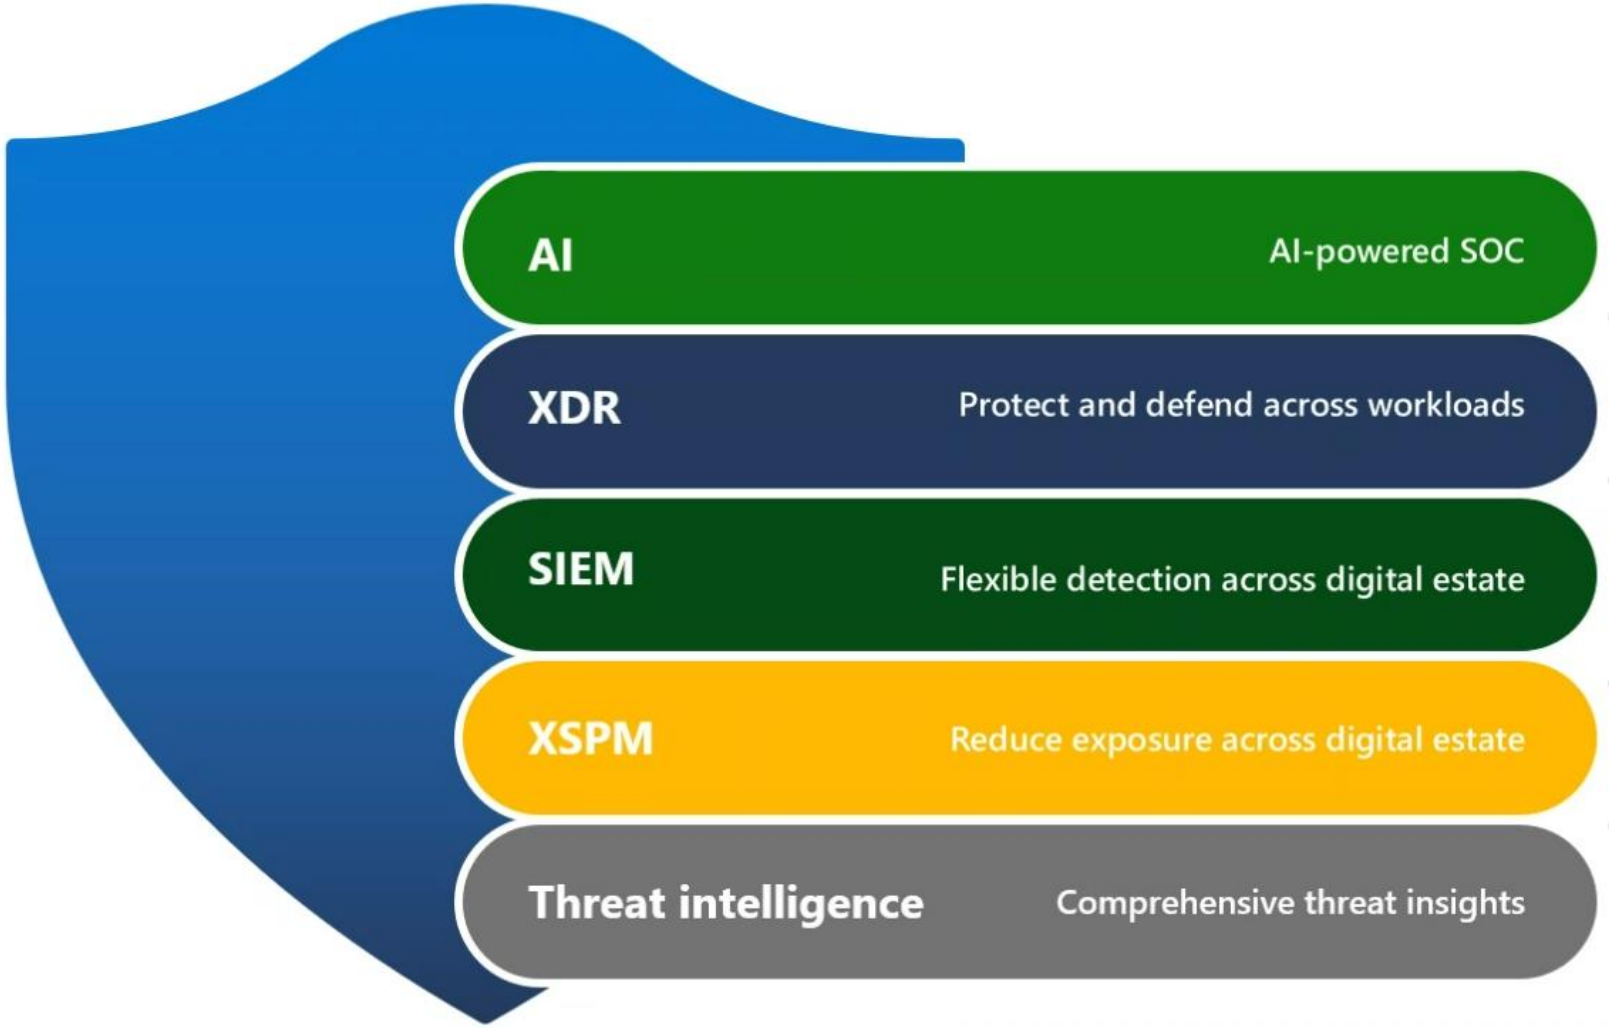

Supercharge your cyberthreat protection with a unified platform

Our security operations platform breaks down security silos and enables security teams to detect and disrupt cyberthreats in near real time, streamline investigation and response, and provide guided recommendations to help prevent repeat and future cyberattacks.

It’s time for a unified security operations platform

Optimized analyst experience | Targeted assistance | Automated protection and remediation

Microsoft Security Copilot

Your data is your data

Your data is not used to train the foundation AI models

Your data is protected by the most comprehensive enterprise compliance and security controls

Microsoft Purview

Comprehensive solutions to help govern, protect and manage your data estate

Understand & govern data

Manage visibility and governance of data assets across your environment

Safeguard data, wherever it lives

Protect sensitive data across clouds, apps, and devices

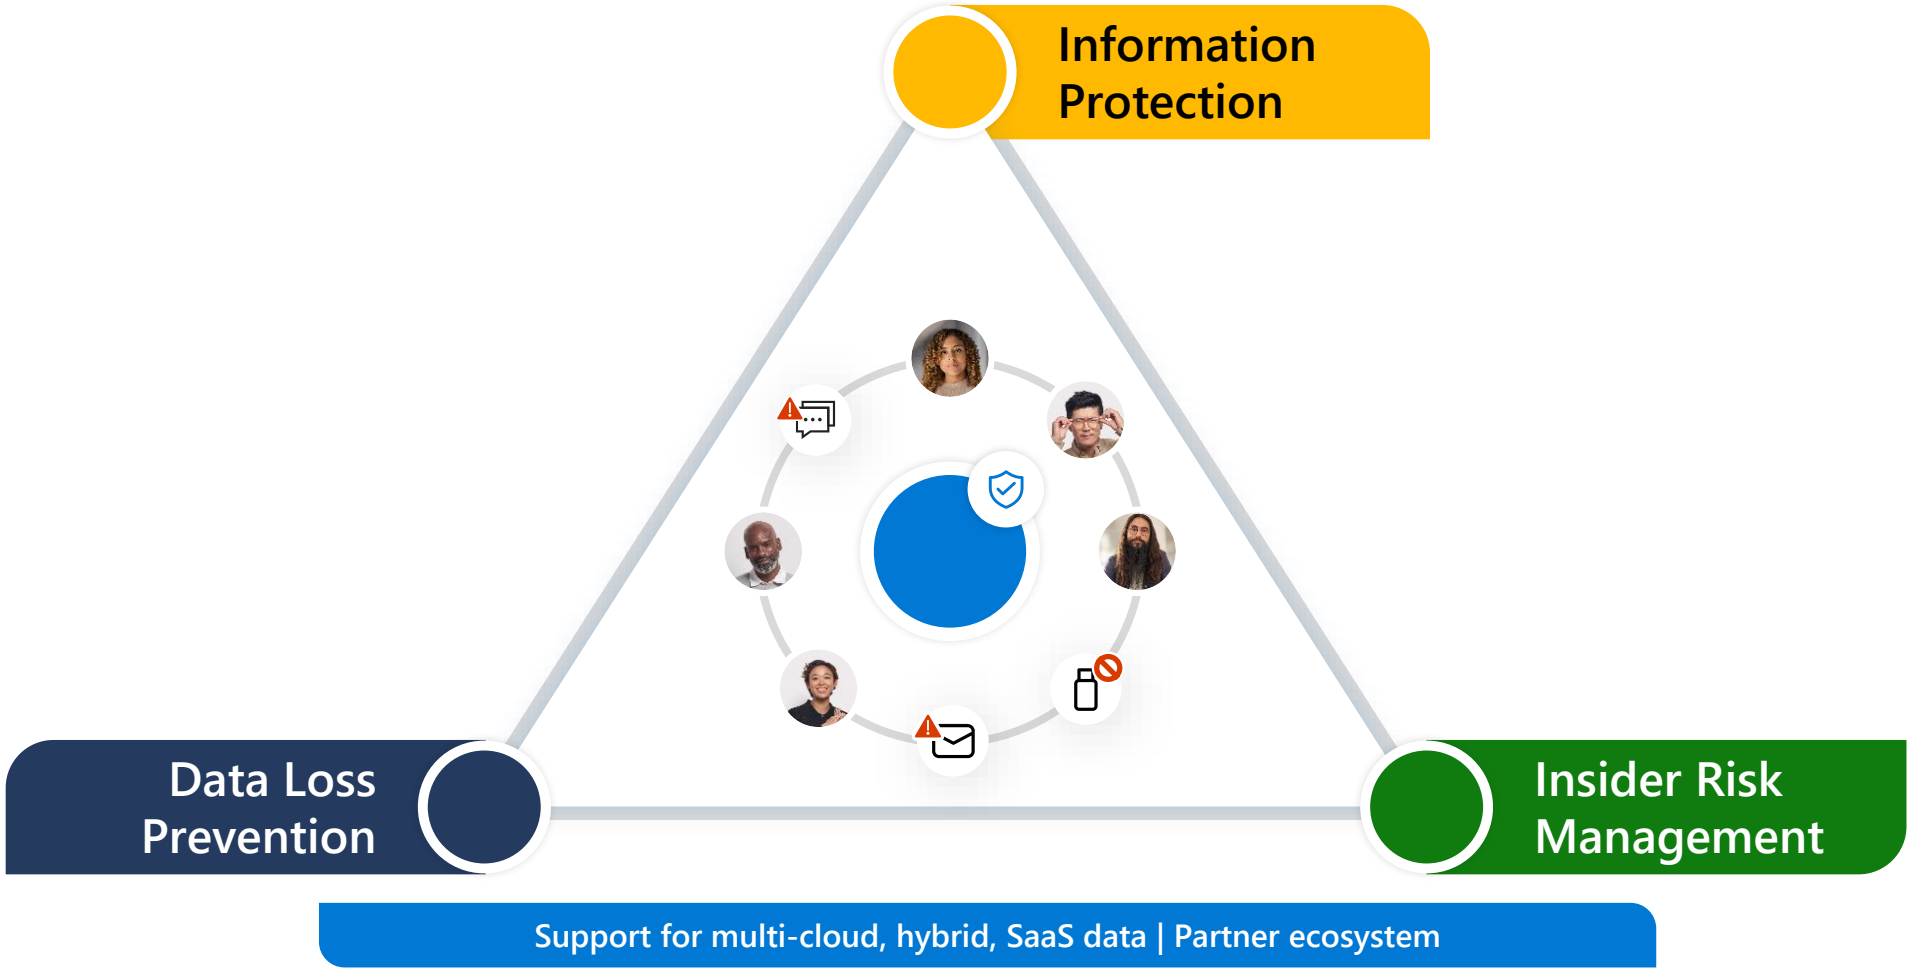

Improve risk & compliance posture

Identify data risks and manage regulatory compliance requirements

Microsoft ecosystem

Support for multi-cloud, hybrid, SaaS data | Third-party/partner ecosystem

Fortify data security with Microsoft Purview

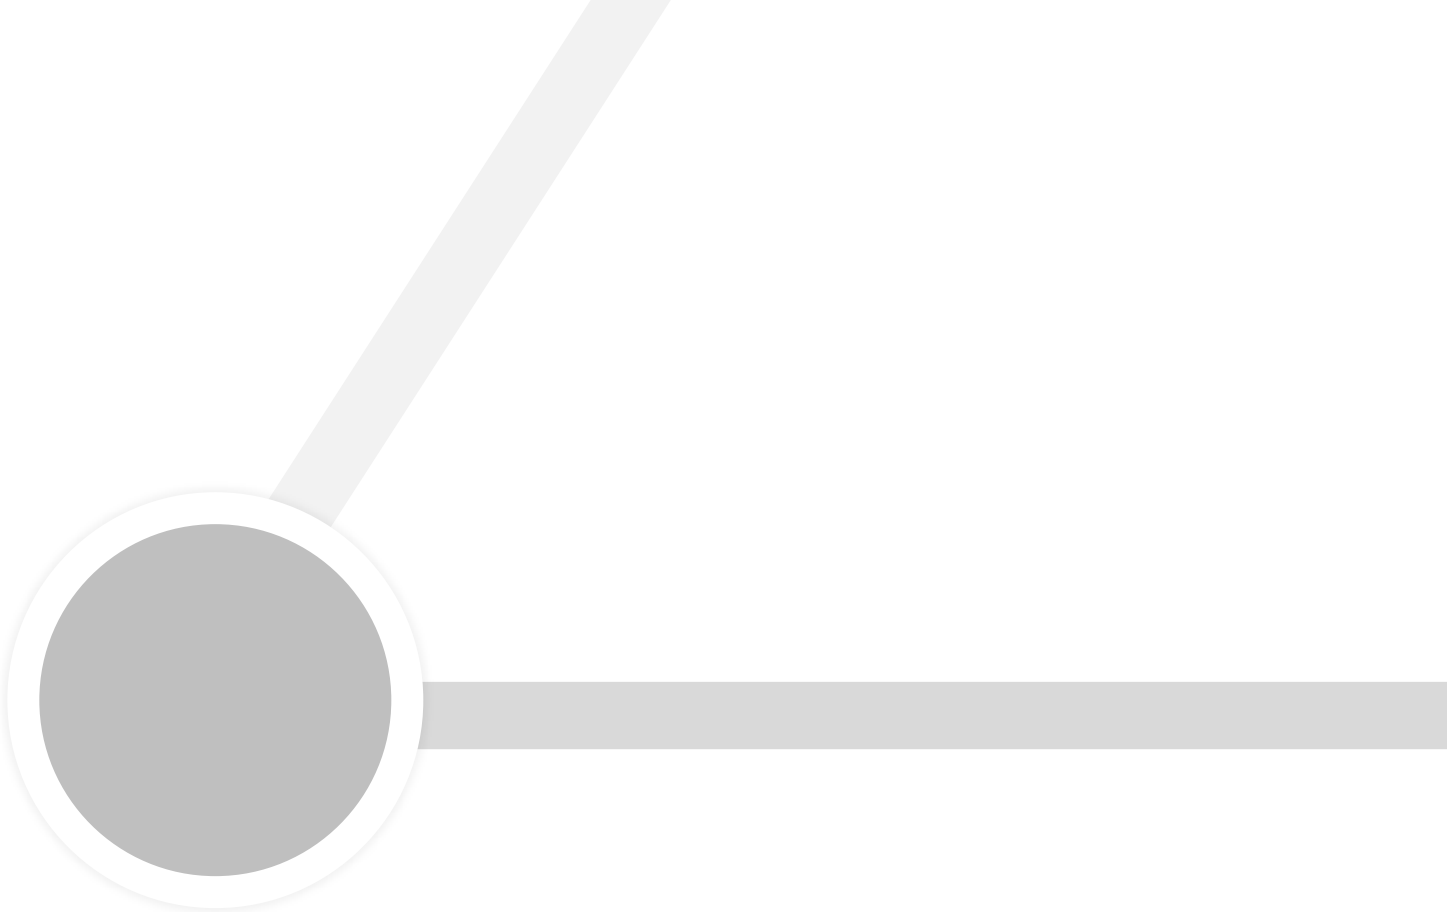

Prevent data loss

Microsoft Purview Data Loss Prevention

Cloud native with ***built-in protection*** in Microsoft 365 apps, services, and windows endpoints - ***no on-premise infrastructure or agents needed***

Balance protection and productivity with granular policy controls and manage DLP policies all workloads from ***a single location***

Leverage ***classification and user activity*** insights to better inform DLP polices and benefit from an ***integrated incident management***

Manage insider risks

Microsoft Purview Insider Risk Management

Protect *user trust* and build a holistic insider risk program with *pseudonymization* and strong privacy controls

Identify hidden risks with hundreds of *built-in machine-learning models* and indicators, requiring no endpoint agents.

Expedite mitigation with enriched investigations and *adaptive protection* that enforce controls dynamically.

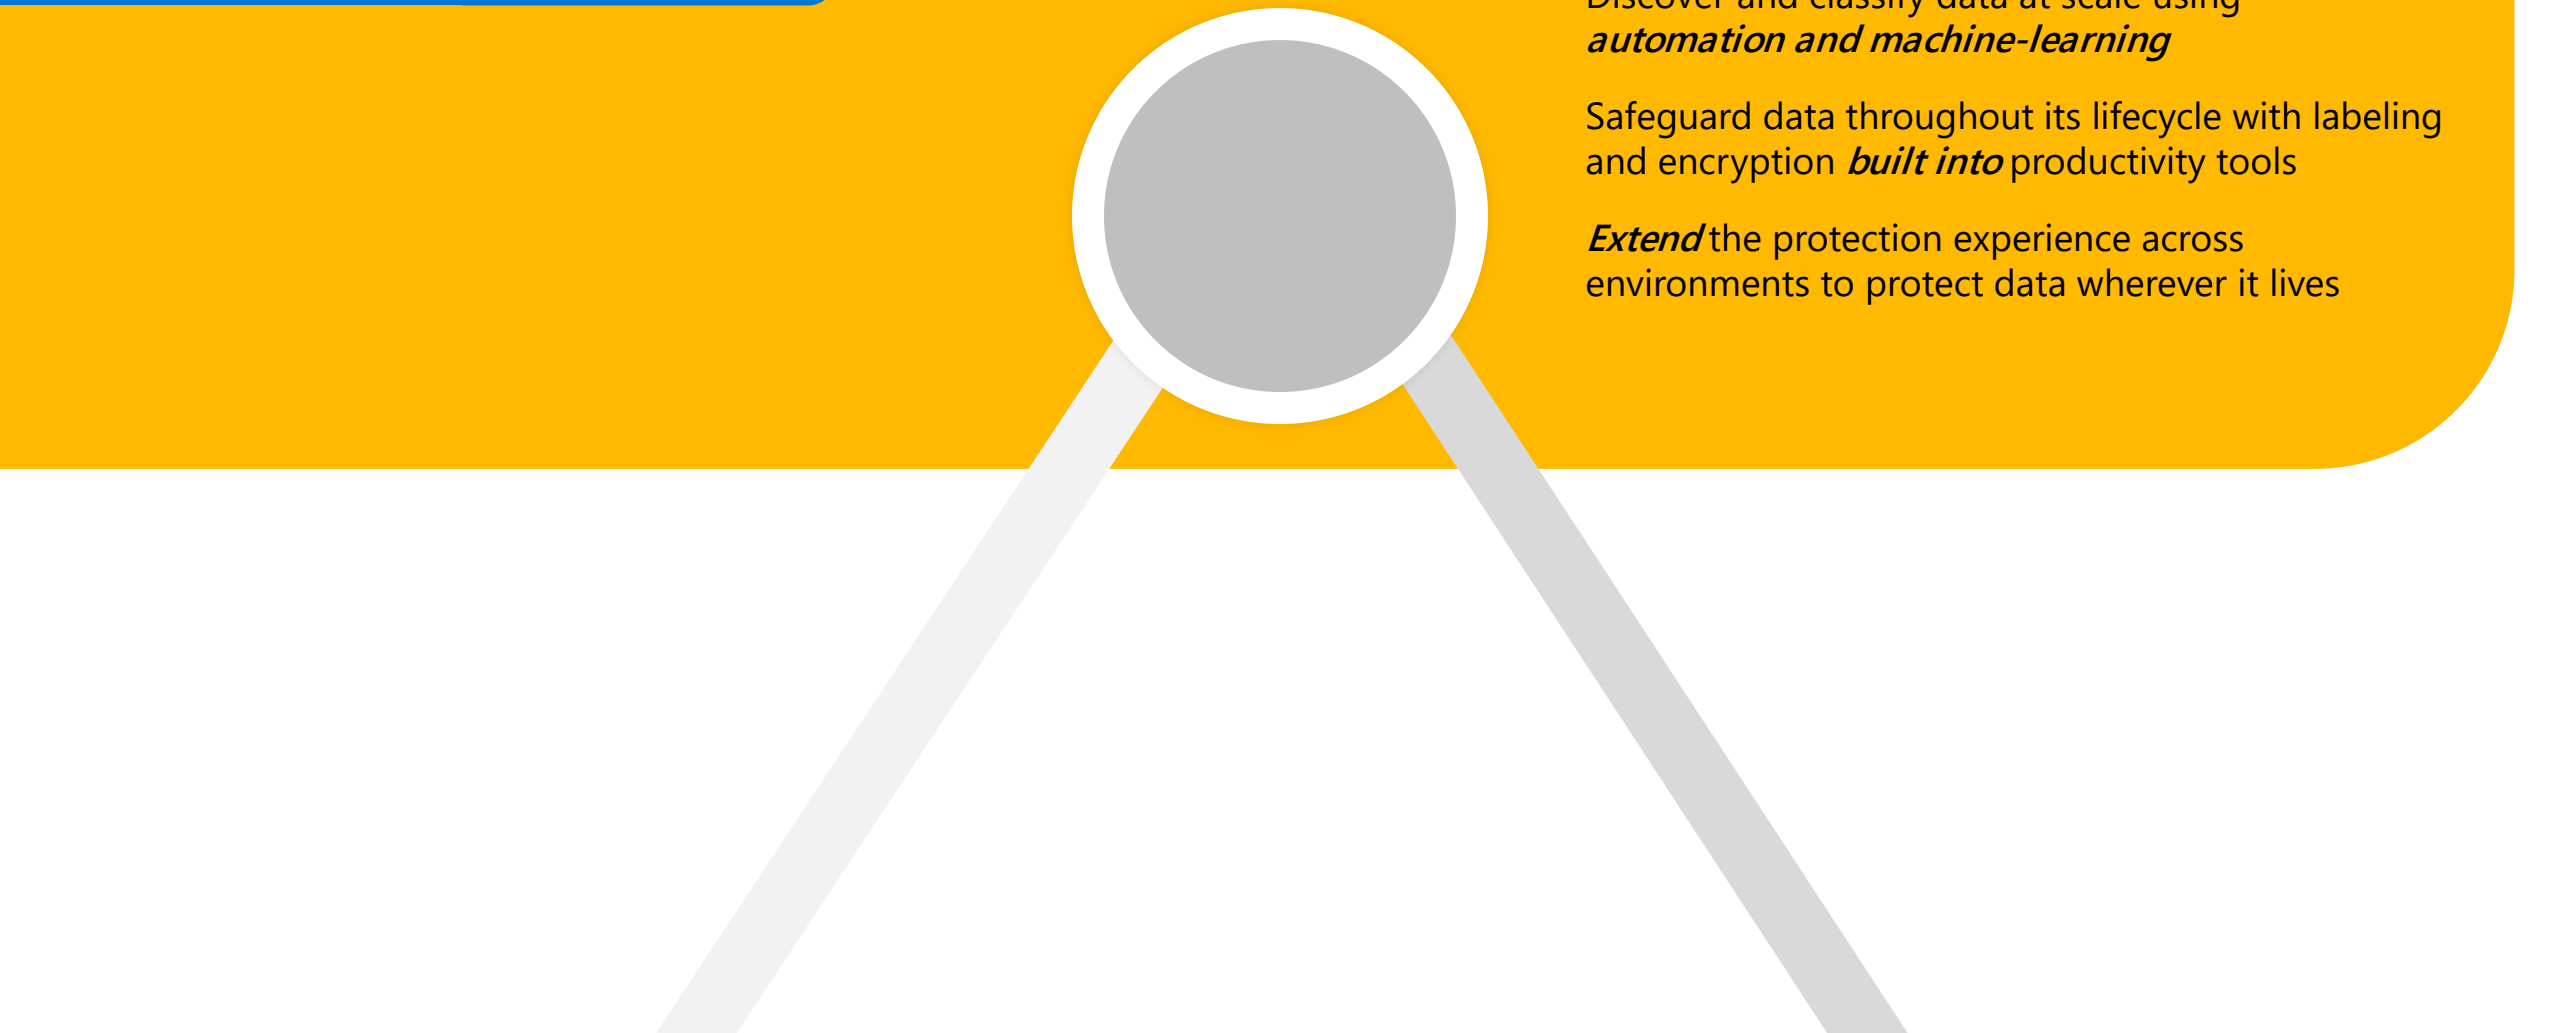

Protect sensitive data

Microsoft Purview Information Protection

Discover and classify data at scale using ***automation and machine-learning***

Safeguard data throughout its lifecycle with labeling and encryption ***built into*** productivity tools

Extend the protection experience across environments to protect data wherever it lives

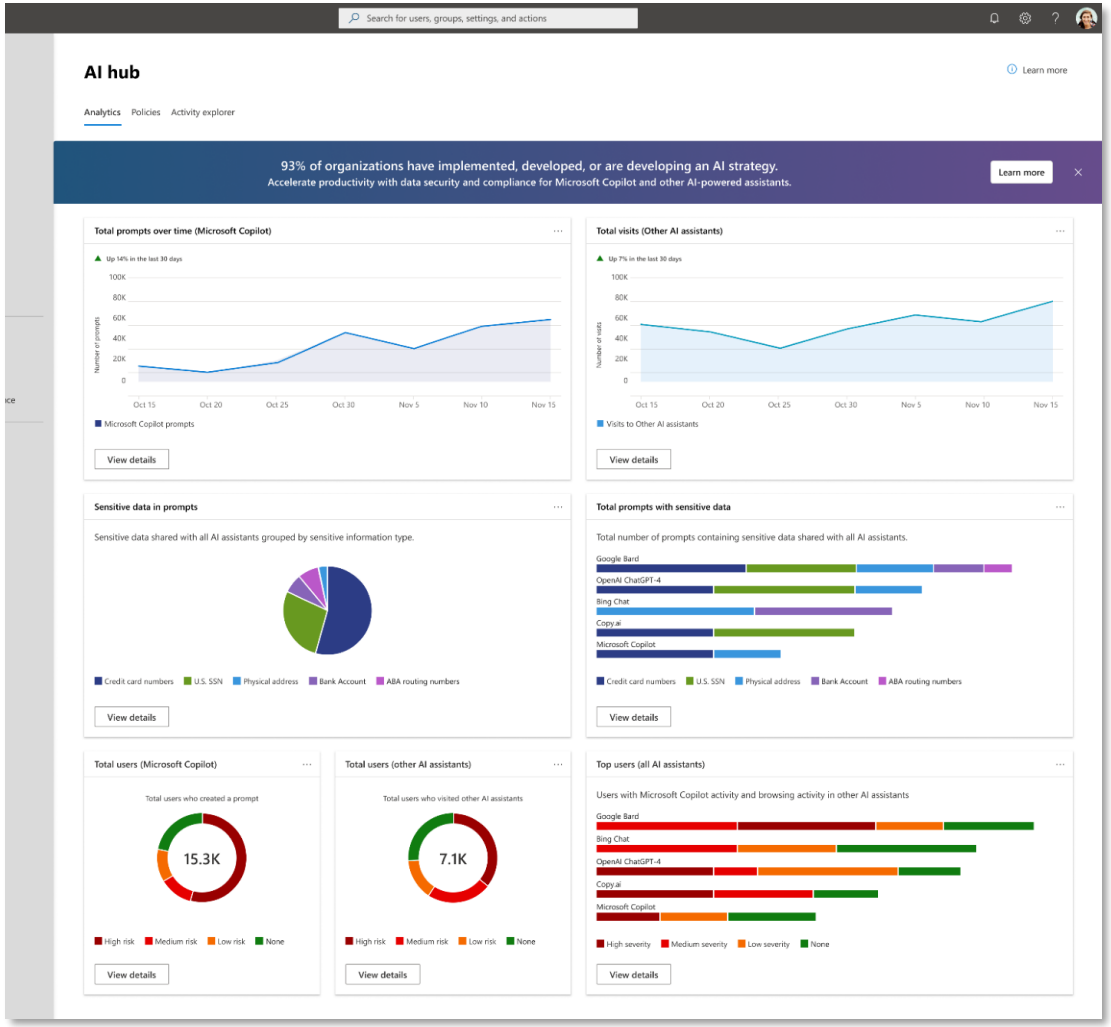

Securing AI with Microsoft Purview

Ignite highlights:

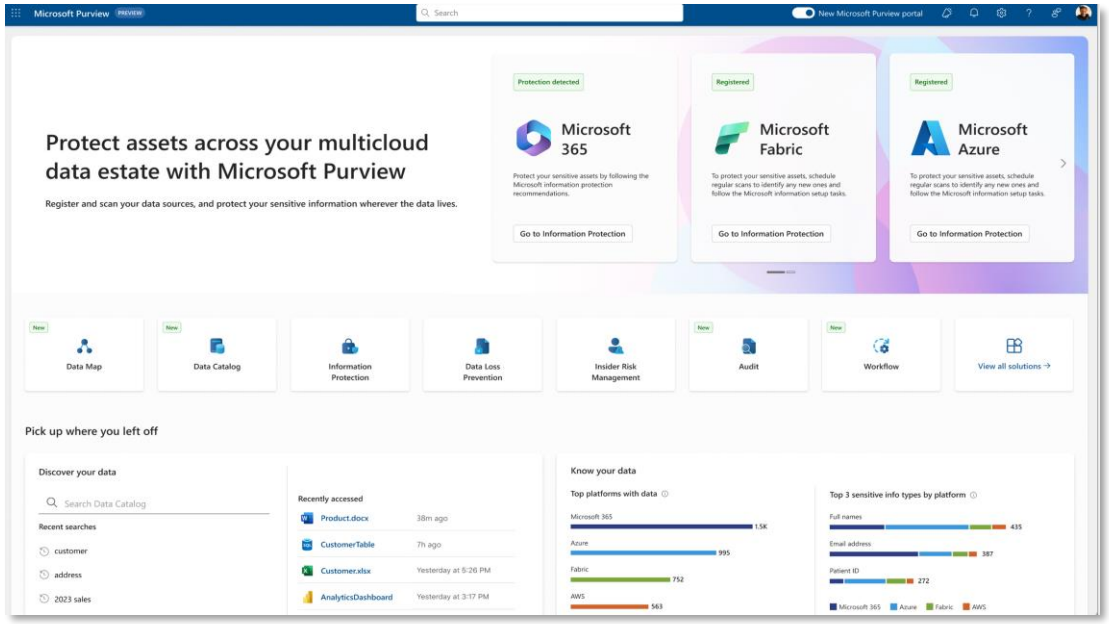

Microsoft Purview helps secure and govern data in AI

- Insights into generative AI usage and activity over time
- Securing data in generative AI prompts and responses (Copilot for M365, 100+ common consumer AI apps such as ChatGPT, Bard, Dall-E etc.)
- Compliance controls for M365 Copilot to easily meet business and regulatory requirements

Unified Microsoft Purview Portal

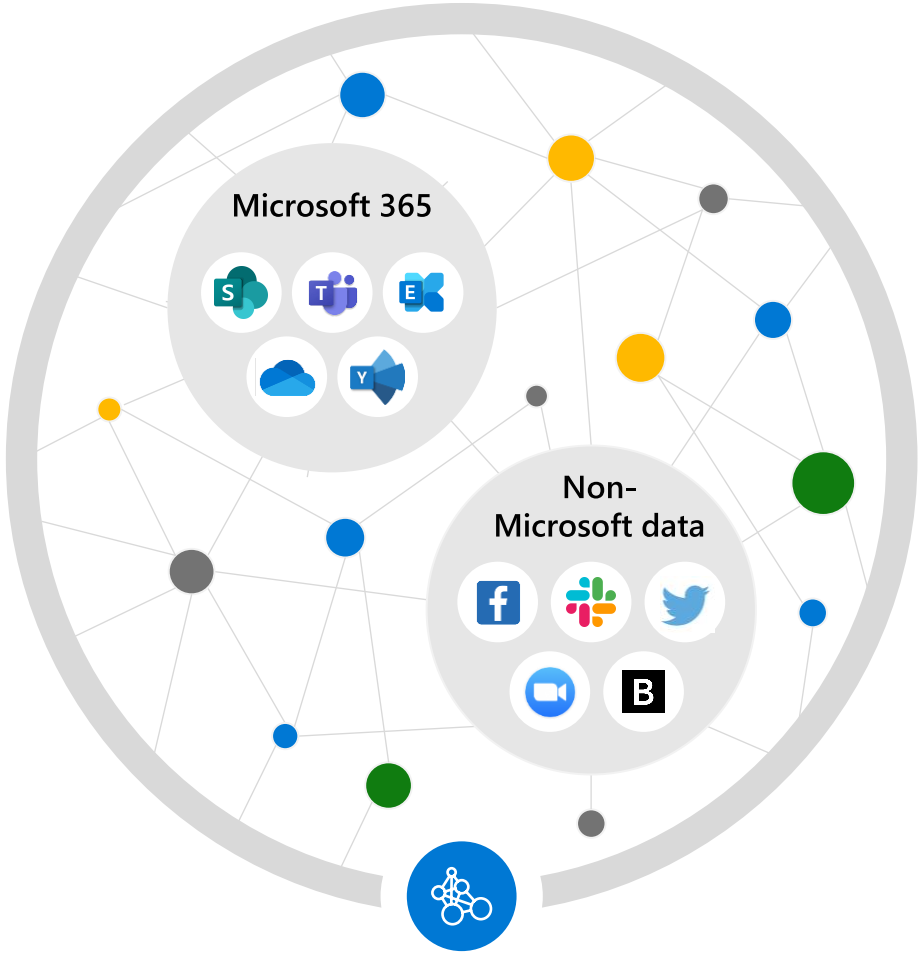

Expanding Data Protection in Multi-Cloud Environments

Ignite highlights:

- Unified data map enables integration and classification across the data estate
- Unified portal for securing and governing your data
- Gain visibility across your data estate, across Azure and AWS
- Extend protections across structured and unstructured data types including Azure SQL, ADLS and AWS S3
- Detect risks across clouds and 3rd party apps

Protect, manage and govern data at scale

Powered by an intelligent platform

- Retain or delete data and manage records where users collaborate to manage risk and prevent productivity loss
- Demonstrate compliance with label analytics insights, defensible disposal, and rich audit trails
- Manage non-Microsoft data import with pre-built data connectors*

*Pre-built data connectors include connectors built by Microsoft and by partners – Veritas, Telemessage, CellTrust and 17a-4 LLC. Except for Veritas, Telemessage, CellTrust and 17a-4 LLC, Microsoft does not have direct relationships with the data source companies in bringing these data connectors to the platform.

Announcing

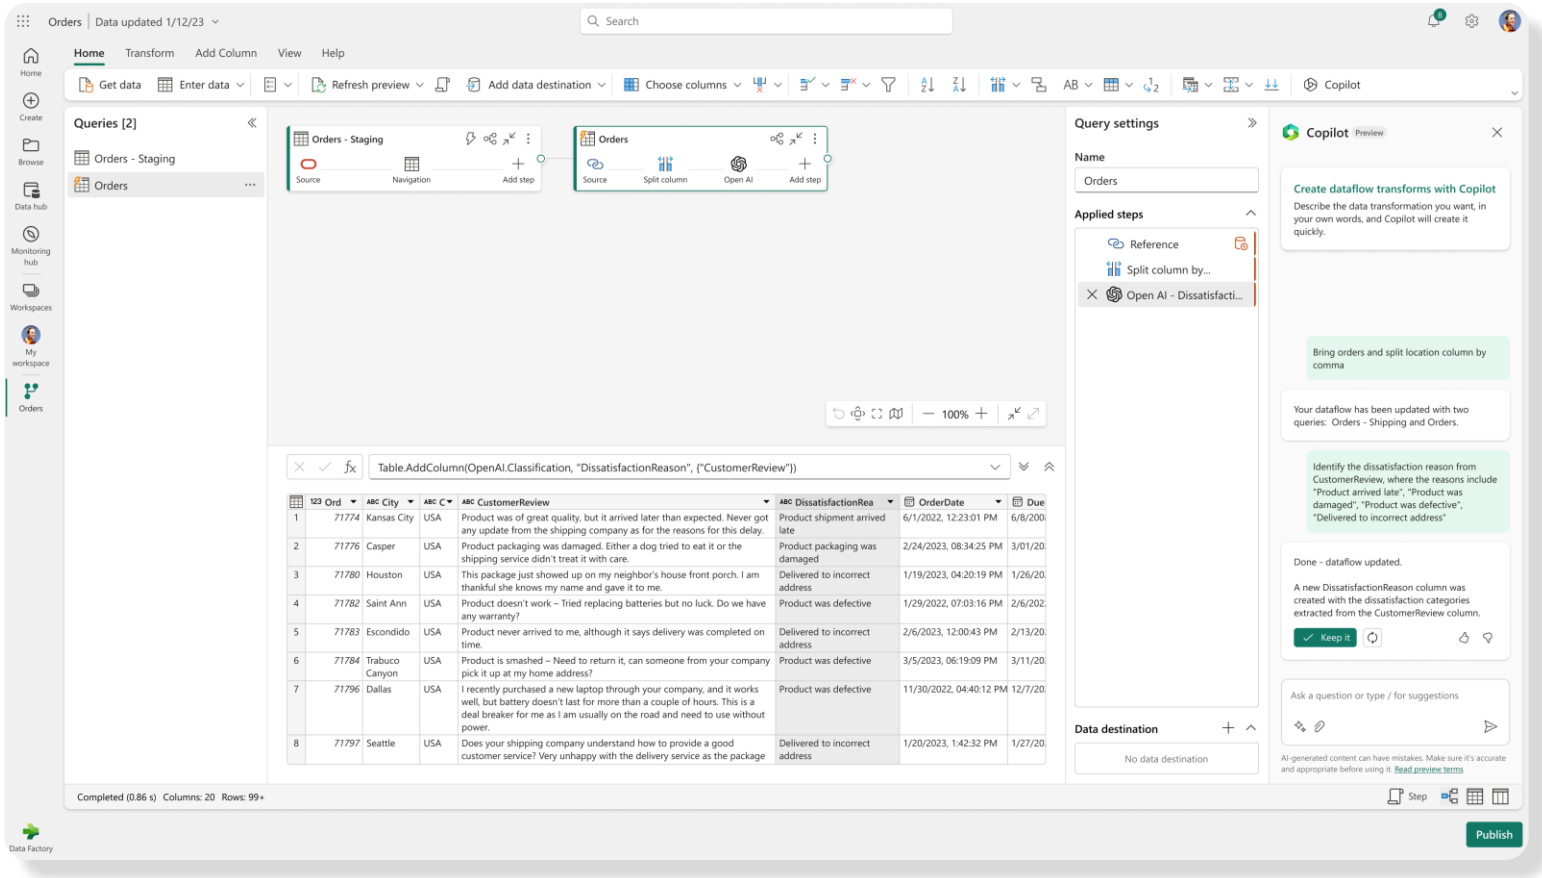

Microsoft Fabric Copilot

Copilot in Data Factory

Public Preview

Easily integrate generative AI into your dataflows and pipelines using Copilot

- Chat with **Copilot** to describe data transformations in natural language
- Tap into generative AI capabilities from **Azure Open AI** as data transformation steps
- Use **Copilot** to schedule and run and manage dataflows

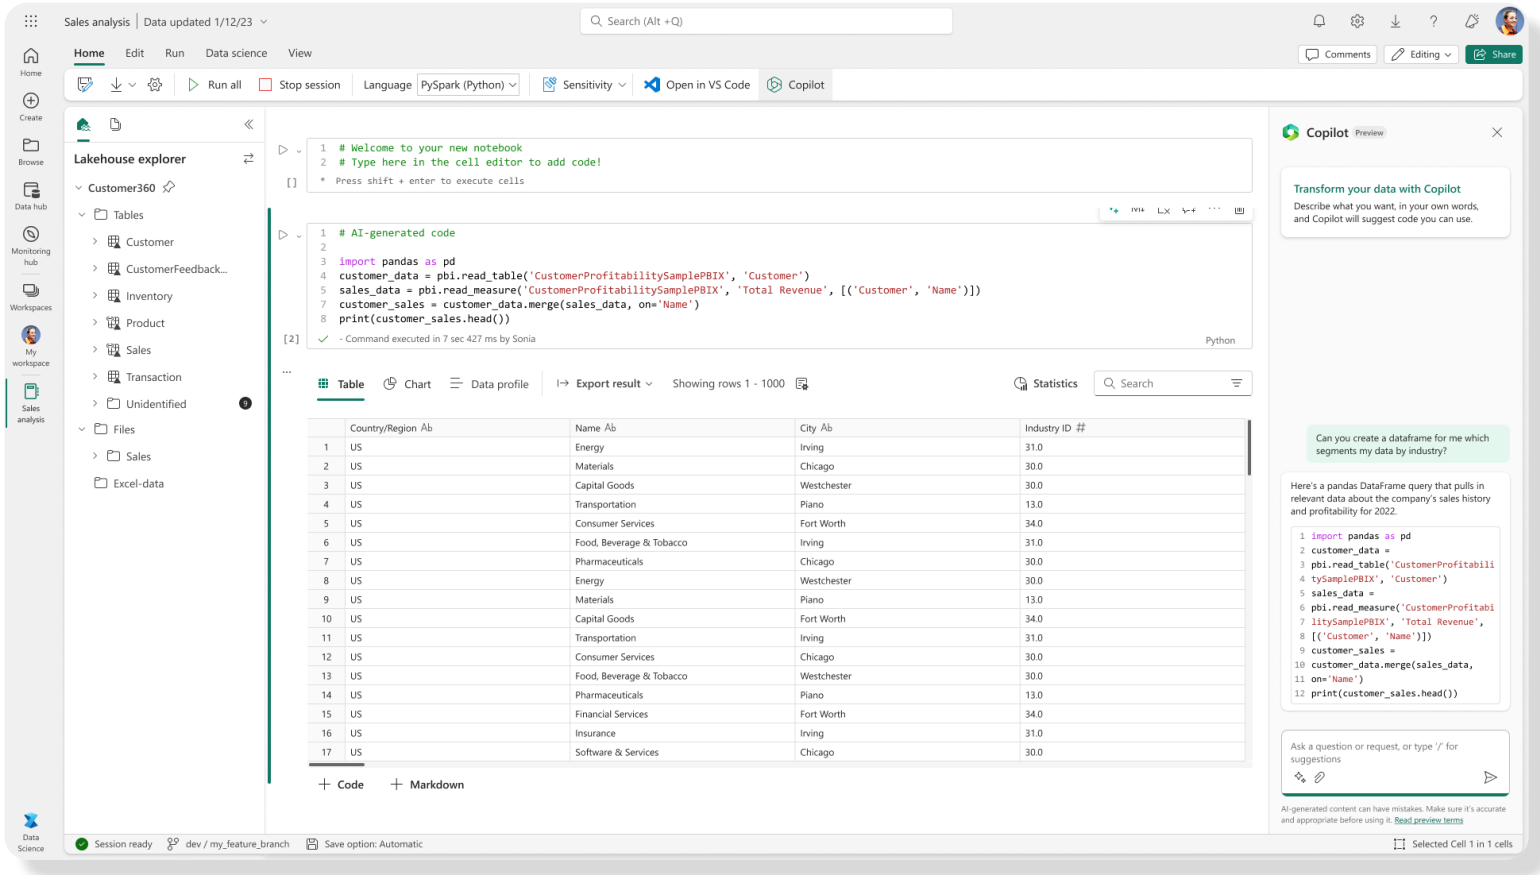

Copilot in Notebooks

Public Preview

Use Copilot to enrich, model, analyze and explore your data in notebooks

- Work with **Copilot** to understand how best to analyze your data
- Chat with **Copilot** to create and configure ML models
- Write code faster with inline code suggestions from **Copilot**
- Use **Copilot** to summarize and explain code to understand how it works

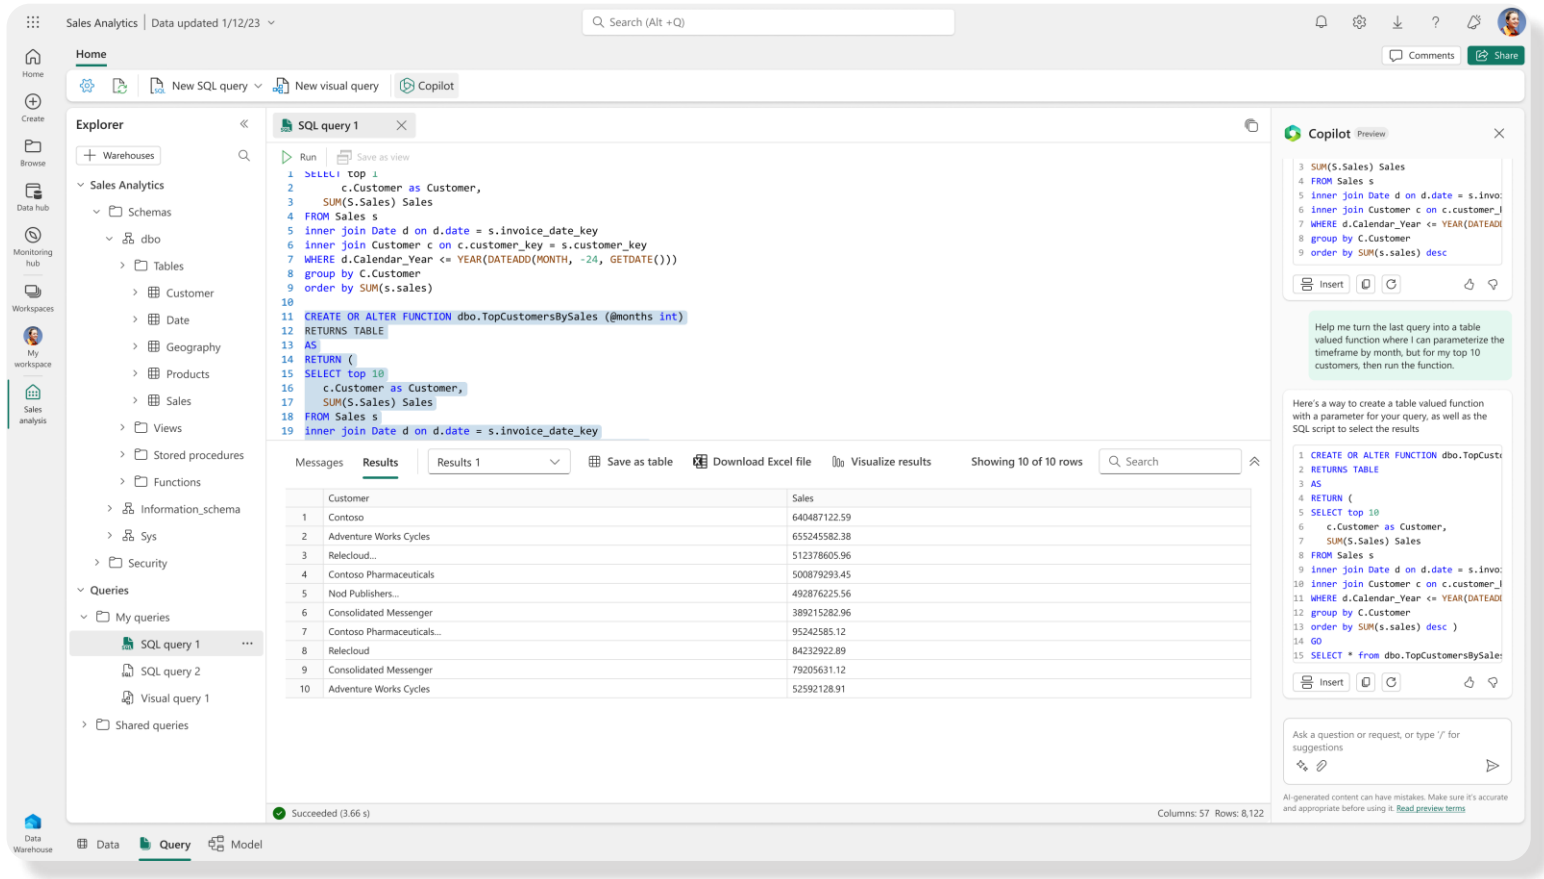

Copilot in Synapse Data Warehousing

Coming soon

Use Copilot to work with your data and generate SQL queries

- Write code faster with inline code suggestions from **Copilot**
- Let **Copilot** clean-up and document your code
- Use **Copilot** to accelerate data warehouses migrations by automatically updating queries and stored procedures

Copilot in Power BI

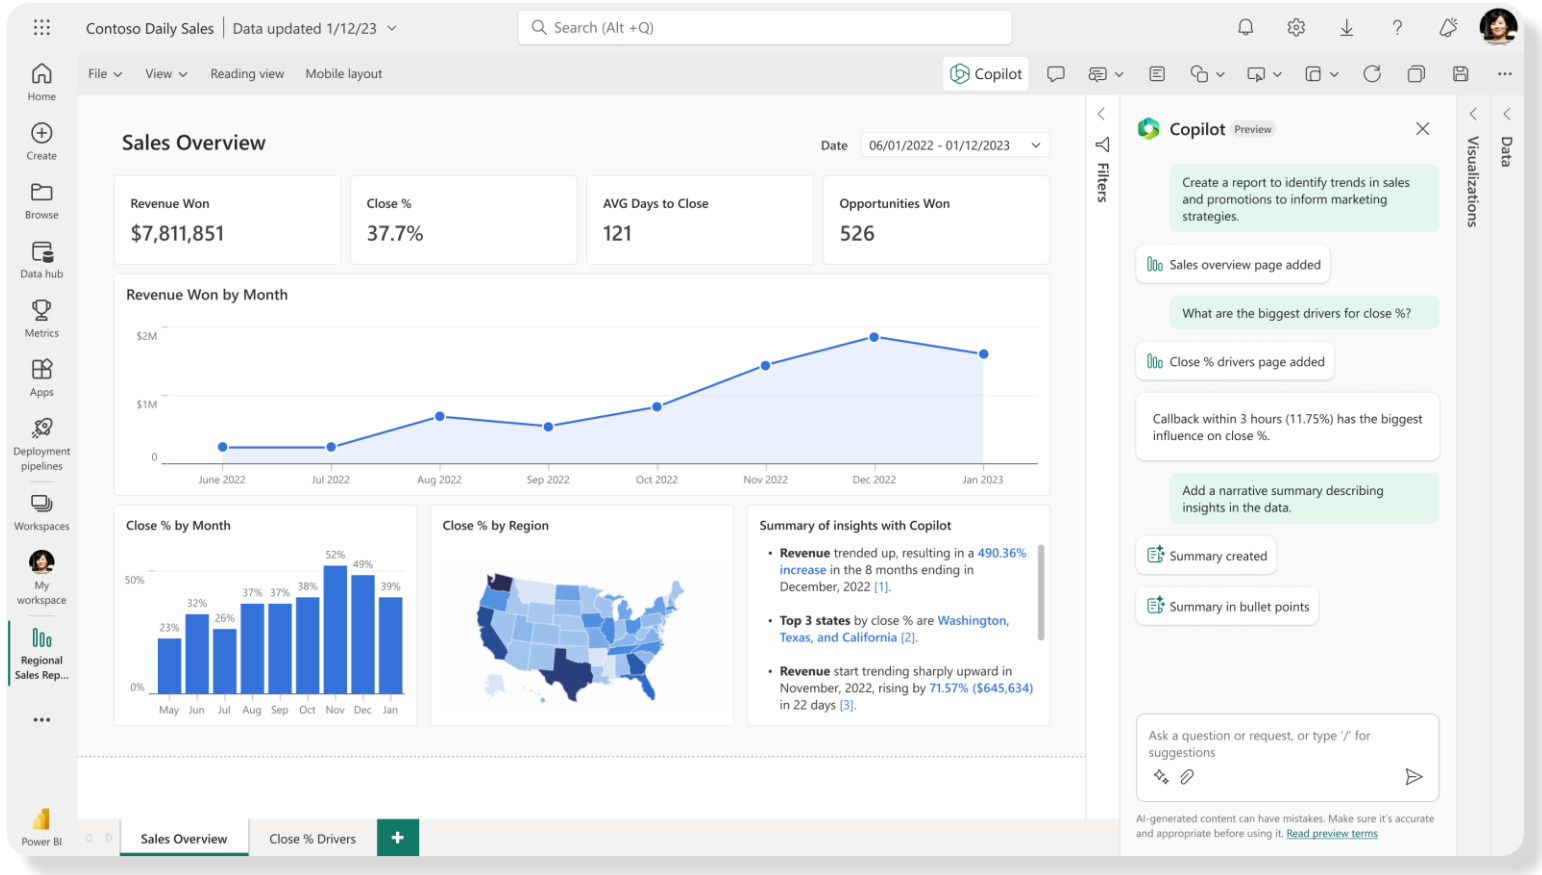

Public Preview

Stay focused on your business outcomes and unlock insights in your data with Copilot

Create beautiful and insightful reports just by chatting with **Copilot**

Define metrics and calculations for your data model just by describing them in **natural language**

Use **Copilot** to find and summarize insights in your data

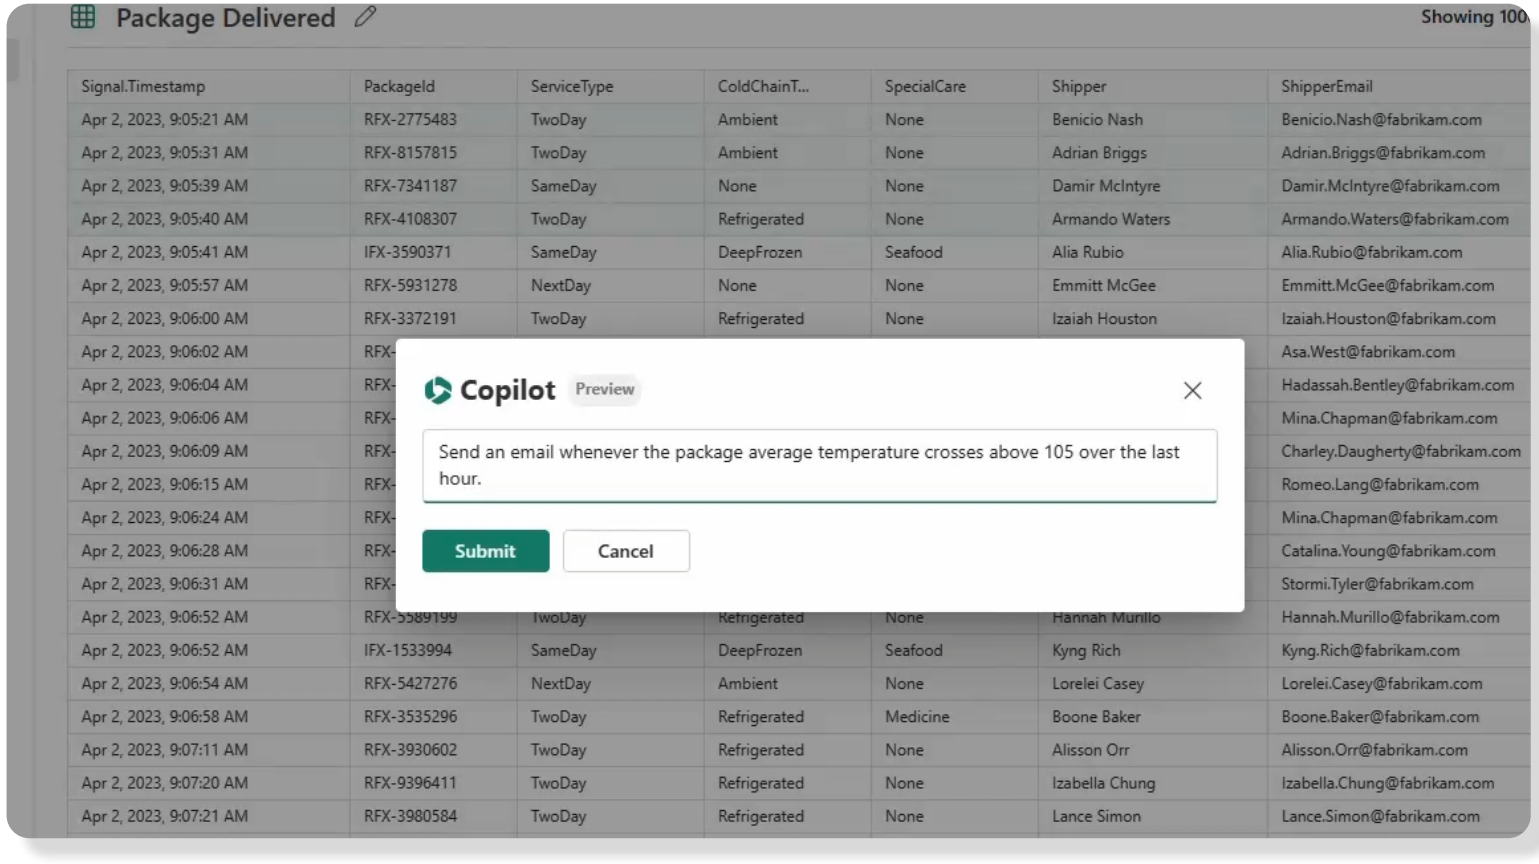

Copilot in Data Activator

Coming soon

Bridge the gap between systems of insight and systems of action

Chat with Copilot to connect insights from changing data in Power BI and Synapse with action through Power Automate

Use natural language to configure notifications, kick-off workflows, and even reach into operational systems to optimize how the business runs through Copilot

PARTNER DAY
21.November 2023

Morning Session summary:

•**AI Transformation:** AI is a game-changer for customers, partners, and Microsoft
•**Microsoft AI:** Microsoft offers a wide range of AI applications, platforms, and services
•**Azure OpenAI:** Azure OpenAI allows for the creation of a company's own GPT and interaction with internal data
•**Copilot Experience:** Microsoft offers a copilot for every cloud experience, empowering users and increasing productivity
•**Getting AI Ready:** Microsoft offers resources, workshops, and bootcamps to help executives, sales, and technicians get AI ready

An Amazing Journey

PARTNER DAY
21.November 2023

- Exciting adventure led by tour guide
- Explore beautiful sceneries and cultures
- Experiencing memorable moments with traveler friend

Das Rückgrat der österreichischen Wirtschaft:

Kleine & mittlere Unternehmen (KMU)

- 99,7% der österreichischen Betriebe sind KMU (bis 249 Beschäftigte)
- 366.500 KMU beschäftigen mehr als 2 Mio. Menschen.
- 558 Mrd. € Umsatz werden jährlich von KMU erwirtschaftet.
- KMU tätigen 59% der jährlichen Bruttoinvestitionen.
- 2/3 aller Lehrlinge werden in KMU ausgebildet

Quelle: KMU im Fokus 2022 - Bundesministerium für Arbeit und Wirtschaft

Aber …

Enterprise …

boomt!

- Von “ob” zu “wie?”
- Treiber: Nutzung der modernsten Technologien & Erbringung von Business Mehrwerten
- !! Spezialisierte Partner gefragt, die auf diesem Weg begleiten !!

Fokus Themen für 2023/24:

1. Hybrides & sicheres Arbeiten
2. Optimierung von Geschäftsprozessen
3. Grenzenlose Daten- & Analysefunktionen

Security

Microsoft

Homeoffice/Remote Work, der neue Weg zu arbeiten?

Neue Spannungsfelder

Große Resignation

40%+ der Mitarbeiter kündigen oder denken darüber nach

Hybrides Paradoxon

Mitarbeiter wünschen sich flexibles Arbeiten aber gleichzeitig mehr persönliche Zusammenarbeit

Unternehmen müssen sich auf

Engagement & Produktivität

fokussieren, um wett-bewerbsfähig zu bleiben

Produktivitäts-Paranoia

87% der Mitarbeiter fühlen sich produktiv aber nur **12%** der Führungskräfte glauben, dass sie es sind

Next Generation AI

Eine völlig neue Art des Arbeitens

[3]Microsoft. Hybrid Work Is Just Work. Are We Doing It Wrong? September 22, 2022.

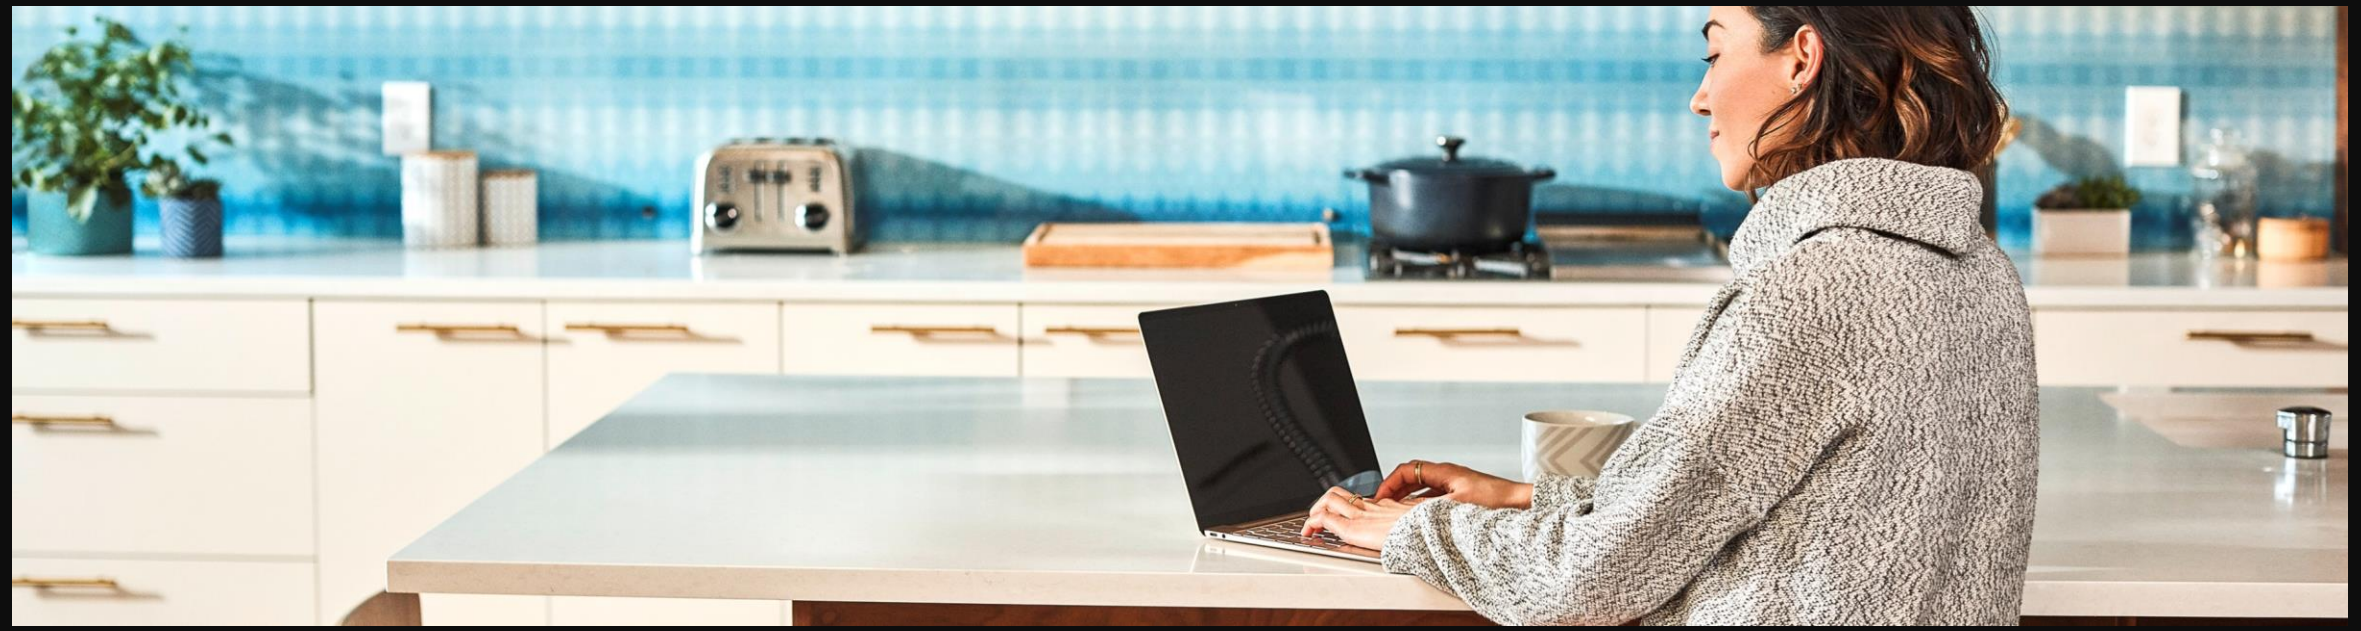

Im neuen Arbeits-Zeitalter sind Organisationen erfolgreich, die **Flexibilität fördern**

Das bedeutet nicht “immer eingeschaltet”;
es bedeutet “immer befähigt”.

Microsoft Cloud Solutions for End User Computing

Access a secure, desktop experience from virtually anywhere

Deliver desktop experiences virtually anywhere

Built-in intelligent security

Cloud scale and agility

Flexible pricing options

Cloud VDI can provide a flexible, cost-effective way to address current IT challenges and unlock new use cases

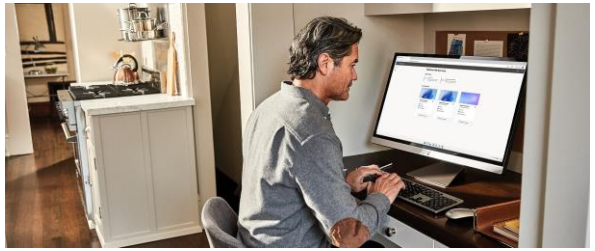

Data security

Improve regulatory compliance and IP protection via data centralization and a reduced threat surface.

High-capacity computing

Cloud-scale compute and storage to support specialized workloads like design and development.

BYOPC programs

Enable secure virtual desktops, even on personal devices.

Disaster recovery

Help ensure continuity and access for your workforce and company data even in the most challenging circumstances.

Temporary workforces

Simplify and accelerate the onboarding and offboarding process for elastic workforces.

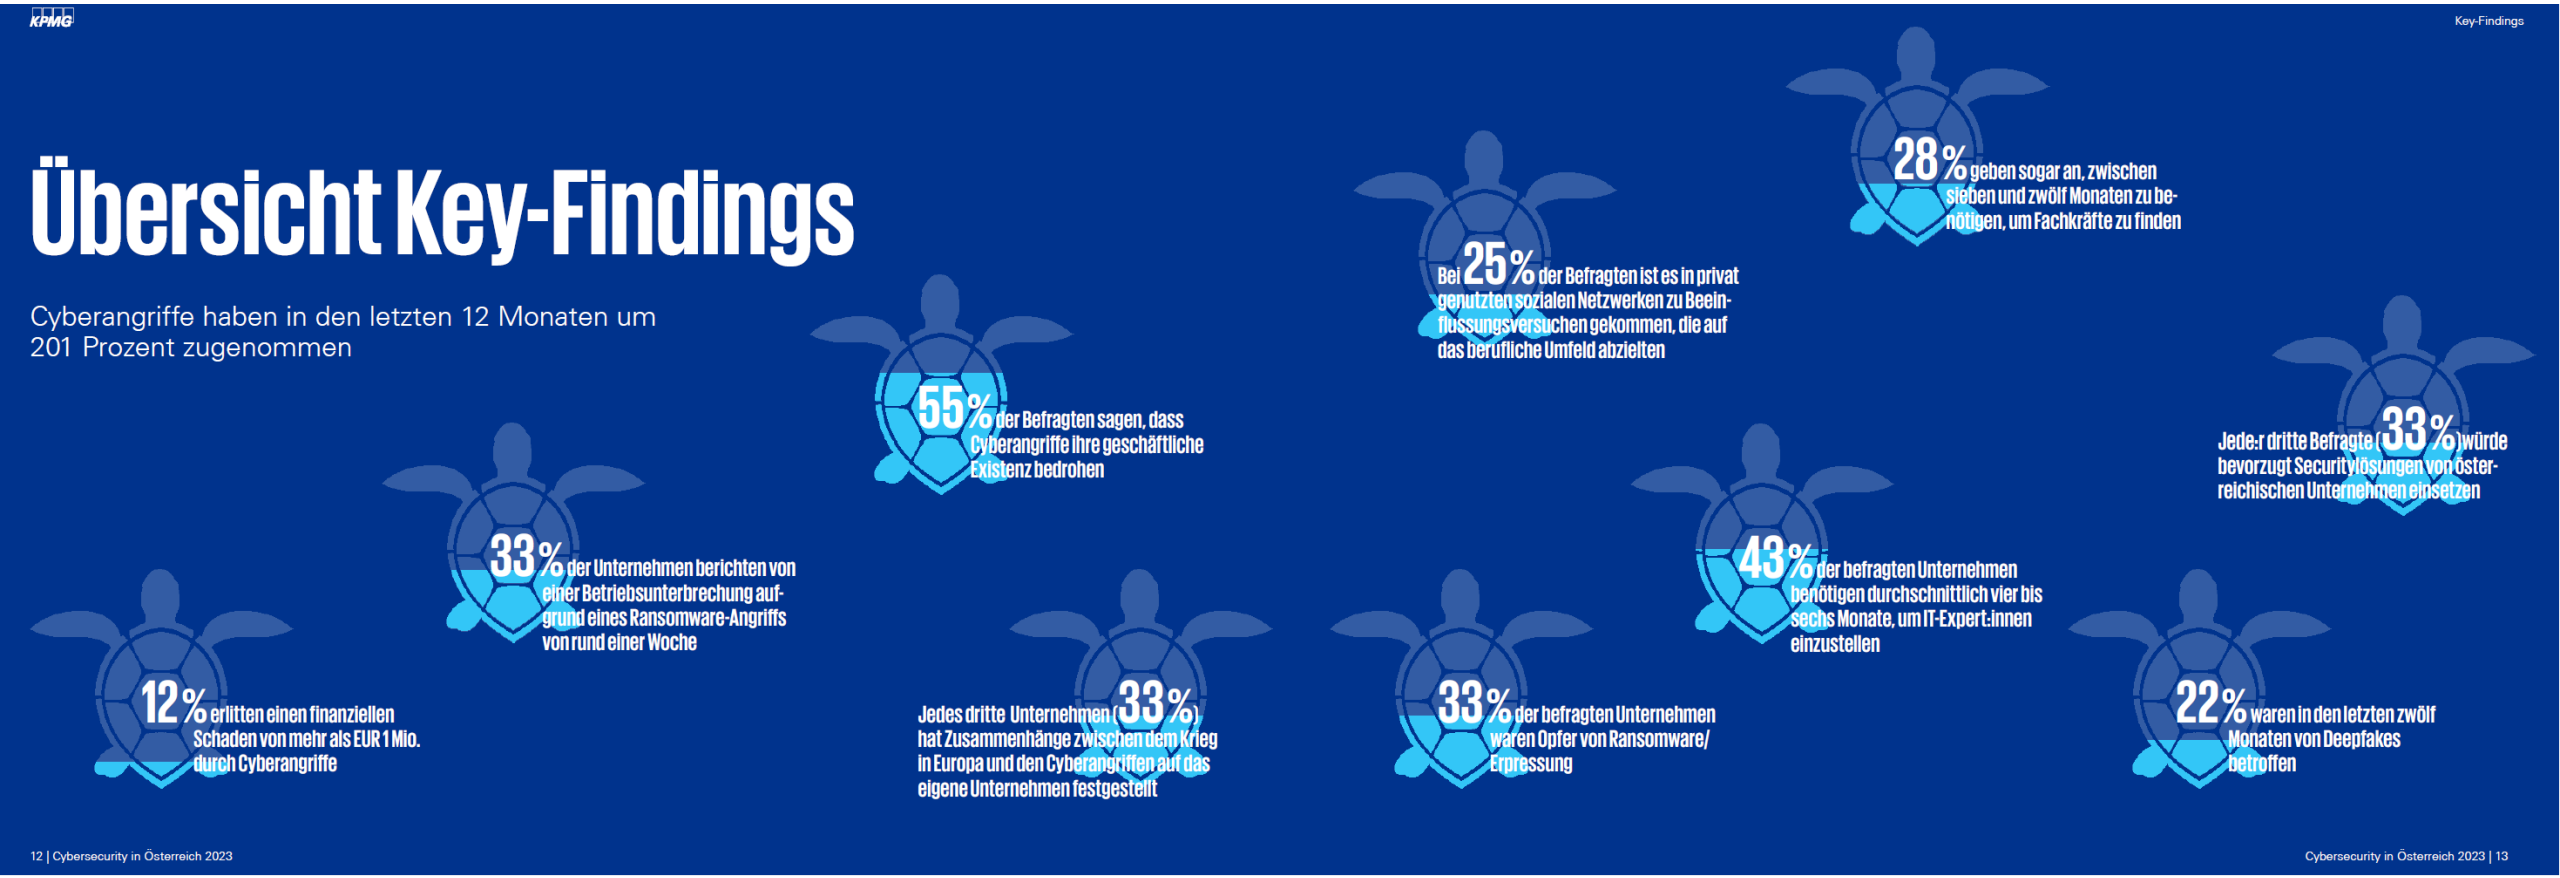

Mergers & Acquisitions

Provide seamless transitions and access for growing businesses.

JFK Files

The need
In 2017, more than 34,000 pages related to the JFK assassination were released. It would take researchers months to read through this volume of documents. How can we take in all this information and any new info that's released?

The idea
We can use Microsoft AI to understand and organize the vast flow of data—and also interpret handwritten documents and learn key topics. We can combine Azure Search and Cognitive Services together to create a solution to these problems.

The solution
Introducing Cognitive Search—an AI first approach to content understanding.

NEW

Azure Innovate Partner-led offers

Azure Specialized partners now have a path to directly nominate customers for Azure Innovate in a self-service workflow. This agile path reduces time to market and can help partners drive scale.

SUPPORTED ENGAGEMENTS

Azure Analytics

Build & Modernize AI Apps

Important: There are **no** limitations in Azure Innovate Partner-led for different licensing types (EA, CSP, etc.)

Customer Criteria: All Majors, SMC-(Corporate & Scale) and SMB (with a TPID) customers are supported in Azure Innovate Partner-led. (Strategic customers are not eligible)

Azure Innovate incentive payouts

Offer	Eligibility (Planned Azure consumption in year 1)	Partner payment*
Innovate MVP	Suggested project size: >$25K/year	$10,000
Innovate XS (Build & Modernize AI Apps only)	**Project size: $10K–$25K/year**	**$5,000**
Innovate Small	**Project size: $25K–$125K/year**	**$15,000**
Innovate Medium	**Project size: >$125K–$250K/year**	**$35,000**
Innovate Large	**Project size: >$250K–$500K/year**	**$50,000**
No Azure credits available for these engagements		

* See Microsoft Partner Commercial Incentives Guide for offer full details and requirements. Above project sizes are the planned Azure consumption in year 1, measured from project completion. Partner payment amounts may differ by country/Market A, B

Azure

Azure Migrate and Modernize Partner-led offers

UPDATED

Azure Specialized partners now have a path to directly nominate customers for Azure Migrate and Modernize in a self-service workflow. This agile path reduces time to market and can help partners drive scale.

SUPPORTED ENGAGEMENTS

1. Infra/Database migration
2. Migrating to Azure VMware solution
3. Migrate Enterprise apps
4. Virtual desktop infrastructure
5. SAP migration to Azure
6. SAP RISE
7. ISV SaaS & BYOL

Important: There are **no** limitations in Azure Innovate Partner-led for different licensing types (EA, CSP, etc.)

Customer Criteria: All Majors, SMC-(Corporate & Scale) and SMB (with a TPID) customers are supported in Azure Innovate Partner-led. (Strategic customers are not eligible)

AMM incentive payouts

Offer	Eligibility (Planned Azure consumption in year 1)	Partner payment*
Migrate & Modernize assessments	Suggested project size: **>$25K/year**	**$5,000**
Migrate & Modernize XS (Infra/DB migration only)	Project size: **$10K–$25K/year**	**$5,000**
Migrate & Modernize Small	Project size: >**$25K–$125K/year**	**$15,000**
Migrate & Modernize Medium	Project size: **>$125K–$250K/year**	**$35,000**
Migrate & Modernize Large	Project size: **>$250K–$500K/year**	**$50,000**
Migrate & Modernize XL (Infra/DB migration only)	Project size: **>$500K–$750K/year**	**$75,000**
Migrate & Modernize XXL (Infra/DB migration only)	Project size: **>$750K–$1M/year**	**$100,000**
Customer Skilling & FastTrack for Azure is optional for all offers ** No Azure credits available for these engagements		

Important: To request Customer Skilling OR FastTrack for Azure support.
Please email AzurePartnerOffering@microsoft.com with the Claim ID of the engagement after customer consent has been secured.

* See Microsoft Partner Commercial Incentives Guide for offer full details and requirements. Above project sizes are the planned Azure consumption in year 1, measured from project completion. Partner payment amounts may differ by country/Market A, B

** Customer self-directed skilling available in the Resources section of this presentation. Available for all offer sizes.
Offer size Medium or larger qualifies for Enterprise Skills Initiative which includes an assigned Training Program Manager.

Workload Acquisition & Nurture

Rewards partners for driving Azure consumed revenue in eligible customers with one of 4 workloads, Azure Core, AI Apps, Analytics and Security

How to earn

Rewarding our technically verified partners for the higher cost of sales involved in working with new to Azure, new to workload customers.

Partner Eligibility	Partners hold one or more aligned advanced specializations before each eligibility milestone (7/1, 10/1, 1/1, 4/1).
Customer Eligibility	H1 Cohort: Customers workload consumption is < $3K average over March, April and May prior to 7/1/2022. H2 Cohort: Customers workload consumption is < $3K average over Sept Oct and Nov prior to 1/1/2023.
Criteria	Partner triggers the acquisition milestone by achieving > $3K average workload ACR across the trailing 3 month period.
Target Customers	Partners will be able to access a target list of customers via the Secure Partner List Sharing tool.

Incentive Details

Milestone	Incentive	Notes
Acquisition	$9K	Per workload
Nurture	Up to 30%	9 months following acquisition.
Cap	$75K	Per workload, per customer
Incentive Period	FY24	Note: Nurture period continues for 9 months even into the next FY.
Partner Attribution	PAL or CSP	New Commerce Experience only

Quick FY24 Update from FY23…

- Expansion of customer eligibility into additional small and medium-size businesses)

Sicheres, modernes Arbeiten mit Microsoft 365

Top challenges for remote work

How can we do distributed work better?

How can we maintain security?

How can we reduce our costs?

Employees working from multiple locations

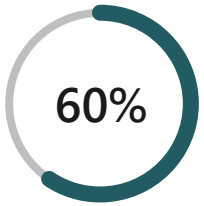

Multitude of personal and mobile devices

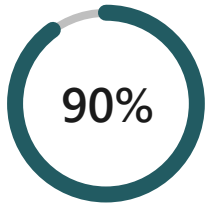

Increased phishing and ransomware

Security is more important than ever to SMBs

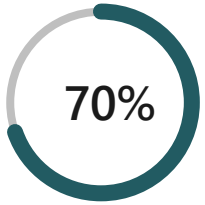

of businesses close permanently within six months of an attack.[2]

SMBs would consider hiring a new MSP if they offered the right cybersecurity solution[1]

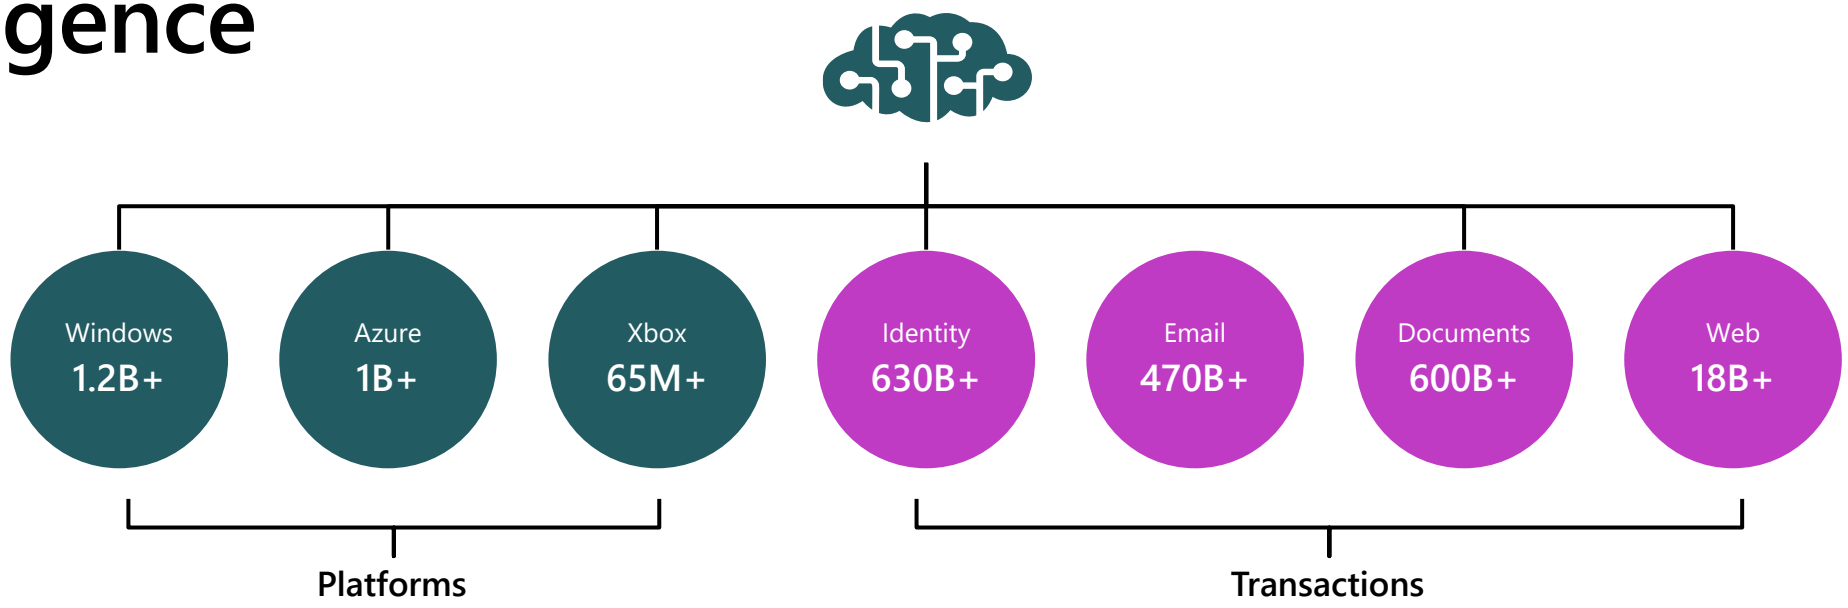

Nearly one in four SMBs state that they had a security breach in the last year[1]

Over 70% of SMBs think cyber threats are becoming more of a business risk[1]

1. Microsoft commissioned research, April 2022, US SMBs 1-300 employees
2. Why small businesses are vulnerable to cyberattacks, May 2022

Microsoft's unique advantage point on security intelligence

300B
User activities profiled and analyzed in 2019

2.3B
Endpoint vulnerabilities discovered daily

11B
Malicious and suspicious messages blocked in 2019

12B
Cloud activities inspected, monitored, and controlled in 2019

POSITIONING

Using scenarios and use cases to position the Microsoft 365 Premium SKUs* value to customers

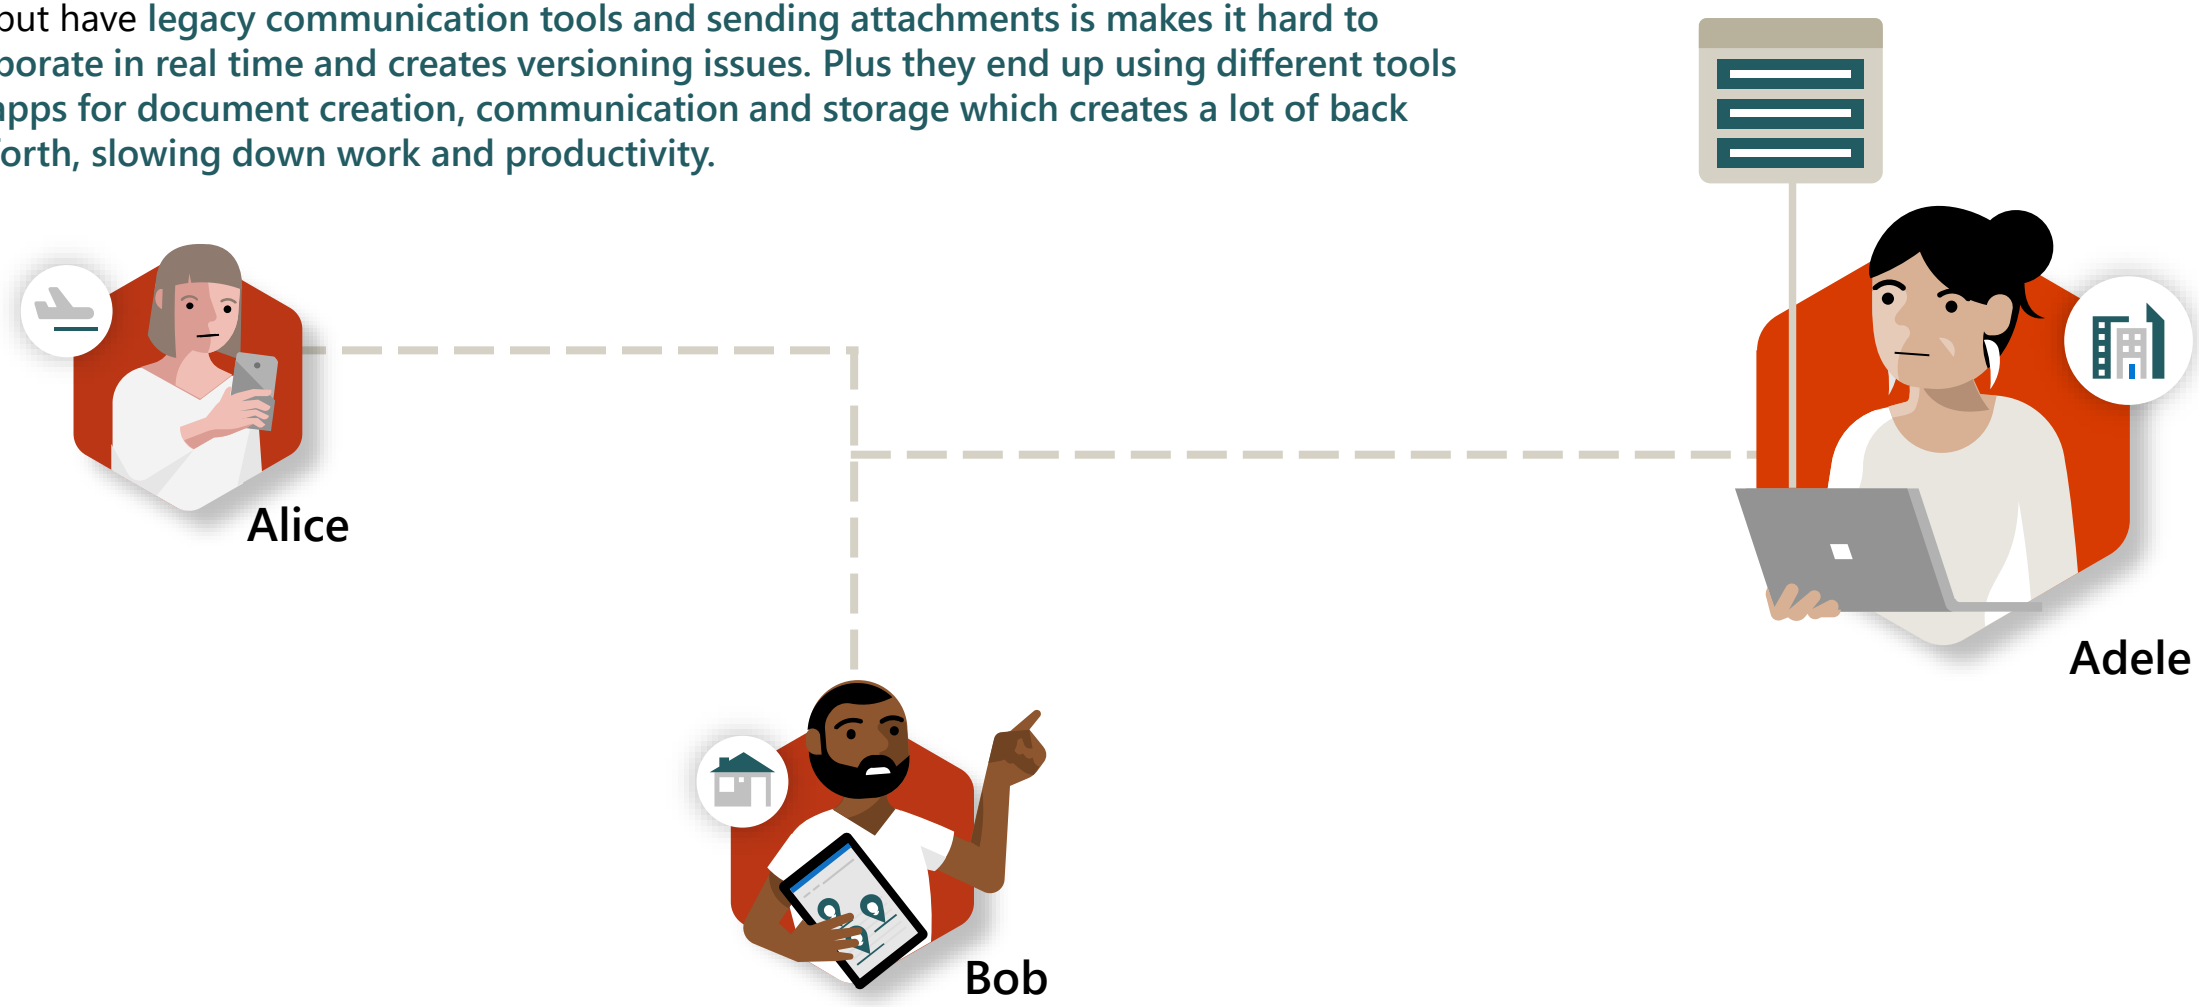

* Premium SKUs = Microsoft 365 Business Premium; E3 + E5

POSITIONING

Challenge

Legacy communication tools

Employees on the sales team at Northwind Traders are working remotely. They need to communicate with management on pricing options for customers and vendors to close a big deal but have **legacy communication tools and sending attachments is makes it hard to collaborate in real time and creates versioning issues. Plus they end up using different tools and apps for document creation, communication and storage which creates a lot of back and forth, slowing down work and productivity.**

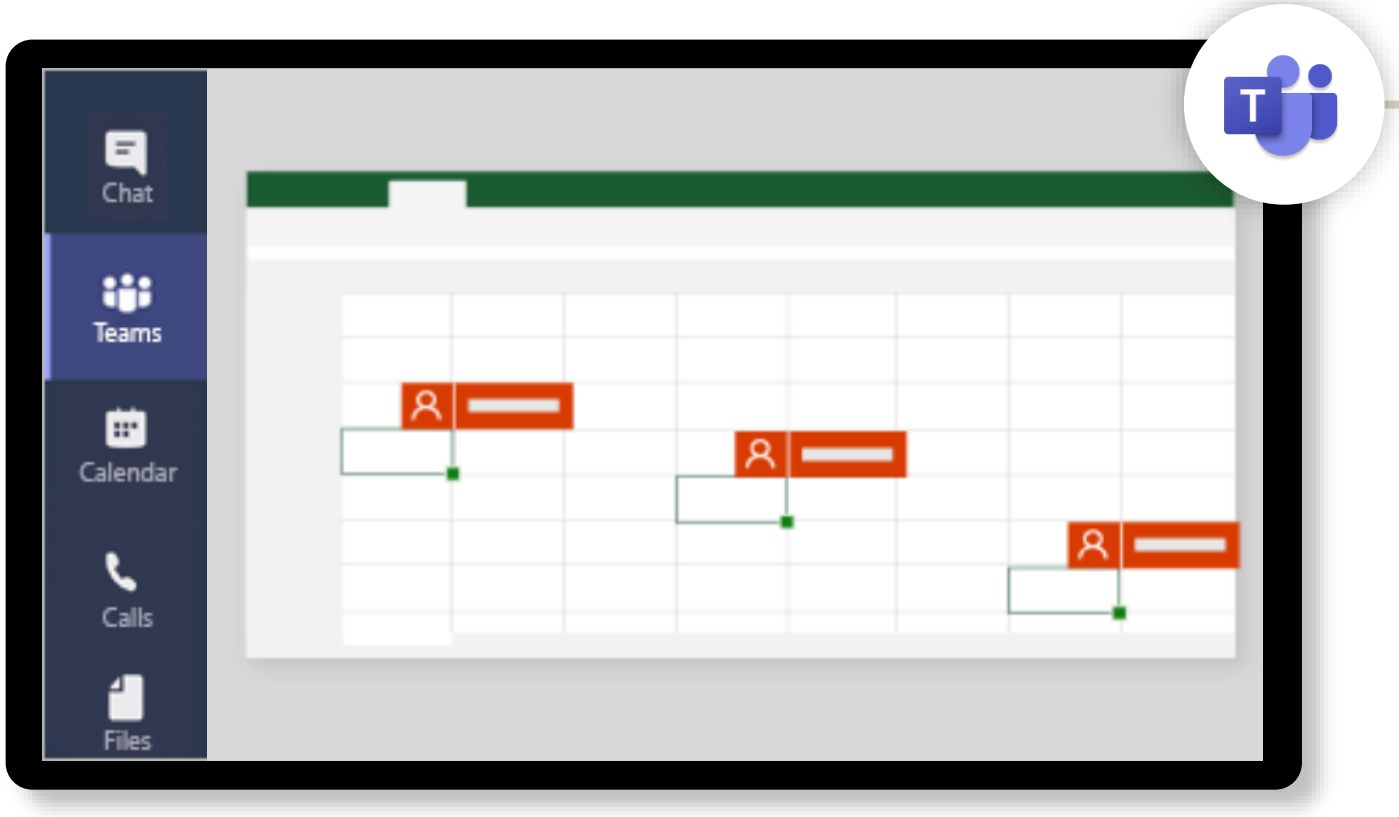

POSITIONING

Solution

Organize files and collaborate in real-time

With **Microsoft Teams** as part of Microsoft 365 Business suites, the sales team can share files, individually or with their, using a single tool.

Alice can co-author documents in real-time or embed apps and third-party services in her flow of work, giving her time back to focus on addressing new business opportunities and closing more deals.

With Microsoft Teams, Alice can

- Create a team for each of her v-teams
- Structure her content and teamwork in Channels
- Synchronize that content offline using OneDrive
- Co-author with colleagues on documents
- Embed apps and services in her flow of work

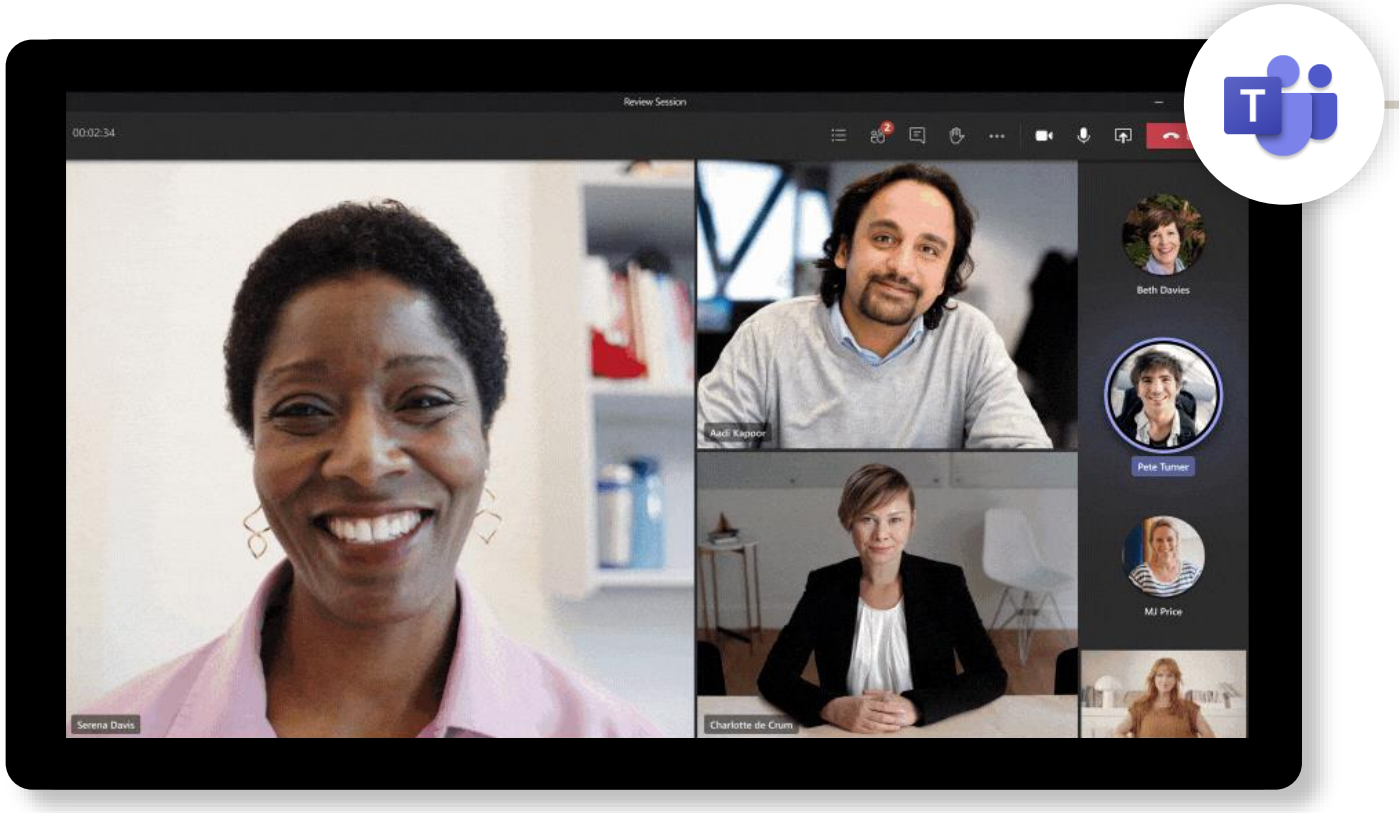

POSITIONING

Schedule and join meetings

Solution

With **Microsoft Teams** as part of Microsoft 365 Business suites, the sales team can schedule and join meetings on any device.

Alice can create scheduled meetings with recurring option, enabling a rich meeting experience with high quality audio and video.

With Microsoft Teams, Alice can

- Schedule meetings (including recurring)
- Join meetings using any device
- Add high quality video to any meeting
- Use apps to enhance the meeting experience
- Share content and screens

POSITIONING

Add-on Solution

Handle phone calls in Microsoft Teams

With **Microsoft Teams Phone**, available as add-on for Microsoft 365 Business suites, the sales team can now **make and receive phone calls right from the Microsoft Teams app** on desktop, mobile, web browser and dedicated Teams phone devices.

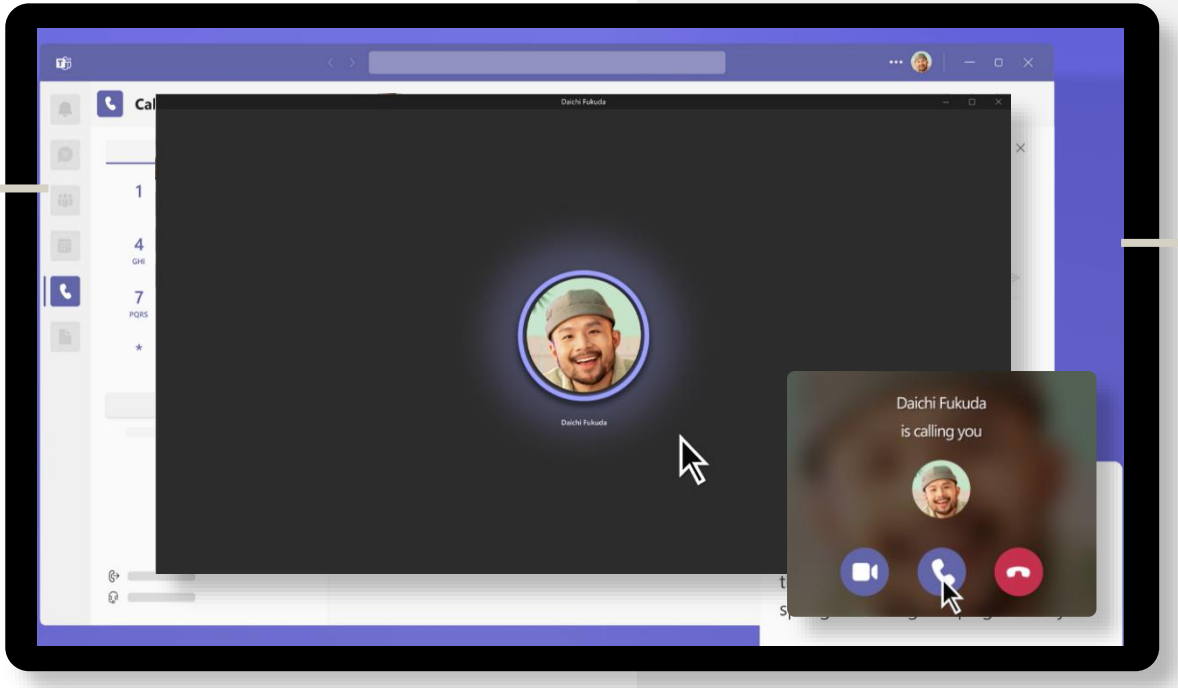

As IT professional, Bob gets an **easy to manage enterprise-grade phone solution** embedded into the management Tools he knows. Even setting up an Auto Attendant or Call Queue is just a few minutes of work.

With Microsoft Teams Phone, Bob can

- Manage the solution with familiar tools
- Use existing operator contracts
- Save on management and adoption costs

With Microsoft Teams Phone, Alice can

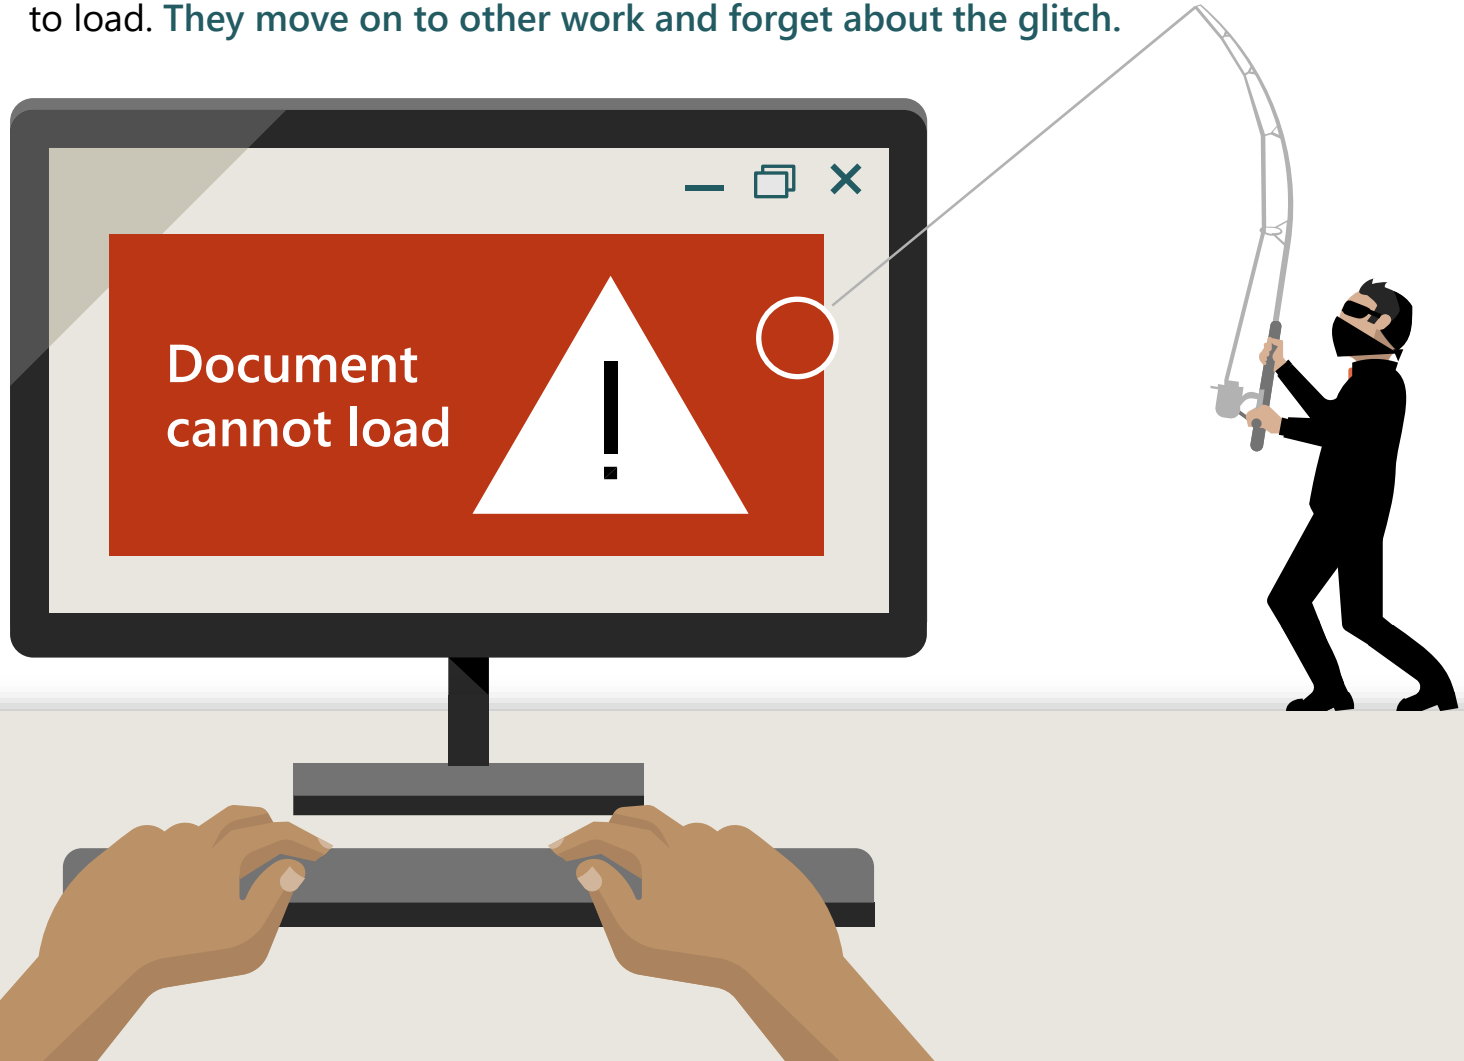

- Make and receive calls from Microsoft Teams
- Easily create Auto Attendants and Call Queues
- Receive voicemail with text-based transcripts

POSITIONING

Phishing attacks

Challenge

A Northwind Traders employee receives an email with a link to a secure document, ostensibly from a well-known organization. They enter their credentials to view the document, but the document fails to load. **They move on to other work and forget about the glitch.**

This was a phishing attack. They just delivered their username and password to hackers, who can now use it to access email and other online accounts, including Northwind Traders systems and data.

250%

Increase in phishing email detections from January to December 2018 worldwide.[1]

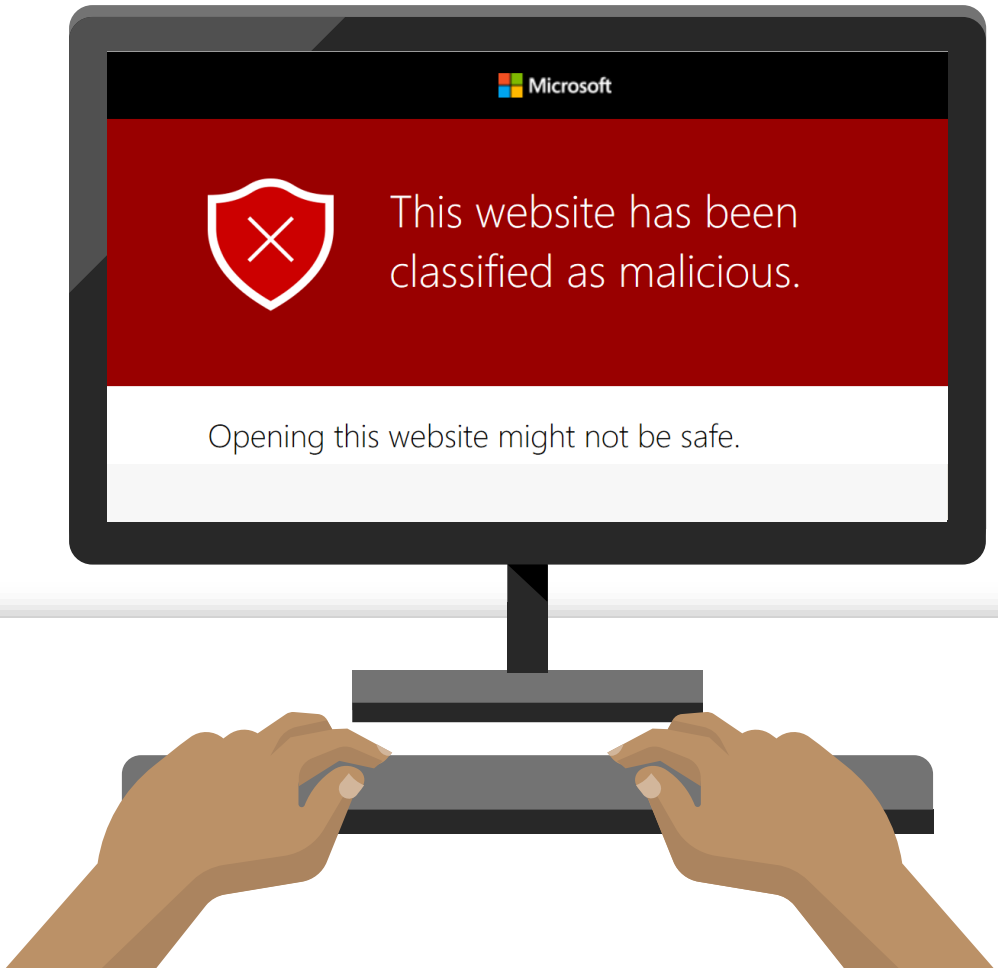

[1]*Source: Microsoft Security Intelligence Report Volume 24, February 28, 2019*

POSITIONING

Solution

Sophisticated phishing defenses

With Microsoft 365 Business Premium, a Northwind Traders employee receives an email with a link to a secure document. The link is "sandboxed", and the user is alerted to the threat.

Microsoft 365 Business Premium comes with Microsoft Defender to protect against phishing attacks.

Time of click protection against malicious links

URL detonation

Anti-spoofing technology

Multi-factor authentication

Microsoft uses artificial intelligence to identify and protect against emerging threats in real-time.

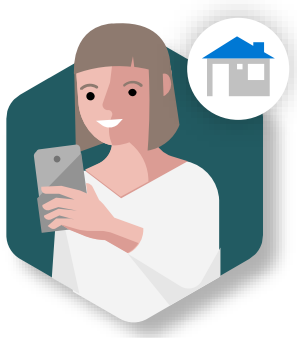

POSITIONING

Work data on personal devices

Challenge

A Northwind Traders marketing manager is using her personal phone to check company email. She receives a confidential business plan and saves it for later reference. **She accidently saves to a personal share which is not secure.**

64% of SMBs allow employees to access work data on personal phones and computers.[1]

[1]*Source: Microsoft Internal Research of SMBs (2-299 employees)*

POSITIONING

Solution

Protect work data on personal devices

With Microsoft 365 Business Premium, you can set up Intune App Protection Policies, so work apps can be separated from personal apps. Administrators can specify that work documents and attachments are only saved on authorized and secure work share like OneDrive for Business, safeguarding sensitive work information.

58% of employee devices on average are configured with proper security protocols and fewer than **1 in 5** saying that all employees undergo security training.[1]

[1]*Source: A commissioned study conducted by Forrester Consulting on behalf of Microsoft, October 2019 survey of SMBs (1-499 employees)*

Is Microsoft 365 Business Premium really cost competitive?

Simplify your technology investment and help reduce cost

Security, Identity and Device Mgmt

Remote access solutions	$5
Advanced Email protection	$5
Single Sign-On	$2
Conditional Access+ MFA	$6

Device management	$4

Collaboration and Productivity

Productivity apps and file storage	$12
Chat based collaboration	$6.67

>€44

monthly cost of 3rd party solutions[1]

€20,60

monthly via Annual SKU

Microsoft 365 Business Premium

One solution to run your business securely, from anywhere

New! Microsoft Defender for Business Premium customers generally available in Microsoft 365 Business Premium

[1]Estimates based on published prices ; Price subject to changes
File Storage and Productivity apps – Google Workspace $12 (unlimited storage) Online chat-based collaboration – Slack $6.67
Single Sign On– Okta $2; Adaptive MFA (Conditional Access+ MFA) – Okta $6
Device Management - IBM MaaS 360- $4.00, Endpoint Protection: Sentinel One Complete (Antivirus with EDR) $8, Proofpoint email protection - $5
Remote Access: Windows Terminal server CAL ($199 perpetual per user; over 3 years – per month would be around $5); TeamViewer - $49 per user per month

AI for everyone

Teams Premium & Bing Chat Enterprise

Microsoft Teams

Microsoft Teams Premium

Focus: AI value added only

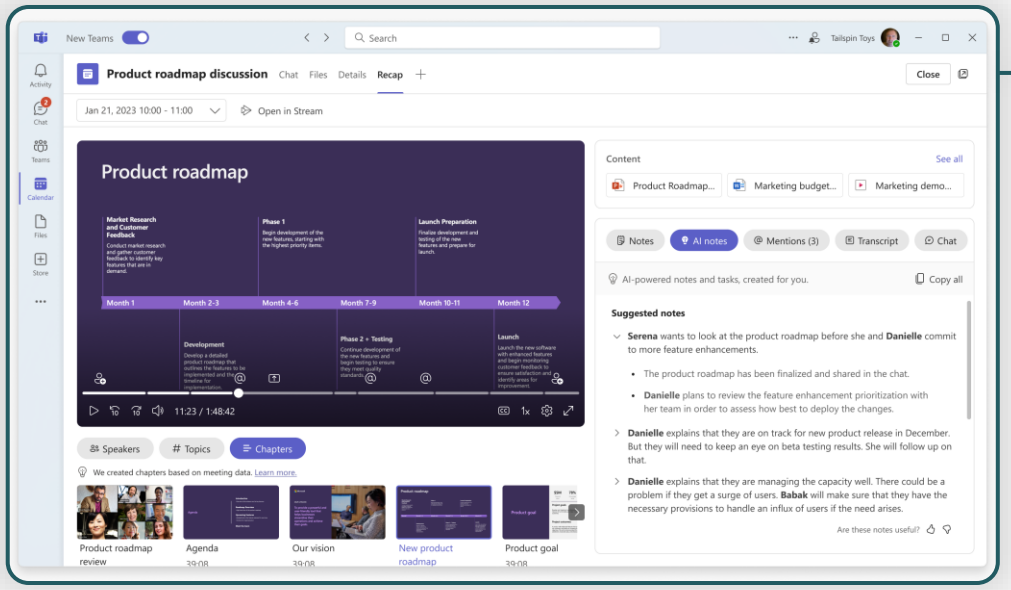

Intelligent productivity

Focus on what matters most with meetings powered by AI, including GPT from OpenAI

80%

of people are comfortable with AI summarizing their meetings and action items[1]

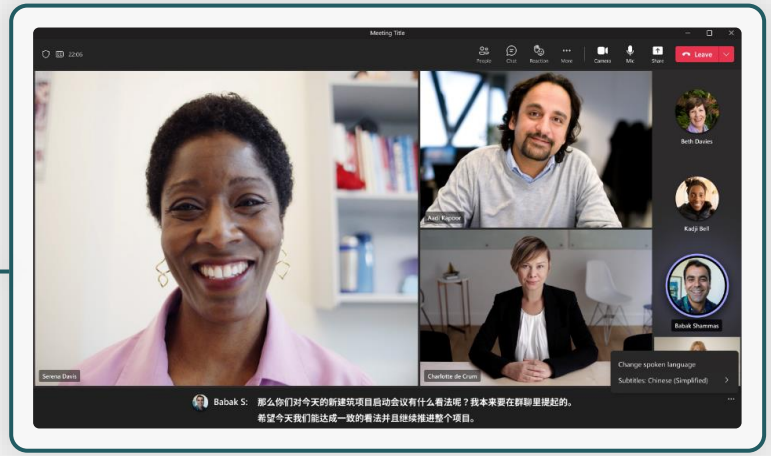

Save time and effort with intelligent meeting recap

Use AI-generated meeting notes and tasks for key points and action items

Quickly discover important moments in the meeting, such as when your name was mentioned, a screen was shared, and when you've joined or left—only visible to you

Speaker timeline markers allow you to jump to different speakers—organized by those you work most closely with

Chapters and topics divide the meeting into sections so it's easy to jump right to where you would like to review

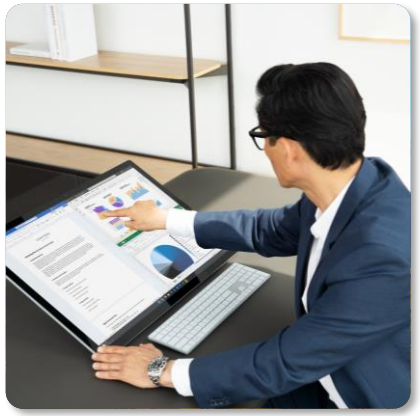

Break down language barriers

Turn on live translated meeting captions in your chosen language

[1] Microsoft 2023 Work Trend Index: Annual Report by Edelman Data x Intelligence, May 2023

Use intelligent meeting recap to save time and stay focused

Michael, an operations manager, can't attend a big meeting tomorrow due to conflicts in his schedule, but he needs to know what was discussed.

Instead of digging through transcripts and recordings or scheduling another meeting, he uses **intelligent recap** to get **AI-generated notes and tasks** after the meeting ends.

Michael reviews **chapters** within the meeting's recording and **topics** to quickly catch up on the conversation's main subjects.

With **personalized timeline markers**, Michael quickly locates what his manager said during the meeting and when his name was mentioned, and jots down the questions he has for next week.

Using **AI-generated tasks**, Michael knows exactly what action items he needs to follow up on without having to watch the entire recording or ask a teammate. He feels connected and productive despite missing the meeting.

Bing Chat Enterprise

Ignite Update:

- Bing Chat,Bing Chat Enterprise, Windows 11 Copilot renamed: **Copilot**
- GA: Dec 1st
- Free for users of: Microsoft 365 Business Standard, Business Premium, E3+E5, A3+A5, F3(soon)

Employees want AI-powered chat, but companies have data security and privacy concerns

92% of technical professionals and business decision makers say they have used or tried an AI tool or service

Employees using AI-powered chat through public web services are putting corporate data at risk

Some large corporations discourage employees from using AI tools because of data leakage risks

**State of AI: Microsoft Tracking Study, June 2023*

Why Bing Chat Enterprise?

It’s powerful and protective

Powerful AI models

Bing Chat Enterprise uses GPT-4 for text and DALL-E 3 for images, the latest in AI models

Transparent about sources

Bing Chat Enterprise cites the data sources behind its answers

No knowledge cutoff

Bing Chat Enterprise provides up-to-date answers. Answers are not limited by the date of the AI model

Commercial data protection

Bing Chat Enterprise doesn’t save prompts or answers, nor use them to train the AI model

Bing Chat Enterprise is a great way to get started with AI

Powerful

Generates answers using GPT-4 and DALL-E 3, the latest in AI models

Protective

Commercial data protection for your confidential information

No additional payment

On Microsoft 365 E5, E3, A3 or A5 (faculty), Business Standard and Business Premium.

Get to know Bing Chat Enterprise

Start at www.Bing.com/chat

Here is a visual tour of Bing Chat Enterprise:

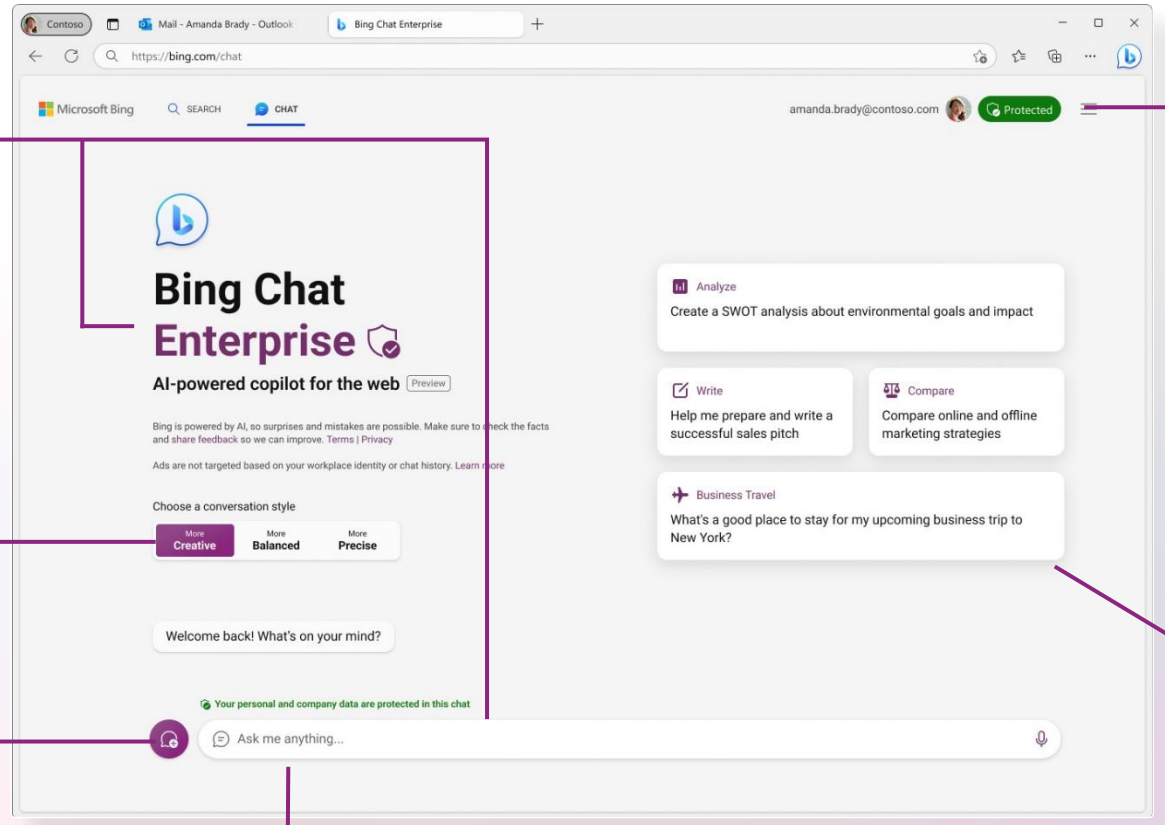

There are additional cues that let you know that you are in the protected Bing Chat Enterprise experience (the name and green text).

Conversation styles

For work, we recommend remaining in the default style (**Creative**) for the most comprehensive answers with the power of GPT-4.

Start a new chat button

Clear your past chat and start a new conversation topic.

Protected badge

Ensure you're signed in with your work account and see that you're Protected. If the green tag is missing, sign in with your work account.

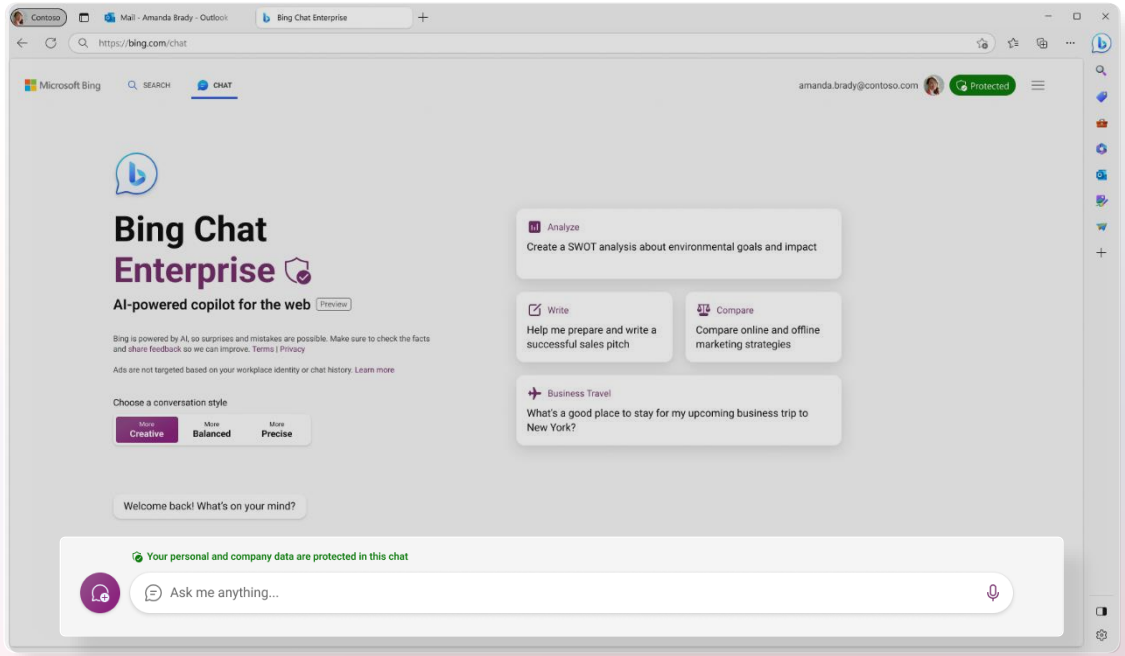

Suggested prompts

If you're not sure what to ask, try or modify a sample prompt!

Text box

Enter your question (your "prompt") here.

What is a “prompt?”

Get started by entering your question in the text box

A **prompt** is the question or instruction you enter in the text box. This is what Bing Chat Enterprise will respond to.

Use natural language. There’s no need to break your idea or question down into keywords.

Classic search is about keywords to get a list of sources. **Chat is about detailed questions or statements, to generate a custom answer for you.**

Enter your first prompt in the text box at the bottom of your screen.

What makes an effective prompt?

Effective

- ✓ **Specific and detailed**
- ✓ In full sentences, with instructions
- ✓ States the tone, purpose, preferred format, etc.

Example: *Recap the findings of the article I've copied below and include the top 3 concerns. Provide the answer in two to three paragraphs and use a business tone.*

Less Effective

- × **Vague**
- × Just a few words
- × No context on preferred output

Example: *Recap article.*

The recap may be more vague than desired, or in a format that you were not seeking.

But there are no 'wrong' prompts because **natural, conversational language is welcome**. Experiment away!

MCI Pilots Stages

Stages	Stage 01 Customer Identification	Stage 02 Claim Customer	Stage 03 Customer Consent	Stage 04 Execution & POE Submission	Stage 05 POE Validation	Stage 06 Payment
Activity	**Microsoft** initiates Pilot opportunity, secures customer and partner commitment, shares Partner Center referral with partner. **Partner** receives Partner Center referral, and separate email from Microsoft with details necessary to claim customer.	**Microsoft** updates MCI to reflect partner and customer eligibility. **Partner** claims customer **within 60 days** of Pilot confirmation email.	**Partner** requests customer consent for engagement. **Customer** consents to Pilot engagement. Claims without customer consent automatically expire.	**Partner** completes engagement per Pilot requirements, submits POE for approval. Claims without POE approval automatically expire.	**Microsoft** approves or declines submitted POE. **Partner** may append or update POE based on MCI Operations Team guidance. Claims without approved POE automatically expire.	**Microsoft** processes payment for claims with approved POE.
Timeline			30 days max from MCI claim date	90 days max from consent date	30 days max from claim submission date	45 days max from claim approval month end

Notes:

- Eligible customers must have active sales opportunity in Microsoft Sales CRM(MSX).
- Eligible partners must be attached to a Microsoft opportunity and meet partner eligibility requirements
- After an opportunity has been shared and communicated by Microsoft, partners will then reflect as eligible in MCI for a pilot and may claim the specified customer.

- Zielsegment Endkunden KMU > 50 Mitarbeiter

Program Comparison: MCI Cybersecurity Assessment vs CSAT

MCI Solution Assessment
(1st party)

Evaluates customers cybersecurity posture and reduce their risk exposure by **using Microsoft Security products**: Microsoft Defender Vulnerability Management, Secure Score, Microsoft Purview for IP, Content Explorer and Insider Risk.
Runs via E5 Trial License.

Solution Assessment/CSAT
(3rd party)

An independent assessment of customer's Security & Compliance posture based on facts. It offers prioritized risk mitigation recommendations with appropriate MSFT security solution (M365/ Azure). **Recommendations aligned to CIS 8.0, Zero Trust Framework and NIS2.**
Runs via 3rd party scan/license (self-destruct after scan)

When to Use

When you have a customer interested in a deeper understanding of Microsoft security products and how they solve an identified or foreseen security risk

When a customer's security position is unknown and looking for detailed analysis on their real time threats and vulnerabilities across their data estate

Security – Cybersecurity Assessment (MCI)

Engagement Summary

The Cybersecurity Assessment is designed to evaluate a customers cybersecurity posture and reduce their risk exposure by using advanced Microsoft Security products: Microsoft Defender Vulnerability Management, Secure Score, Microsoft Purview for Information Protection Content Explorer and Insider Risk. The engagement is expected to require about a 1.5-day partner effort. The Cybersecurity Assessment is delivered in the customer's production environment by evaluating their current cybersecurity maturity level, discovering and addressing vulnerabilities on clients and servers, and understanding risk related to data security and insider threats. The Cybersecurity Assessment will provide recommendations and guidance on the next steps to improve their cybersecurity posture and reduce risk exposure based on the assessment findings.

Engagement Term

Oct. 1, 2023, through June 30, 2024

Partner Eligibility

Partner Agreement
Microsoft Cloud AI Partner Program Agreement

Program Enrollment
Microsoft Commerce Incentives

Partner Qualification
Solutions Partner for Security Designation

Customer Qualification

- 500-5000 users with active Windows devices*, and
- 500 -5000 Paid Available Units (PAU) for Exchange Online, SharePoint Online or Teams and
- 50+ Monthly Active Users (MAU) for Exchange Online, SharePoint Online or Teams

* Eligible number of active Windows devices should be confirmed with customers pre-engagements to ensure all activity requirements can be met.

Measure and Reward

MCI Activity Payment: Market A = $2.5K, Market B = $1.5K, and Market C = $750. Also available to run in CSI for $5K.

Activity Requirements

For the Cybersecurity Assessment Engagement to be considered complete, a partner is required to deliver the following activities:

- Analyze the customers' production environment and their current cybersecurity maturity level based on v8 of the CIS Critical Security Controls.
- For the assessment tools to work properly and for POE approval, customer must have 500-5000 active windows devices.
- A vulnerability assessment using:
  - Microsoft Defender Vulnerability Management
  - Microsoft Secure Score
- A data security assessment using:
  - Microsoft Purview Information Protection Content Explorer
  - Microsoft Purview Insider Risk Management Analytics
- An optional Cloud Application discovery using Microsoft Defender for Cloud
- Provide recommendations and next steps:
  - Map the engagement findings to common threat scenarios, allowing the customer to see their cybersecurity maturity in relation to common cybersecurity threats.

Free Security Assessment for SMB customers powered by CSAT Quickscan (QS Solutions)

Rapid Security Assessment | What You Get

Objective: Provide Microsoft partners and customers with Rapid Security Assessments that can help **drive data-driven implementations** of security policies, procedures, and tools using built-in reports to support **migration plans** to improve security based on CIS Controls and the Zero Trust framework.

1

CSAT Scan and Analysis

- Scans an organization's endpoints via CSAT QuickScan, as well various additional data sources in a customer's on-premise and cloud environments.
- Collects and analyzes data from the hybrid IT environment with a 4-6 hour scan to provide data-driven recommendations.
- Classification of security threats identified during the scan based on Microsoft's Zero Trust framework.

2

CSAT Questionnaire

- Collection of additional information about the customer security-related policies and procedures that cannot be gathered from the CSAT scan.
- Asks questions to evaluate customer's security-related policies, process, procedures, identity and data management, among others.

3

CSAT Report

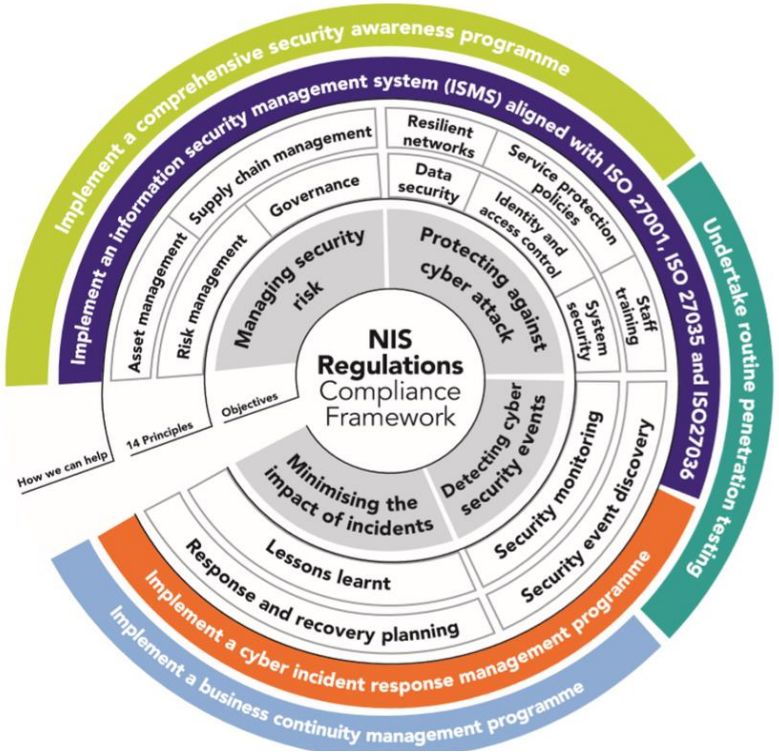

The SMB Desk will provide a report outlining key findings and high-level recommendations in support of improving the organization's cybersecurity posture, including:

- An organizational security maturity score **based on CIS Controls v8 –NIS 2.0 ready**
- Data-based recommendations ranked by level of urgency and probability of a security issue – i.e. quick wins and longer term actions.
- Identification of MS security products associated with recommendations to upsell and/or deploy additional licenses, products, and services.

Was kann ich seit dem 01.10.2023 beantragen?

Variable Payout - Select one or more engagements vs MSX Opportunity ID:

Envisioning
$12,000

Identify opportunities for digital transformation and expand deal size

Business Value Assessment
$12,000

Establish **business case** by connecting desired business outcomes to product capabilities

Solution Assessment
$7,000

Tailor **solution roadmap** for how organization will achieve digital transformation goals

Power Center of Excellence (PCOE)
$12,000

Drive best practices, ensure **governance and administration** of technology and processes

AIM Assessment
(Migrations)
$5,000

Help on-premises Dynamics customers **start their cloud migration journey** by articulating the value of AI and Dynamics 365, including: Functional, Technical, and Customization elements

Tailored Demo
(Available for SMB, SMC)
$12,000

Showcase solution value with **customer's own scenario** and data

Payout = Lower of 2 calculations:
- # of engagement delivery hours * Market Rate by Partner Location
- 7.5% of MSX Opportunity Size

Definitions
- **MSX Opportunity** Size - Annual revenue opportunity across Dynamics 365 and Power Platform products. Based on actual 12-month billing expected. Minimum ACV = $**20,000** USD.
- Annual Contract Value – **EA licensing** – Average annual value across the 3/5-year deal; **CSP licensing** – 12 – month billing period.
- Min **Inspire stage**

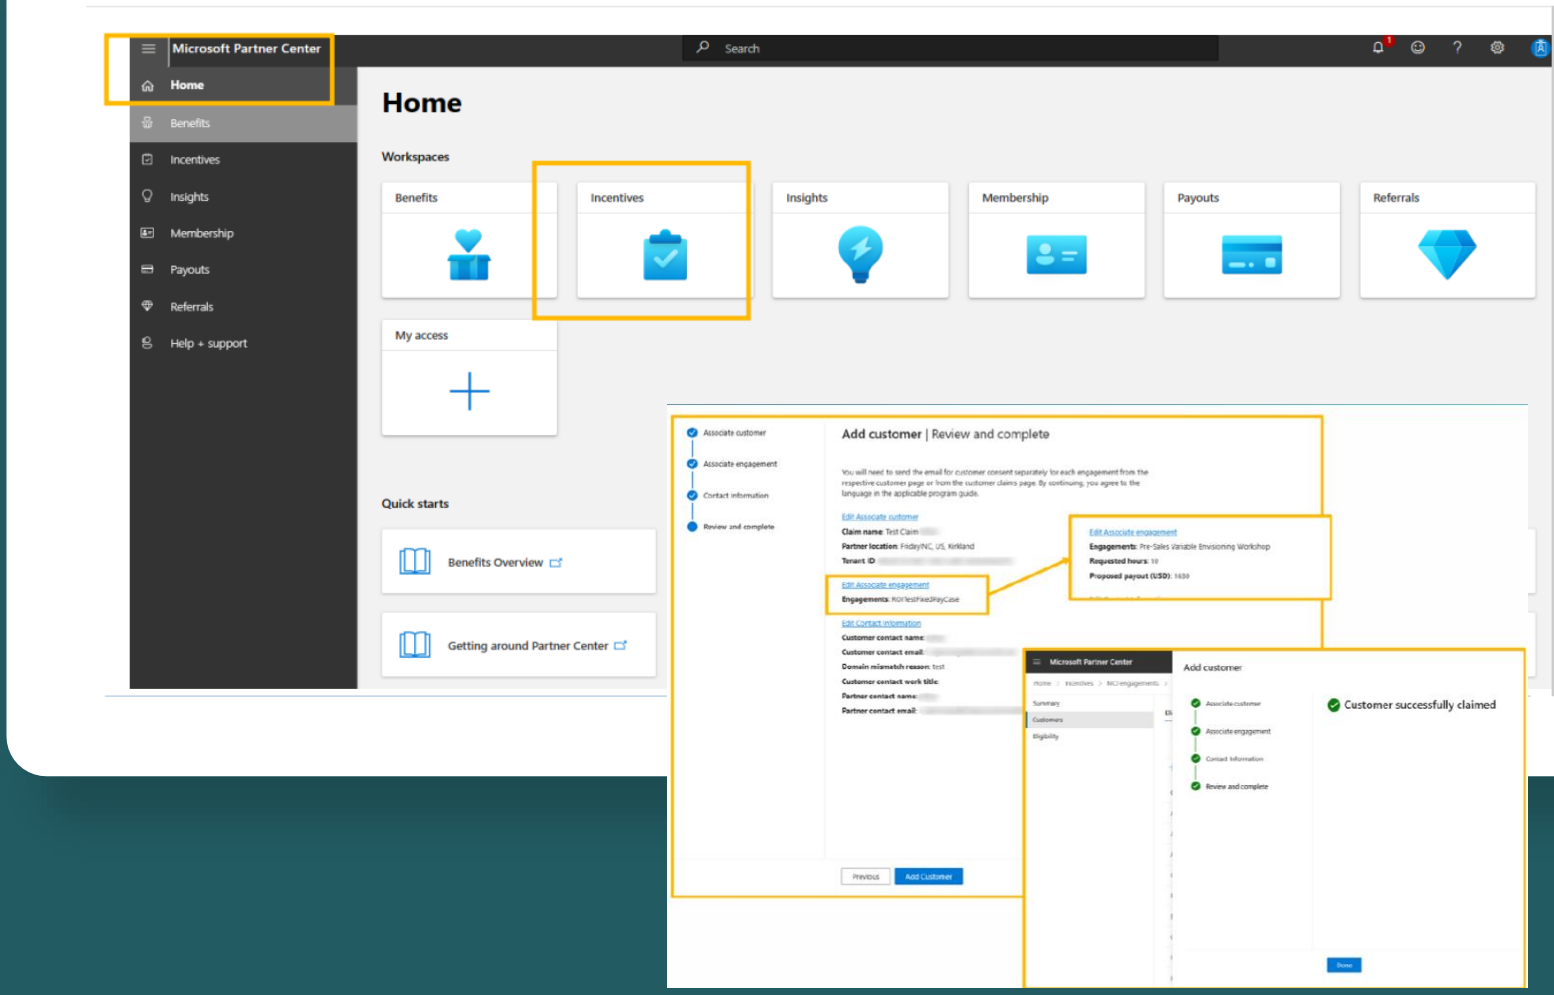

New Fixed Fee Needs Assessments + AIM
(Needs Assessments= SMB)

Demonstrate solution value *for:*
- D365 Sales - **$1,500**
- D365 Business Central - **$1,500**
- Power Platform - **$1,500**
- AIM (Migrations - **$3,500**

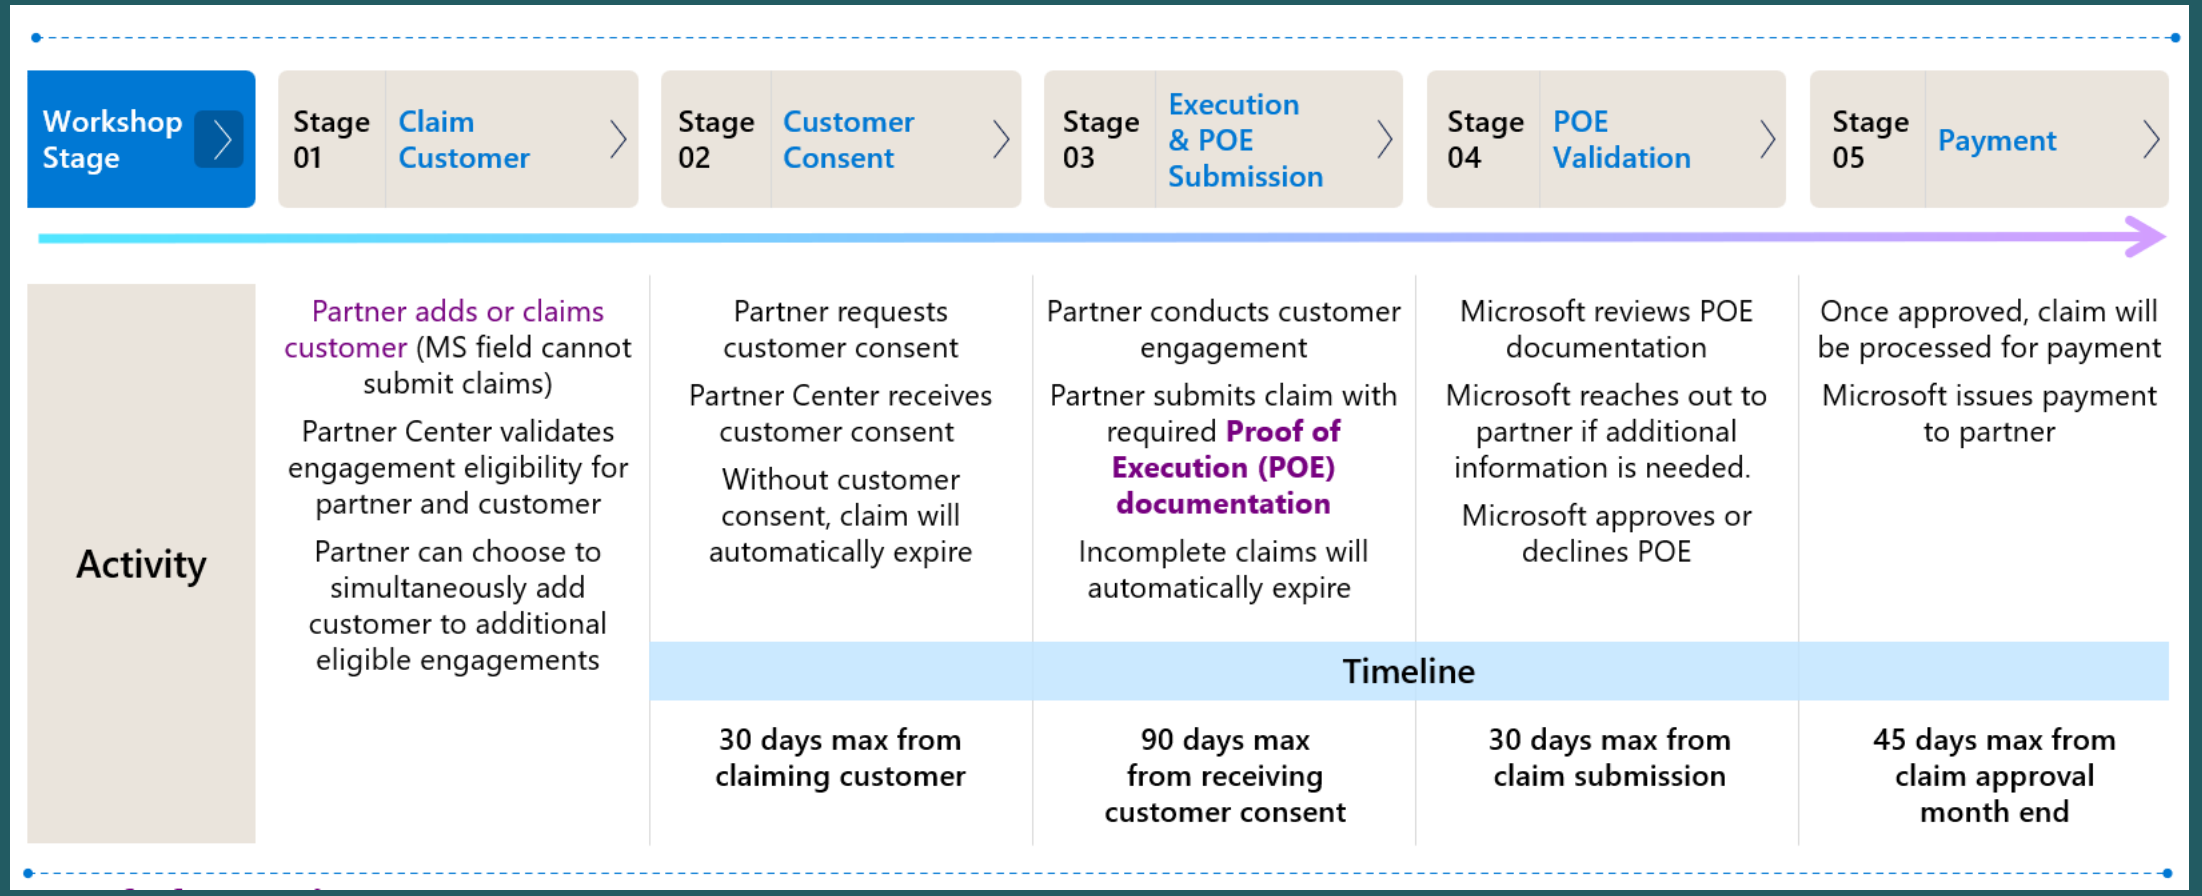

Definitions
- Fixed AIM Fee expands the universe of customers eligible for Activities by including those with no MSX opportunity ID including many SMB customers.
- Nominate customers using a **TPID or Tenant ID or Domain.**

Business Applications – Dynamics 365 Sales – Needs Assessment

ENGAGEMENT SUMMARY

Needs Assessments are partner-led engagements that enable partners to demonstrate value, build customer intent and maximize opportunities for D365 Sales workload across small and medium sized organizations. Partners will set the stage with value of the Microsoft cloud, then dive into customer's business challenges with the goal of demonstrating how D365 Sales can meet their needs. In this **5-to-6-hour engagement**, partners should approach the engagement with a mix of in-context demos, customer success stories and the "Art of the Possible". The key is to showcase the strengths of our Sales solution, and integration with the One Microsoft Cloud, is uniquely positioned to help them solve their challenges.

ENGAGEMENT TERM

October 1, 2023 – June 30, 2024.

Partner Eligibility

Partner Agreement
Microsoft Cloud Partner Program Agreement

Program Enrollment
Microsoft Commerce Incentives

Partner Qualification
One of the following:

- Attained one of the following legacy competencies and purchased benefits package: Cloud Business Applications
- Business Applications Solution Partner Designation
- Analytics on Microsoft Azure Specialization
- Low Code Application Development Specialization
- Intelligent Automation Specialization
- [ISV] Achieve $100k Solution Value tier + Co-sell ready ISV Connect offer in target geography

Measure and Reward

Engagement Payment: Market A = $1500 Market B = $1200, Market C = $800 *(Refer to slide titled link to Pre-Sales Fixed Fee Payout slide for det*

Customer Qualification

1. Select High Priority customers: SMB segment without MSX Opportunity ID

Engagement Requirements

Enable engagement goals:

- Validate discovery process and uncover a prospect's pain points when they don't know what they are - Interview decision makers to understand current state of the business, identify challenges and opportunities.
- Create and showcase high-priority transformation scenarios through demos that bring to light the product strengths and proof points around the specific customer challenges

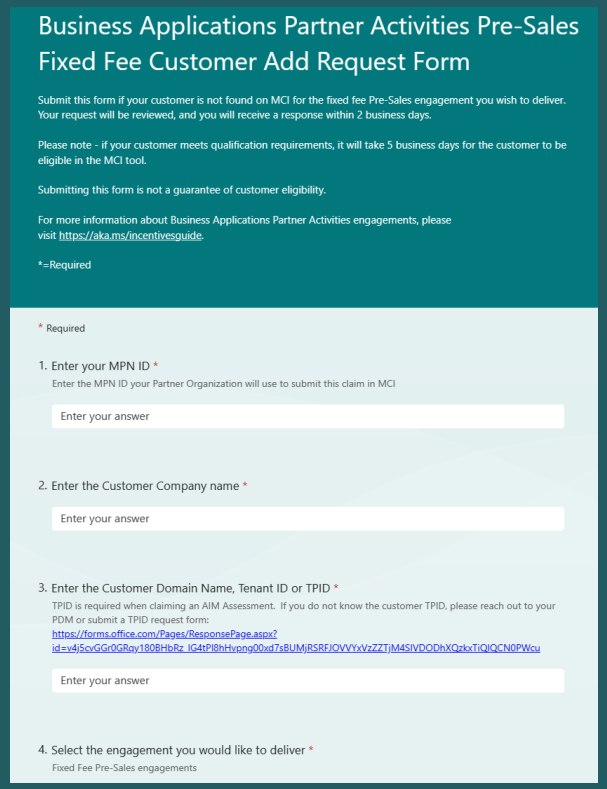

Partner Proof of Execution

The Partner submitted Partner Proof of Execution should contain the following:

- Attendees
- Challenge(s)/Opportunity(ies)
- Top initiatives Identified

Jeder Video Frame wird mittels MediaPipe in 67 3D-Raum-Punkte zerlegt, 60 Frames pro Gebärde ergibt 12060 Input Parameter pro Gebärde

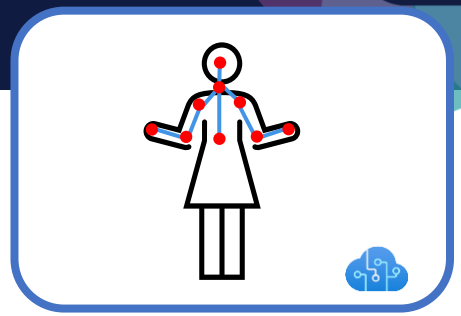

Erkennungsprozess

Eine Person kommuniziert in Gebärdensprache vor einer Webcam

Kamera nimmt Frames auf

Mediapipe AI Modell extrahiert Pose-Landmarks aus Videobildern

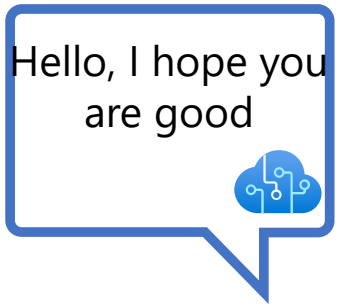

AI4Good
Sign Language Translation AI Model

Hello

you

good

AI4Good
extrahiert einzelne Wörter

Erstellen eines Untertitelsatzes
Verwendung von Azure OpenAI

Verwendete Azure Technologien

Azure ML Studio – Feature Extraktion und Modell Training & Optimierung

Azure Open AI – Umwandlung der **Gebärdenspracheglossen** in geschriebene Sätze

Azure Storage + Azure Web App – App zum Aufnehmen und Labeln der Trainingsvideos

Teams CART API – Einblenden der erkannten Sätze als Untertitel in Teams

Ausblick

- Erweiterung auf “Continuous Signlanguage Recognition” (CSLR)
- Optimierung der Azure Open AI Integration
- Erweiterung auf weitere Gebärdensprachen
- Neue Anwendung des Models – z.b. Gebärdensprachen Lern App
